American Railroad Journal.

Saturday, August 15, 1874.

Stock Exchange and Money Market

The financial movements of the week have not been of especial interest. The Money market has been comparatively quiet on the steady and very easy basis of 2@3 per cent on call to the leading street bonses. and 5@7 per cent per annum in the discount line. The Gold market has fluctuated considerably, but the dealings have not been extensive. Foreign Exchange has been brisker and firmer. The outflow of specie has been unusually large, but has had very little effect on the course of street affairs. The fall season's business has been more active in produce and merchandise; opening quite encouragingly in most branches of trade. One mercantile failure, in the dry goods line, was reported, but it was only a case of default on extended paper of an old house, which had been forced to make an arrange ment with its creditors, during the panic times of last year. The City banks, last week, reduced their deposit and increased their specie averages, while again contracting their loan and discount line. They augmented their reserve of legal tender quite handsomely while enlarging their item of circulation slightly. The U. S. Sub Treasury again largely increased its currency reserve, while reducing its specie balance. The City banks, last week, while increasing their reserve of legal tender notes $730,600, reduced their deposit item $479,700, and augmented their specie average $446,300. They also report a decrease of $1,478,300 in the loans and discounts, and added $43,500 to the circulation. The U. S. Sub-Treasury in this city closed the week with a currency balance of $59,109,277 against $56,303,092 the preceding week; and a coin hoard of $50,294,683, against $52,627,562 on the previous return. The City bank exchanges, during the week, were $339,534,953, or a daily average of $56,589,159. The customs revenue of the port, during the week, was $2,409,203. The City banks reported their average of gold last week at $25,740,000, and their greenback average at $66,549,500. Their deposits stood at $242,-261,600. The loan item was about $280,534,300. The circulation was $25,805,700.

The outstanding amount of legal tender notes is now definitely established by law at 382 millions. The National bank circulation is $350,-128,378.

The income of the Government, from internal evenues, thus far, in the current fiscal year, commencing with July 1, 1874, has been $11,963,932.

Gold has been quoted higher, but variable, during the week. The free export movement has been favorable to the operators for a rise. The customs drain has been moderate. The later dealings indicated less firmness. The extremes of the price have been 109⅜@110¼, closing at 109⅝, as against 109½ on Wednesday of the preceding week. The specie outflow, last week, was $3,521,442. The imports of specie at this port since Jan. 1, have been $2,415,239, against $2,176,151 same time last year. The customs demand for Gold last week averaged $409,-167 a day. Foreign Exchange has been more active but quoted rather unsettled. Bankers' sixty day bills on London closed on Wednesday at $4 87½@$4 88; sight bills on London at @4 89½ @$4 90½ to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $5,276,814.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $7,009,676.

Government securities have been in fair demand, especially on investment account; closing with considerable firmness.

U. S sixes of 1881 closed on Wednesday of this week at 118½@118½; U. S. Five-Twenties of 1862, 111¾@112; U. S. Five-Twenties of 1864 at 115¾@116; U. S. Five-Twenties of 1865, 116¾@117¼; U. S. Five-Twenties of 1865 consolidated, 116@116¼; U. S. Five Twenties of 1867, 117⅜@117¾; U. S. Five-Twenties of 1868, 117½@118; U. S. Ten-forties at 113½@ 114; U. S. Fives of 1881, (Funding Loan) 111⅞@112; Six per cent. currency Sixes from 117¼@117¾.

State and Railway bonds have been very moderately dealt in, yet quoted generally steady. Railway and miscellaneous share property has been rather more active, but lower and irregular as to values.

General business has been brisker in most lines. Domestic Produce has been in better request,

though at irregular prices. Foreign merchandise has been more freely dealt in at steady rates, in the leading instances. The dry goods movement has been quite animated. Hardware has also been in lively request, and the prominent houses have reported an unusually good run of custom. The Boot and Shoe trade has been more satisfactory. Metals have been selling more freely, but, in several instances, at lower prices. Eglinton Pig Iron quoted at 32 75@33 50; Glengarnock, $35; Sumerlee, $36; No. 1 American Pig at $31@$32, No. 2 do. at $27@$29; Forge, $25@$27; English Rails at $50@$52, gold; American Rails at works, 57 50@$62 50; Old Rails, $34@$38. Wrought Scrap, $35@$37 50. Included in the sales have been 3,500 tons Gray Forge Iron part @$25; 500 tons, No. 2 American Pig @$27; 1,000 tons new Scrap on p. t; and 2,350,000 lbs. Ingot Copper @19@19½, closing @19½@20. Ocean freights, active and at the close stronger.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Union Pacific R. R. S. F. 8s, 68; Boston, Hartford and Erie 1st mort., 22; Albany and Susquehanna R. Chesapeake and Ohio Canal.

At the regular monthly meeting of this company, held at Annapolis, Md., on the 7th inst., Hon. A. P. Gorman, President, submitted his report for the month of July, from which we make the following extracts:

The tonnage during the month was 117,124 tons, which is an increase of 8,903 tons over July, 1873. The accrued revenue for the month was $69,009 28, which is an increase over the corresponding month of the past year of $7,876 62.

The ordinary expenses, including pay of officers, for the month were $19,892 10, and there were expended in dredging Rock creek, construction of steam pump, stone crusher and other extraordinary expenses, $4,460 56, making the total expenses $24,352 66, which shows the net revenue for the month to be $44,656 62.

During the past month the entire tonnage destined for Alexandria has been passed through Rock creek basin, the number of boats locked in the Potomac being eight hundred and forty, or more than one-half the entire tonnage of the canal. To accommodate this trade necessarily requires very extensive improvements, and consequently largely increased expenses, but the increased trade and revenue attributable to these improvements for the past month alone is not less than $25,000.

The balance in the various banks to the credit of the company on the 1st was $86,789 40. This large balance, together with the accrued revenue, will enable the board to appropriate a sufficient amount to pay the overdue coupon in the preferred construction bonds now next in order. I, therefore, respectfully recommend that the sum of $50,985 be appropriated, and that notice be given that the coupon due July, 1860, will be paid at the banking house of Messrs. Alex. Brown & Sons, Baltimore, on the 20th inst.

The appropriation to pay the coupon named was accordingly made, and the board adjourned to September 10th.

☞ The Lehigh and Wilkesbarre coal company resumed work at all their collieries on Monday, having been idle from the 11th of July. Business prospects are much brighter in that section.

Atlantic and Lake Erie Railroad.

The Columbus (Ohio) *Journal* of the 7th inst., says: "The directors of the Atlantic and Lake Erie railroad have been in session for two days past at the Neil House. Quite a full attendance of stockholders and other interested persons was in the city, and altogether the road and its interests were energetically talked over and decisive steps were taken. The road is a bee line from Toledo to the coal fields of Perry county, the southern terminus being at Moxahala. From Toledo to Bucyrus the road bed is completed, except a distance of about three miles near Toledo. From Bucyrus to Mt. Gilead, in Morrow county, the substructure is being built by Houston, Wright & Co., of Zanesville, and will be completed this fall. From Mt. Gilead to New Lexington the road bed is complete, with the exception of a few places of short distance, and will all be ready for the rails in a short time. The distance below New Lexington, about seven miles, to the southern terminus, is ready for the rails, and a contract was awarded yesterday to B. B. McDonald & Co., of Bucyrus, to put down the ties and rails, the work to be completed within sixty days. The company receiving the contract has already made a cash purchase of the iron of the Columbus Rolling Mill company, to be delivered next week. McDonald & Co, are also to furnish a coal train of twenty cars, to be put on the track as soon as completed. Altogether, the prospects of the road are very flattering, and the directors feel confident that within a twelve month they will have a direct through connection between Toledo and the coal fields."

☞ The Amador *Ledger* of July 25, says: "A very valuable strike has been made in the Amador Quicksilver Mine. A vein three feet thick has been discovered at a depth of 30 feet below the surface, well charged with ore of a remarkably high grade. Specimens of the ore recently brought over will assay 50 per cent. of pure metal. From every indication the workmen have struck the right track to a every valuable mine, and a few weeks' work will establish it. The mine has never presented as favorable indications of great value as it does at present."

☞ Up to Saturday last there had been subscribed $17,000 in Huntington towards the stock of the Roslyn and Huntington Railroad, the proposed extension of the Flushing and North Side road. The entire subscription required from the people of Huntington is understood to be $25,000; so there are $8,000 yet to be raised. In addition to what has already been subscribed about $6,000 in cash has been contributed as a fund with which to negotiate for the right of way between Cold Spring and Huntington.

☞ The Baltimore *Sun* says that Hon. J. C Clarke, of Maryland who has for a year or more been connected with the Erie Railway as general manager, has resigned that position, and in a few days he will assume control of the Toledo, Wabash and Western railroad, over 300 miles long, with lateral branches connecting Toledo, Ohio, with the Mississippi river. Mr. Clarke has entered into an agreement for three years at an annual salary of $15,000, added to which are large pecuniary interests in the road.

☞ J. H. Bates, chief engineer of the Colfax and Nevada Railroad, has completed his preliminary survey, and is now engaged on the maps, profiles and estimates.

Illinois Central Railroad.

The statement of this Company for the month of July, 1874, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	1,071.00 for	$8,411 45
Acres Interest Fund Lands Sold	..... for	.....
Acres Free Lands Sold	..... for	.....
Total sales during the m'th of July, 1874	1,071.00 for	$8,411 45
To which add Town Lot Sales	..... for	....
Total of all	1,071.00 for	$8,411 45
Cash collected in July, 1874		$39,452 90

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois. 707 Miles.	In Iowa. 402 Miles.	Total. 1,109 Miles.
Freight	$324,928 00	$67,323 00	$392,251 00
Passengers	105,329 50	41,140 70	146,470 20
Mails	9,072 08	3,059 33	12,131 41
Other sources	70,927 92	2,410 67	73,338 59
Tot'l July '74.	$510,257 50	$113,933 70	$624,191 20
Total actual earn'gs, July, 1873	$548,372 78	$136,167 55	$684,840 33

☞ The Passaic Rolling Mills of Paterson, N. J., have secured the two largest orders on the present market for iron beams—that of the Centennial Building at Philadelphia and the new Capitol at Albany. The men employed in the establishment generally volunteered a reduction of wages, which enabled the company to successfully compete for these large orders. They were previously kept busy in filling the orders of the Paterson locomotive shops, but the depression in that branch necessitated the embarkation into other lines, such as that in which they have proven so successful. This company employes about 275 men and pays out an average of $7,000 every fortnight.

☞ The Chicago *Tribune* says: "The Baltimore and Ohio Railroad Company is pushing the work on its extension to this city with the utmost energy. A large force of laborers has now been set to work on this end of the line, and they are rapidly pushing the work forward to form a junction with those working from the other side. The Illinois Central has been hauling a large amount of iron to Parkside station for the new road, and construction trains are run out daily. The new road will be in running order in a short time."

☞ The Chillicothe (Ohio) Street Railroad Company has been organized, with a capital of $30,000, to build a street railroad from the Marietta and Cincinnati depot in Chillicothe to the Limestone road. Edwin P. Safford, Samuel Epstine, Henry Sulzbacher, Benjamin Esker, Paul Warzluff, John Marklejohn, James Ewing and M. H. Marshall are the corporators.

☞ The Prince Edward Island Railway is expected to be formally opened in September. The Dominion Government has not yet taken possession of it. When finished it will make a very complete railway system for the Island.

☞ The State of Vermont has a balance of assets over liabilities of $20,000. About $50,000 of bonds fall due in December next, $110,000 in two years, and $65,000 in four years.

South Side Railroad of Long Island.

This road is advertised to be sold by two different parties and at different dates. The first notice of sale appeared in the papers some two or three weeks ago, in pursuance of a judgment of foreclosure, procured by Nicholas Wyckoff and Elbert Floyd Jones, Trustees of the extension bonds, upon which there had been a default of interest; the date of sale being fixed for the 31st inst. The second notice appeared subsequently, but it fixes the date of sale earlier than the first—Saturday, the 22d inst. This sale is to be made by order of the United States District Court, by Mr. Charles Jones, assignee in Bankruptcy, and subject to all liens and incumbrances on the road. So it appears that the conflict of authority between the State and United States courts is to be further continued. It is understood that there are three parties endeavoring to obtain possession of the road, represented respectively by Oliver Charlick, the present Receiver, (Mr. Cornell,) and Mr. Fox, the old President, and the various cross proceedings are supposed to be instigated by the opposing interests. Meantime, the road is doing a very heavy business, and needs only the control of men who will place it upon a sound financial basis to assume permanent prosperity.

Finances of Michigan.

The receipts into the Michigan State Treasury for the month of July, 1874, (including $1,119 077 68, balance on hand June 30,) were $1,339,876 80; and the payments $191,394 77—leaving a balance July 31, 1874, of $1,148,482 03. The State debt Aug. 1, 1874, was as follows:

INTEREST-BEARING DEBT.

Sault Canal debt, 6s, due July 1st, 1879	$61,000 00
Renewal loan bonds, 6s, due July 1, 1878	105,000 00
Two-million loan bonds, 6s, due Jan. 1, 1878	337,000 00
Ditto, due Jan. 1, 1883	695,000 00
War Bounty loan bonds, 7s, due May 1, 1890	366,000 00
Total	$1,564,000 00

NON-INTEREST BEARING DEBT.

Adjusted bonds, July 1, 1873	8,000 00
War bounty loan bond, Jan. 1, 1863	25,050 00
$52,000 part paid five million loan bonds, adjustable at $578 57 per $1,000.	30,085 64
Total bonded debt	$1,622,135 64

☞ The shipments of Cumberland coal for the week ending August 1 amounted to 63,243 tons 8 cwt., an increase compared with the corresponding week of last year of 20,040 tons 7 cwt. For the year to that date 1,340,583 tons 9 cwt. were shipped, showing a decrease compared with the like period in 1873 of 76,959 tons 17 cwt. Decrease in canal shipments, 15,763 tons 2 cwt.; in railroad shipments, 61,496 tons 15 cwt. Baltimore and Ohio Railroad decrease, 63,431 tons 19 cwt. Pennsylvania Railroad increase, 2,235 tons 4 cwt.

☞ The bridge over the Merrimack, on the Nashua and Rochester R. R., is fast approaching completion, and the road will be opened to business on the first of September; but twenty-two miles of rails remain to be laid.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of July, were:

ENTERED FOR CONSUMPTION.

	1873.	1874.
Manufactures of wool.....	$2,089,788	$2,192,422
" cotton...	1,386,622	1,368,669
" silk	1,040,083	1,410,708
" flax	640,256	720,928
Miscellaneous dry goods..	424,621	400,214
Total entered for consump.	$5,581,370	$6,092,941

WITHDRAWN FROM WAREHOUSE

	1873.	1874.
Manufactures of wool.....	$1,101,166	$751,471
" cotton ...	455,648	338,580
" silk.....	468,521	328,884
" flax	879,788	324,845
Miscellaneous dry goods..	54,264	34,718
Total withdrawn from warehouse	$2,454,337	$1,778,498
Add entered for consump.	5,581,370	6,092,941
Tot. thrown on the market..	$8,035,707	$7,871,439

ENTERED FOR WAREHOUSING.

	1873.	1874.
Manufactures of wool....	$1,814,949	$2,102,753
" cotton ...	556,606	542,749
" silk.....	621,070	581,678
" flax	526,295	535,489
Miscellaneous dry goods..	63,401	92,752
Total entered for wareh'g..	$3,582,821	$3,805,421
Add entered for consump.	5,581,370	6,092,941
Total entered at the port..	$9,163,691	$9,898,362

The imports of foreign dry goods at New York for seven months from January 1, were:

ENTERED FOR CONSUMPTION.

	1873.	1874.
Manufactures of wool...	$13,387,819	$11,948,637
" cotton.	12,821,213	11,300,933
" silk ...	11,088,112	12,612,743
" flax ...	6,854,654	6,112,677
Miscellane's dry goods..	4,301,784	3,992,562
Total, as above.....	$48,453,382	$45,967,552

WITHDRAWN FROM WAREHOUSE.

	1873.	1874.

Total withdrawn from warehouse	$25,023,409	$20,136,228
Add entered for consump.	48,453,382	45,967,552
Total thrown on the market....	$73,476,791	$66,103,780

ENTERED FOR WAREHOUSING.

	1873.	1874.
Manufactures of wool....	$8,432,600	$8,580,349
" cotton..	5,411,121	3,826,285
" silk	5,508,500	2,860,961
" flax	3,686,822	3,624,575
Miscellaneous dry goods.	1,195,847	1,059,400
Total entered warehouse.	$24,184,890	$19,951,570
Add entered for consump.	48,453,382	45,967,552
Total entered at the port..	$72,638,272	$65,919,122

☞ The gross earnings of the Denver and Rio Grande railway (118 miles) in May, 1874, were $38,083 17, the expenses $17,024 89, and the net earnings (55.29 per cent) $21,058 28. In May, 1873, (same mileage) the gross earnings were $38,384 78, and the net earnings $20,045 06—showing a decrease in gross earnings of $301 61, with an increase in net earnings of $1,013 22.

A Grangers' Railway.

A movement to secure the building of a Grangers' Railway from East to West is referred to in the following terms by the Chicago *Inter Ocean* of the 7th inst:

Yesterday a meeting was held in this city, which was composed of Eastern, Western, and Southern capitalists, and in which there was great unanimity in the project. Whether the meeting was composed entirely of Grangers or not cannot be stated, so quiet was the matter kept. There is abundant capital and all the influence necessary, the movers say, to make the scheme a success, and no efforts will be spared. It is proposed to make a through track line from the Atlantic to the Pacific. It is not proposed, however, to construct it all the way, but by connections that the projectors know they can get to accomplish their purpose. Whether the Boston scheme has anything to do with this cannot yet be learned, but it is believed that it has. Numerous excursion parties have been visiting Illinois recently, and it is given out that the object is to investigate into the feasibility of the matter. The gentlemen now here will remain for several days, and will probably hold another meeting to day, at which a delegation expected from the Pacific may be present. It is noticeable that several of the Eastern railroad kings are in Chicago.

The Grand Island Bridge.

The Lockport *Journal* says that surveys are quietly proceeding on Grand Island for another international railroad bridge, and then adds:

The company was chartered last Spring both in the Dominion Parliament and the American Congress, and already capitalists have been induced to co-operate, and engineers set to work. The bridge is being built in the interests of the Canada Southern, whose managers complain that not only is the International Bridge unavailable on account of its single track, but that the City of Buffalo, through which trains can only be run at the rate of six miles an hour, is a serious obstacle in the way of railroad traffic. Hence they feel themselves compelled to "go round" Buffalo. The Grand Island bridge will have a double track, also a double carriage-way. It will cross the western International branch of the Niagara River just below Black Creek, to which a short line will be built from Stevensville; then run along Grand Island a distance of about seven miles, and cross the eastern American branch to the main land near Tonawanda, there connecting with the Erie and Central. The situation is an exceedingly favorable one, the water being only twenty feet deep and the current one and one half miles an hour, as against a current of from eight to twelve miles at Buffalo. The bridge will be finished in August, 1875, and an important saving in time will, it is confidently anticipated, ensue from its construction.

☞ The remaining sections of the Grand Trunk broad gauge track, east of Montreal, it is understood, will be changed to the uniform standard on the 26th of September next. The Grand Trunk Railway will then be able to pass the cars of nearly all the American railways to any stations on its line. Extensive preparations are being made in advance, and no doubt the change will be effected as successfully as that between Montreal and Stratford last year.

☞ The St. Louis, Iron Mountain and Southern Railway Company has just negotiated in London about $1,000,000 second mortgage bonds at 79 per cent. currency, and $1,500,000 of its consolidated mortgage bonds at 71 per cent. currency. This company has lately reduced its floating debt more than one-half, and expects to fund the most of the remainder ($1,000,000) within a year.

☞ A despatch from Portland, Me., says the contract between the Portland and Ogdensburg Railroad Company and the contractors, Messrs. Fuller & Harding, has been modified, so that the latter received more cash and less bonds. The contractors are to proceed rapidly with the work, so that the road will be opened to Fabyan's and connect with the Boston, Concord and Montreal Railroad by next May.

☞ Work was resumed on the Flint and Pere Marquette Railroad, west of Reed city, Mich., on the 28th ult. The company expect to complete the entire line to Ludington in six weeks, forming a great through route from the lake ports to the Eastern cities.

Iron Bridges, Pivot Bridges,

AND

TURN TABLES.

F. C. LOWTHORP,

CIVIL ENGINEER,

Patentee and Builder,

78 E. STATE-ST.,

TRENTON, N. J.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H Haswell

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

American Railroad Journal.

New York, Saturday, August 22, 1874.

Foreign Commerce of the United States.

The statistics of foreign commerce of the whole United States for the month of April, 1874, and for the ten months of the Government fiscal year then terminating, have just been issued by the Bureau of Statistics at Washington. The figures given are all in specie values. From this we learn that the imports for the month of April, 1874, amounted to $57,659,807, and for the ten months ending April 30, 1874, to $495,304,876, against $57,618,833 for the month, and $556,567,409 for the corresponding ten months of 1873. The domestic exports for the month of April, 1874, were $51,842,036, and for the ten months $518,951,386, while in 1873 they were for the month $52,809,961, and for the ten months $485,457,353. The foreign exports amounted in April, 1874, to $1,907,232, and for the ten months ending April 30, 1874, to $18,702,172, against $2,558,084 for the month, and $22,105,593 for the corresponding ten months of 1873.

Of the total imports and exports for the ten months ended April 30, 1874 and 1873, respectively, the following portions consisted of merchandise and of Gold and Silver:

1874.	Imports.	Domestic Exports.	Foreign Exports.
Mdse.....	$469,769,679	$479,775,710	$13,693,281
Specie and bullion..	25,534,697	39,175,676	5,008,891
1873.			
Mdse.....	538,006,901	420,765,311	13,418,209
Specie and bullion..	18,560,508	64,692,042	8,687,384

The total value of foreign commodities remaining in warehouse April 30, 1874, was $58,475,974, against $71,535,219 April 30, 1873.

Allowing for the differences in the warehouse account, the exports for the ten months ended April 30, 1874, are in excess of the imports to the extent of $29,289,937, while for the same period of 1873 the imports exceeded the exports by $68,411,617.

Steel Rails.

The Truckee *Times* says that the Central Pacific Railroad Company are experimenting extensively with steel rails at various points between Emigrant Gap and Truckee. They have already about sixteen miles of these rails laid down across the Sierras. In front of the Truckee Hotel, about one year ago, they laid down a steel rail on the main track, in place of one of the common rails in use. As nearly all the switching and making up of trains takes place in front of the hotel, on the track mentioned, the wear and tear of the rails is enormous. Frequently trains pass over the spot from fifty to a hundred times a day. Since the steel rail has been laid down the common iron one have been taken up and replaced with new ones five times, and the steel rail is still in good serviceable condition. We understand that twenty miles more of steel rail will be laid down this summer and fall across the Sierras.

☞ The New Bedford *Mercury* says the Old Colony Railroad has decided upon the plans for the construction of the bridge at Slade's Ferry. The work of building the two eastern piers is to commence very soon. There are to be ten spans of about 155 feet each, and the bridge is to be of the style known as a double decker. The upper deck will be occupied by the railroad, and the lower one will be an ordinary roadway.

Commerce of New York.

The gold value of the foreign imports at this port in July, including specie, was $33,207,729, against $31,173,126 same time in 1873, and $38,136,235 same time in 1872. For the first seven months of the calendar year the imports amount to $251,780,727, against $252,221,108 same time in 1873, and $270,916,871 same time in 1872. The chief feature in the imports this year is the large falling off in Dry Goods and the decreased withdrawals of goods from bond, the latter reflecting the depression of business. For the seven months the relative imports thus compare with previous years:

	Dry Goods.	Mdse.	Specie.	Total.
1870	58,163,413	118,145,657	7,357,949	183,666,019
1871	78,044,000	149,912,503	4,918,692	282,875,195
1872	85,877,426	182,219,963	2,819,482	270,916,871
1873	72,638,272	176,641,174	2,941,662	252,221,108
1874	65,919,122	182,793,197	3,068,408	251,780,727

The Customs receipts in July were $9,654,569 49, against $10,008,929 55 same month in 1873, and $7,251,160 35 same month in 1872. For seven months the Customs receipts foot up $66,542,422 76, against $71,990,446 20 same period in 1873, and $81,073,870 11 same period 1872. The exports from this port to foreign countries in July (mixed values) were as follows:

	1872.	1873.	1874.
Produce and Mdse.....	$20,060,988	$25,621,503	$26,454,378
Specie.....	17,248,688	10,038,643	3,503,728
Total...	$37,309,676	$35,660,146	$29,958,106

In Produce and Merchandise there has been a decided gain, and a no less marked decrease in the Specie outflow. For seven months of the year the exports are as follows:

	1872.	1873.	1874.
Produce & Mdse..	$126,519,471	$165,109,384	$169,885,987
Specie...	54,363,587	37,857,927	33,122,894
Total....	$180,883,058	$202,967,311	$203,008,881

In view of this healthful exhibit, in connection with the fullness of the harvests, the marked depression of trade and industry seems altogether unwarranted.

A Busy Scene.

At the new depot of the Pennsylvania Railroad at Delaware avenue and Dock street, there was a scene of activity already at an early hour yesterday morning, although it was but the second day of its being opened for business. Piles of freight were on the platform, and trains of cars were being pulled in and out by locomotives, a novelty for that locality. We are surprised to see how naturally everything seemed to work. The horses seemed to know all about it, taking no notice, in an objectionable manner at least, but pulled away in friendly proximity to their iron relatives without fear or anxiety as to danger or rivalry.

This depot is unusually light, airy and well ventilated, and admirably arranged for weighing and shipping merchandise with dispatch. The scales are of the same make as those at the other depot, which have not yet been all removed. They are from the Philadelphia Scale and Testing Machine Works of Messrs. Riehle Bros. This firm are making a patent scale, both for warehouse and railroad truck, which appears to be peculiarly adapted for railroad use, and are rapidly superseding the older styles, being very strong and reliable, and sealed with great care to government standard.

In regard to freight depots so convenient and accessible as this, too much cannot be said in their favor. How much they save in different ways it is impossible to estimate; the injury done to merchandise, to say nothing of the enormous charges for carting, is very great, when the goods are jostled and tossed for long distances over stony streets and handled in the roughest manner in loading and unloading.—*Phila. Inq. Aug.* 12.

Central Pacific Railroad.

The earnings of this road for the year ending December 31, 1873, were as follows, viz:

	Coin.	Currency.
From freight	$4,989,996 21	$2,472,898 71
" passengers	2,235,942 81	2,182,474 61
" express	119,251 85	93,785 05

	$4,929,684 09	$39,587 43
Earnings over operating expenses	$2,713,785 49	$5,180,895 97

The following is a recapitulation of the earnings and expenses for the year 1873, together with a comparison of the same with the year 1872:

	1872.	1873.
EARNINGS.		
Gross earnings, coin	$7,400,089 35	$7,643,469 58
Gross earnings, currency	4,563,551 22	5,220,483 40
Total earnings, coin and currency	$11,963,640 57	$12,863 952 98
Tot. earnings, equal to currency	$12,734,729 88	$13,851,489 24
OPERATING EXPENSES.		
Operating expenses, coin	$4,953,612 42	$4,929,684 09
Operating expenses, currency	57,666 42	39,587 43
Total expenses, coin and currency	$5,021,278 84	$4,969,271 52
Total expenses, equal to currency	$5,527,445 25	$5,606,186 70
Earnings over operating expenses (all in currency)	$7,207,284 63	$8,245,302 54
Percentage of operating expenses to gross earnings	43.40	40.47

The percentage of operating expenses to gross earnings as shown above, was 2.93 per cent less than in 1872.

The earnings over operating expenses for 1873 were (all in currency)	$8,245,302 54
The year ending Dec. 31, 1872	7,207,284 63
Being a gain of	$1,038,017 91

—or 14.40 per cent.

The amount of capital stock authorized is $100,000,000; of which $62 608,800 is subscribed, and $54,275,500 paid in. Of the amount subscribed, there is held in trust for the company $8,333,300.

The debts of the company are: funded debt $54,400,000, less sinking fund $1,151,731 70—leaving $53,248,268 30; to which add United States subsidy bonds, $27,885,680—making a total of $81,133,948 30.

The assets of the company, as given in the annexed balance sheet, amount to $145,484,158 32; to which add farming lands, (estimated value), $29,306,000; undivided half of 60 acres of land in Mission Bay in San Francisco, 500 acres water front at Oakland, and about 140 acres and water front at Sacramento, (estimated value, independent of improvements) $7,750,000—making a total of $182,540,158 32. The president in his report says:

The anticipations in the Annual Report for 1872, in relation to increase of business, have been realized, and we may expect as much or greater increase for the year 1874. The increase of population of the State, by immigration, during the year 1873 was 84,000, this year it promises to be much larger. The harvest is abundant, and unusual prosperity prevails throughout the State.

At the last session of the Legislature the question of change of the law, in regard to freights and fares, was largely discussed, and, as a conclusion, no legislation was had. But an important principle was recognized, viz: that as a question of sound political economy, railroad companies should be assured of stability in the laws regulating their tariffs.

To this end, and because the good faith of the State, in this respect, had been questioned, four special bills were passed conferring rights upon associations to build as many separate lines of railroads, with varying tariff rates; in some cases increasing the rates above those of the general Incorporation Law, and in others, decreasing them. The main and only object of the companies in accepting these special acts, so far as they accept less rates than those provided in the general law, was to secure themselves against future legislation reducing their rates. It was openly stated, and it was clearly true, that unless they could have a guarantee that the income of the lines to be constructed should not be interfered with by legislative control of tariffs, the roads could not obtain credit and could not be built. No other benefits over those to be had by the general Corporation Law were gained by these special acts, and there was nothing else to justify their passage by the legislature, or their approval by the Governor. And it is clear that if railroads are to be built by other organizations than the Government, they must be left as free to make profits, under the law as it exists at the time of their organization, as others making investments in any species of property. It is just, and has its foundation in the soundest political economy. The fact that the State exercises its right of eminent domain to secure the right of way for the construction of railroads is, in itself, an evidence of their great public utility, and it is only this that justifies it in the exercise of its right of eminent domain to procure the right of way. This exercise of eminent domain is made for the benefit of the public, and not for that of the corporation which must pay the full value of all it takes for right of way, and which, from that time, holds it and controls it as private property. Can it be wise to discourage investments that are so unqualifiedly stamped by the State as beneficial to the public?

Whether there is a reserved power to the State to regulate the tariffs of railroads, other than the limitation of the general Corporation Law, is a mooted question. Whatever the power is, it is equally applicable to every corporation formed under it, whatever its business or objects. But, however this may be, the exercise of it, if it exists, must ultimately be regulated by justice and by sound and correct principles.

In the passage of the special bills, before alluded to, this principle was evidently recognized. The people seem to have acquiesced in the action of the legislature, and we may confidently look for a full recognition of the principle hereafter. The question is now being largely discussed throughout the United States, and if the principle is correct, we may rest with confidence that the good faith and intelligence of the people will recognize it, and upon this good faith and intelligence must the railroads of the present and future rely. Decisions by the courts, upholding a law that is repugnant to the will of the people, will avail nothing; but the majority will protect individuals in the right. The railroad companies are made up of individuals, and a wrong to one of these is a wrong to the whole people. And the question at last resolves itself into this, that either individuals must be protected in their investments in railroads, and allowed to make such profits as their enterprise commands, or the State must own and construct railroads, or railroading must cease.

There is no such thing as separating control and ownership. Control is ownership.

If the exigencies of the State shall require it, to assume partial or complete control of any species of property, good faith will compel it to provide compensation accordingly, as it does when it exercises the right of eminent domain, and takes private property for public use.

The financial and business prospects of your company were never brighter. The end of each year in its history seems to more than realize the promises of the beginning.

The number of miles of road operated, including the ferry between San Francisco and Oakland wharf, at the close of the year, was, as stated in annexed repoat of the Chief Engineer, 1,218.93. There are also 41.2 miles in the San Joaquin Valley operated under lease from the Southern Pacific Railroad Company, of which 20.3 miles were completed July 1st.

The number of engines owned by the company is 188. Twelve new engines were built in 1873, and nine sold. The number of miles run, as compared with the preceding year, is as follows:

	1872.	1873.
Miles run by passenger engines	1,243,720	1,351,740
Miles run by freight engines	2,530,776	2,748,556
Miles run by switching engines	584,182	725,217
Miles run by miscellaneous engines	540,148	185,419
Totals	4,898,826	5,010,932

—being an increase of 112,106 miles, or 2.3 per cent. Cost of repairs per mile run, 8.46 cents; wiping, 1.22; enginemen, 7.35; fuel, 18.48; stores, 0.89—total, 36.4 cents.

At the close of the year, the number and kind of cars were as follows: 92 first-class and 52 second-class passenger, 23 sleeping, 19 mail and express, 21 baggage, 55 caboose, 1 directors', 1 superintendent's, 1 pay, 2040 box, 1499 platform, 170 section, 212 hand, 110 dump, 52 track-laying, 2 wrecking, and 7 snow plows. The total number of miles run by cars of all kinds, including those from foreign roads, was 48,280,608.

The company have five ferry steamers employed in the ferry service between San Francisco, Oakland and Alameda. Also, 25 river steamers and 9 barges. The number of ferry passengers carried in 1873 was 2,621,976, a gain over the year 1872 of 206,835, or 8.56 per cent. The Superintendent in his report, from which the above is obtained, says:

The Utah Northern Railroad, (narrow gauge), connecting with your road at Ogden and Corinne, has its line extended to Franklin, Idaho, a point 18 miles distant from Ogden.

The survey for the Railroad from Visalia, connecting with the Central Pacific at Goshen, is completed. Work has already been commenced on the grading, and the iron and ties are being forwarded. The road will be completed in time to move the grain crop of this season.

The Eureka and Palisade Railroad (narrow gauge) connecting with the Central Pacific at Palisade, will prove a valuable feeder. The traffic to the Eureka mining district, already large, will be materially increased as the road progresses. The work is being prosecuted with vigor, and twenty miles will be completed and put in running order by the middle of June. It is believed the road will be pushed forward to completion at an early day.

The prospective value of the commerce of the Pacific Ocean to the road can scarcely be over estimated. The business from the Islands and coast wise centering at this port, in connection with the road, is rapidly increasing. The new Trans-Pacific Steamship Line between San Francisco and Asia is meeting with much encouragement, and the business already inaugurated between this port and the Australian Colonies, by the Australian and American Mail Steamship Line, carrying the English mails, bids fair to exceed the most sanguine expectations of its projectors.

The acreage of grain sown in California was never before so large, and the prospects are most flattering for an abundant harvest. A general increase of business may be expected, and additional rolling stock will be needed to meet the requirements of the road.

The trains have been run with great regularity, and the road has been remarkably free from casualties.

From the report of the General Freight Agent, J. C. Stubbs, we learn that the number of pounds of local freight carried in 1873 was 1,398,827,364; through freight, 220,375,432; company's freight, 438,001,832—total, 2,057,204,628 lbs., against 1,881,646,021 lbs. in 1872—an increase of 175,558,607, or 9.33 per cent. Total mileage of freight in 1873, 248,793,085; in 1872, 235,637,423—increase 13,155,662. Average charge per ton per mile, in 1873, (exclusive of company's freight) 3 675 cents. Of the local freight there was forwarded to the general markets from the agricultural districts 244,862,013 lbs. of grain, from which the company earned $464,210 41 coin, at an average rate of 3.32 cents per ton per mile. Of the through freight eastward, the following are some of the principal items: barley 2,524,498 lbs., butter 290,898, borax 647,934, blankets, 81 348, beans 98,439, coffee 4 101,836, flour 1,905,125, furs, skins, etc., 794,984, green fruit 2,896 523, glue 369,877, hops 551,995, leather1, 337,830, quicksilver 432,453, rice 285,000, sugar 110 050, silk 877,279, canned fruits 678,582, cotton 195,348, salmon 3,624,109, seal skins 1,392,173, tea 12,726,465, whalebone 144,202, wheat 20,965, wine 3,803,648, wool 29,010,975. Westward there were carried: alcohol 584,700 lbs., agricultural implements 3 697,270, boots and shoes 2,464,380, candles 2,521,000, carpets 1,218,140, clothing 1,159,858, domestics 13,167,767, fish 4,026,660, hams 6,415,990, live stock 3,032,480, lard 1,498,820, lumber 2 541,818, machinery 5,165,580, bulk meats 4,823,867, oil 2,749,300, oysters 1,190,780, paper 2,160,090, liquors 1,596,800, tobacco 4,976,430, wagons 5,037,670.

As reported by T. H. Goodman, General Passenger and Ticket Agent, the number of passengers carried east was 1,630,801; do. west, 1,649,370—total, 3,280,171, of these 67,856 were through, 590,339 local, and 2,621,976 ferry. Average number of miles traveled by each passenger, 36.85. Average charge per passenger per mile, 3.65 cents In 1872 the total number of passengers carried was 3,003,974; the average number of miles traveled by each passenger 35.33; and the average charge per passenger per mile, 3.83 cents. It will be seen that the increase in the number of passengers in the past over the preceding year was 276,197.

STATEMENT OF PROFIT AND LOSS FOR YEAR 1873.

Interest	$3,179,649 13
Taxes	315,821 94
General and miscellaneous expenses	178 089 80
Legal expenses	61,327 71
Civil engineering	20,312 68
Discount on currency receipts	592,814 97
Dividend No. 1	1,628 265 00
Operating river steamers & barges.	35,485 79
Shop and store accounts short on inventories	58,608 40
U. S. Government transportation, amount disallowed by Gov	18,336 44
Balance	9,339,151 99
	$15,427,863 85
Balance to credit of this account, Jan. 1, 1873	$7,433,960 20
Earnings for year 1873 $12,863,952 98	
Less operating exp. 4,969,271 52	7,894,681 46
Interest on sinking funds	87,884 70
Forfeited stock, part payment on 352 shares forfeited	7,690 00
Fuel account over on inventory	8,647 49
	$15,427,863 85

The currency receipts for the year were sold at a discount of $592,814 97, leaving the earnings over operating expenses, $7,301,866 49, in coin. Average premium on gold, 12.92 per cent; adding this premium, the earnings over operating expenses would be equivalent to $8,245 802 54 in currency.

GENERAL LEDGER BALANCE SHEET, Dec. 31, 1873.

Construction account		$131,419,110 53
Equipment account		6,156,746 44
Real estate account		1,002,712 08
Shops account		855,638 15
Machinery in shops		515,765 00
Furniture, telegraph instruments, safes, etc.		92,350 00
Steamers, Sacramento River		853,569 41
Sinking fund No. 1, for redemption of convertible mortgage bonds		582,631 70
Sinking fund No. 2, for redemption of California State And B'ds		232,050 00
Sinking fund No. 3, for redemption of first mortgage bonds of the company, series "A, B, C and D."		232,050 00
Sicking fund No. 4, for redemption of first mortgage bonds of the company, series "E, F, G, H and I."		105,000 00

Profit and loss	9,339,151 99	
	$146,635,890 02	

President.—LELAND STANFORD.

Vice Pres't and Gen'l Agent—C. P. HUNTINGTON.

2d Vice President.—CHAS. CROCKER.

Directors.—Leland Stanford, Mark Hopkins, E. H. Miller, jr., Robert Robinson, Chas. Crocker, of San Francisco, Cal.; Charles H. Cummings, of Sacramento, Cal.; C. P. Huntington, of New York City.

Treasurer.—MARK HOPKINS.

Secretary.—E. H. MILLER, jr.

General Sup't.—A. N. TOWNE, San Francisco, Cal.

Assistant Gen'l Sup't.—JOHN CORNING, San Francisco, Cal.

Division Superintendents.—E. C. Fellows, Oakland, Cal.; J. A. Fillmore, Sacramento, Cal.; Frank Free, Wadsworth; R. S. Mattison, Carlin, Nev.; R. H. Pratt, Ogden, Utah; of River Steamers, W. H. Moor, San Francisco, Cal.

Chief Engineer.—S. S. MONTAGUE, San Francisco, Cal.

☞ California has just discovered a new source of wealth. To her gold and quicksilver, wheat, barley, malt, cattle, fruits, wine and wool, coal and iron are to be added—recent discoveries of coal in the Ione Valley giving abundant promise. Iron is already known to exist, and the proximity of the two may make the iron ore available if transportation is not too costly. The San Francisco *Chronicle* says: "California will be impelled forward with great strides when she begins to smelt iron, and the first plate turned out will do more to insure future prosperity than the locating of a diamond mine."

Central Pacific Railroad.

CHIEF ENGINEER'S REPORT.

CHIEF ENGINEER'S OFFICE,
SAN FRANCISCO, June 1st, 1874.

HON. LELAND STANFORD,
President C. P. R. R. Co.:

The following brief report of matters, under the supervision of the Engineer Department for the year 1873, is respectfully submitted.

The surveys made during the year, were chiefly those incident to the improvement and repairs of road already built, and the completion of some topographical work at various points on the main line.

The location surveys of the Oregon Division were not extended, nor was anything done towards the extension of the main line on this division during the year.

The work of construction of this line, is already considerably in advance of the requirements of the Act of Congress, granting right of way, lands, etc., and it will not be necessary to construct any new road during 1874, to meet those requirements.

A section of twenty miles of completed road, viz., from the 77.6 to the 97.6 miles was examined and favorably reported on by the United States Commissioners, Edgar Mills, Lauren Upson, and Christopher Green, on January 8th, 1874, and has been duly accepted by the Department of the Interior.

The only new road built during the year, was the addition of 3.79 miles to the Oakland and Alameda branch, consisting of a second track through Railroad Avenue and Seventh Street, Oakland, from Bay Street to Harrison Street, and a branch thence to Mastick's Station, Alameda. This branch crosses the main line at the intersection of First and Alice Streets, and crosses San Antonio Creek on a bridge, consisting of 12 spans of 60 feet each, and a swing bridge with two clear openings of 80 feet each.

The construction of this new line was necessary, to enable the local trains and ferry to make half hourly trips, which the rapidly increasing travel seemed to require.

In consummating this arrangement, the Alameda ferry has been abandoned, and the steamer Alameda, formerly run on that route, has been placed on the Oakland line, and now makes alternate trips with the El Capitan.

The new track was completed, and boats and trains commenced making half hourly trips on the 29th day of September last, and the new arrangment is highly satisfactory to the patrons of the line.

To complete the necessary ferry facilities between San Francisco and Oakland, a large boat is needed for the Creek route—one that will accommodate passengers and teams as well as freight, and enable you to discontinue the team ferriage to Oakland Wharf.

I would mention in this connection, that more ample accommodations for your ferry lines in San Francisco seems an immediate necessity, and a more central location than the one now occupied should, if possible, be secured.

The location is, however, a matter of more importance to the patrons, than the owners of the line, and the advantages of landing at, or in the near vicinity of Market Street Wharf, are so apparent to any one conversant with the map of San Francisco, than any argument in its favor seems unnecessary.

OAKLAND WHARF.

This being the most important structure of the kind on your road, and over which a large daily travel is passing, deserves special mention.

A careful examination of all parts of the structure is made at frequent intervals, but thus far, no repairs have been found necessary, and it is as safe to-day as upon the day of its completion. I will add here, that the same careful supervision is extended over all the structures on the road, it being the aim to keep them up to a first-class standard.

The work charged to construction account during the past year, in addition to that already mentioned, includes a large addition to the south side of Oakland Wharf; an addition to Second Street Wharf, San Francisco, and a large amount of work in Mission Bay, in furtherance of the plan for the improvement of the lands granted by the State to the Central and Southern Pacific Railroad Companies for depot purposes.

The increasing want of space for railroad use in San Francisco will render the rapid improvement of this property, and its early occupancy for your principal freight depot, a necessity. But until something is done towards the improvement of the proposed ship basin in Mission Bay, you will lack the connection with ships tackle, which is requisite for the cheap and speedy handling of freight between ship and car.

Important improvements in, and additions to sidings, freight and passenger depots, shops, water-stations, etc., have also been made.

The change of line at Deep Gulch Trestle, in Clipper Ravine, mentioned in my last report, was completed, and trains run over the new line on the 24th day of July last.

The amount of material moved, was as follows:

	Cubic Yards.
Loose Rock	34,981
Hard "	51,136
Excavation in Tunnel	10,927

Though the rock in the tunnel was all hard, it was so much broken by seams, that timber supports had to be resorted to during construction, and 500 feet in length was lined, requiring 2,185 yards of masonry. There were also 271 cubic yards of culvert masonry.

WATER SUPPLY.

The expenses of this department have been heavier than during the previous year, owing principally to the removal of a large amount of water pipe, (substituting iron for wooden pipe at first used), and to the work expended in boring for water at Hot Springs, 19½ miles east of Wadsworth. Three wells have been sunk—two of them to a depth of about 700 feet, which we were compelled to abandon on account of difficulties arising from the peculiar character of the material encountered. The third attempt was more successful; the boring in this instance being carried to a depth of 1316 feet; through alternating strata of clay, soapstone, scoria and trap, with occasional thin seams of gravel and sandstone.

Several veins of water were found, most of them hot, and highly charged with various salts, and none suitable for engine use. The last vein is, however, much better than the preceding ones, and the formation, which seems to be approaching a sand-stone, is more favorable for finding good water, than that overlying it.

The work has been suspended temporarily, but it is proposed to renew it at an early day.

The success of the Union Pacific Railroad Company in finding water by deep boring at various points on their line, has encouraged the belief that we may be equally successful, and the importance and value of a permanent supply at the principal stations, is thought to be sufficient to warrant considerable expenditures in the way of experiment.

The bridges, buildings, wharves, etc., are all in as good condition as at the date of my last report, all repairs, (as heretofore stated,) having been carefully kept up.

I am pleased to be able to state, that no loss of snow galleries from fire has occurred during the past season. A few fires have caught, but their timely discovery saved serious loss. A large additional quantity of galvanized, corrugated iron has been used in replacing the wooden covering of the snow galleries, and the deck bridges at Long Ravine, Butte Canon, Upper and Lower Cascades, Donner Creek, Prosser Creek, and Little Truckee, have been covered with the same material. The only serious fires during the year were at Pleasanton, on July 26th, and Rocklin, Nov. 27th.

At the former place, the freight and passenger depots, and at the latter, the round house, with the exception of the rear and end walls, were destroyed.

The Pleasanton depot and 18 stalls of the Rocklin round house have been rebuilt; the new roof of the latter being a light combination truss, covered with galvanized corrugated iron, and the building may now be considered fire proof. A fire proof store house, an oil room, and a new water tank of 52,000 gallons capacity, have been erected near the round house at this station.

CONDITION OF THE ROAD.

Under this head, I can refer you to the statement made in my last report. No unusual repairs to road-bed have been required, with the exception of the removal of a heavy slide in the new cutting made in Clipper Ravine.

A larger quantity of material was used in renewal of track than during the previous year. The remainder of the steel rail, noticed in my last report, was laid early in the year, and besides this, a considerable quantity of new iron rail was also laid in main track, and the renewal of a large proportion of the rail on the mountain divisions must soon be provided for.

I will mention in this connection that a contract has been made with the Pacific Rolling Mills Co. for re-rolling five thousand tons of rails, all of which is to be delivered in 1874, and it will all be needed on the main line during the year. The year following a much larger quantity will be required, and after two years an annual renewal of at least twelve per cent. of the iron in main track must be provided for unless steel rail is substituted.

I would again call your attention to the importance of this question, and urge the adoption of steel rails for all lines of heavy traffic as soon as practicable.

I do not believe you can afford to relay your main line with iron rail while the present relative cost to steel is maintained, or even if the latter cost twice as much as the former.

The renewal of the ties on a portion of the line between Truckee and Ogden, where pine and other mountain timber was necessarily used in first construction, is also pressing upon us. This is being done as rapidly as occasion requires; redwood, transported from the coast counties via San Francisco, and the better varieties of mountain timber being used. Except for the cost of transporting them so great distance, the former would be preferable as being the most durable in many localities.

It is a fact worthy of note that wherever the pine ties have been laid in contact with the strong alkaline soil, which occurs in many portions of Nevada and Utah, they are as sound to-day as when first laid; while, in adjacent localities, on a gravelly or sandy road-bed, the ties show unmistakable signs of decay, and in many instances have already required renewal.

This difference in the life of the ties in the different soils is so marked that the propriety of partially removing the gravel ballast from some parts of the road has been seriously considered.

The rainfall in that region is so light that gravel ballasting is a necessity in but a few localities, and there seems to be no reasonable objection to its partial or even entire removal in many places, while the gain by the increased durability of the ties would evidently be very great.

Some experiments are being made of mixing the alkali soil with gravel ballast, and also seasoning the ties by immersion in the strongly alkaline and saline waters, which can be obtained by digging a few feet, in many localities. Some time will, of course, be required to make these experiments, but the results cannot fail to possess much interest, and possibly value.

The effect of the various soils upon the decay of timber has also been noted in the telegraph poles, which are perfectly preserved on alkali flats, while in the sandy and gravelly soil of the uplands they decay rapidly.

I append a statement showing length of road in operation at the close of the year. This, it will be noticed, is less than that reported last year,

The main track taken up during the year was a portion of the Oakland and Alameda branch, running near and almost parallel to the main line from Melrose to Haywards. The business of this portion of the branch having naturally been absorbed by the main line; the operation of the former was no longer essential, and it was accordingly discontinued. The amount of track removed is shown below.

LENGTH OF ROAD OPERATED—MAIN LINE AND BRANCHES—December 31st, 1873.

Main Line:		Miles.
From San Francisco to Ogden		882.89
Branches:		
Oregon Division—from Roseville to Redding	151.45	
Visalia Division—from Lathrop to Goshen	146.30	
Oakland and Alameda Branches:		
From Oakland Wharf to Brooklyn	5 67	
From Oakland Point to Mastick's	3 79	
From Alameda Wharf to Melrose	5.19	
From San Leandro to Haywards	6.10	
San Jose Branch:		
From Niles to San Jose	17.54	
		336 04
Total		1,218.93
Length of road operated, Dec. 31, 1872		1,221.56
Track constructed in 1873		3.79
Total		1,225.35
Deduct track removed from Oakland and Alameda Branch		6.42
Balance as per above statement		1,218.93
Total length of sidings		140.89
Total length, Dec. 31, 1873		1,359.82

S. S. MONTAGUE, Chief Engineer.

Central Pacific Railroad.

LAND AGENT'S REPORT.

LAND DEPART. CENTRAL PACIFIC R. R. Co.
San Francisco, Cal., July 1, 1874.

To the President and Directors of the Central Pacific Railroad Company:

GENTLEMEN: The following report will show the operations and condition of the Land Department of the C. P. R. R. Co. from the commencement of the same, up to the present time, viz:

	Acres.
The land grant from the United States Government to the Central Pacific Railroad Company of 12,800 acres per mile, for 742 miles, is	9,497,600
Deduct for lands previously granted and reserved, say	1,500,000
Leaves	7,997,600
The land grant to the California and Oregon Railroad of 12 800 acres per mile, for 291 miles, is	3,724,800
Total	11,722,400

The grant to the C. and O. R. R. Co. provides that where lands are lost to the company by reason of previous grants or reservations, they can be made good from an indemnity grant of ten miles wide on either side of the twenty mile limit, which insures to the railroad company the full amount of land granted. The value of these lands at the Government minimum price for adjoining lands, $2 50 per acre, would be..... ..... $29,306,000

A large portion of this is the choicest agricultural and timber land in the country, and will sell for a much greater price.

The policy of the company has been to sell its farming lands at low prices, and on easy terms of payment, to actual settlers, believing the best interests of the company are promoted by selling in limited quantities to those who will cultivate the soil, and who will own the land they cultivate. By this means an industrious, agricultural population is invited, whose improvements and the product of whose labor, tend to enhance the value of the unsold lands.

Most of the lands that have been sold were purchased for gold, on a credit of five years; a payment of twenty per cent being made at the time of purchase, the remainder to be paid at the end of the term, with annual interest, payable in advance, on all sums remaining due.

The total sales of land by this department from its organization to June 30th, 1874, amount to 353,818.78 acres, which were disposed of for $1,459,768 38, being an average of a little more than $4 12½ per acre.

Of these lands, there were sold previous to October 1st, 1870, 127,637.55 acres, for $295,065 50, being an average of $2 31 per acre.

From October 1, 1870, to December 31, 1872, there were sold 122,765.09 acres, for $484,227 97, being an average of $3 94½ per acre.

From December 31, 1872, to December 31, 1873, there were sold 58,733.60 acres, for $410,314 92, being an average of $7 00 per acre.

From December 31, 1873, to June 30, 1874, there were sold 44,682 49 acres, for $270,159 99, being an average of $6 04.6 per acre.

That the average price of the lands sold in 1874, seems to be less than that of 1873, is attributable to the fact that large tracts of second and third rate timber land have been sold this year. The prices obtained for these timber lands are far in advance of any that could have been got for them one year ago; but while they have been sold for an increased price, the quantity disposed of has been so large, that the average rate per acre, thus far, for 1874, has been, apparently, reduced.

These sales were made to 1,619 individual purchasers, being an average of 218.54½ acres to each buyer.

It will be seen by the foregoing, that the amounts realized from the sales of land, continue to increase year by year. Prices advance as the country becomes settled, and with the rapid augmentation of the population, which California will undoubtedly have every year, lands will greatly and with rapidity, still further enhance in value.

This Land Department is daily in receipt of letters from the Eastern States and from Europe, making inquiries about lands, the prices at which they can be procured, and the products which can be raised from them. The writers of almost all these letters avow a fixed determination to come to California for the purpose of procuring lands for homes, for themselves or for colonies of farmers and mechanics, who wish to leave the rigors of winter in Michigan, Iowa, Illinois, Wisconsin and other Northern States, for a more genial climate. Many agriculturists from the Southern States, in Louisiana and elsewhere, say they are coming to California to remain permanently. There are, also, letters from England, Ireland, Scotland and Wales, and from Australia, asking all manner of questions about railroad and other lands in this State. Everything tends to show that the wheat, the wine, the fruit and the wool of California, together with its fine climate and the productiveness of its soil, have attracted to it the attention of the world.

Heretofore, the stream of immigration has been but small. It has at last wonderfully increased. Within the last three months, twelve thousand farmers and mechanics, seeking homes, have come to California. This small stream will, in a few years, turn into a mighty current of people, who will pour in and fill up every available tract in the country, making land of great value, and requiring large and abundant railroad facilities for travel and for commercial and agricultural transportation.

The lands of the Central Pacific Railroad Company may justly be regarded as one of its most valuable assets,

B. B. REDDING, Land Agent.

Portsmouth and Dover Railroad.

At the annual meeting of the stockholders of this company, held at Portsmouth, N. H., on the 12th inst., the following gentlemen were elected directors: Frank Jones, Daniel Marcy, F. W. Miller, Wm. Hays, Oliver Wyatt, A. H. Young and A. E. Purinton. At a subsequent meeting of the directors, Frank Jones was elected President, and Wm. Hackett clerk. The report of the Treasurer was read, showing the total cost of the road to date to have been $745,660; stock taken by the cities of Portsmouth and Dover amount to $525,000; that subscribed for by individuals amounts to $151,860; outstanding notes payable $68,800; unpaid bills, including land damages, about $200,000. The recent act of the Legislature authorizing an increase of the capital stock of the road to an amount not exceeding $100,000 was accepted and adopted, thus making the whole amount of stock $800,000.

Rocky Mountain Coal Fields.

The following statement will indicate the general locality of the Rocky Mountain coal field, and is from reports made to the Government Land Office:

	Area, Sq. miles.	Coal area, Sq. miles.
Texas	237,000	30,000
Indian Territory	68,000	40,000
New Mexico	122,000	20,000
Kansas	80,000	80,000
Missouri	67,000	24,000
Nebraska	84,000	84,000
Iowa	55,000	24,000
Wyoming	67,000	20,000
Colorado	102,000	20,000
Montana	148,000	71,000
Dakota	150,000	100,000
Total	1,180,000	513,000
Add approximate Coal area of Britih America		737,000
Total		1,250,000

☞ The Amador *Dispatch* says an agreement, or contract, has just been placed on record in the County Clerk's office, between H. B. Platt, contractor of the Stockton and Ione Railroad Company, and the Arroyo Seco Grant Company, whereby the latter agree to donate to the railroad company the right of way through their possessions and twenty-five acres of land near Ione City for depot purposes, together with the privilege of mining and hauling coal from the coal beds on the grant for a number of years. On the other hand, Mr. Platt agrees to pay the grant company 50 cents per ton for a specified amount of coal so taken out each year, and to finish the road to Ione within two years from the time work was commenced on the same.

☞ The Richmond *Enquirer* says that Major Conway R. Howard, late division engineer on the Chesapeake and Ohio railroad, has been directed by Col. H. D. Whitcomb, formerly chief engineer of the same road, but now in the employment of the United States government, to begin a reconnoissance of the country between Clifton Forge, Allegany county, and Lynchburg, with a view to ascertain its practical adaptation to the purposes of a double track freight railway. The government wishes to ascertain, by comparison, the value to the country of such double track freight railway and the James River and Kanawha canal,

RAILROAD EARNINGS—MONTHLY.

American Railroad Journal.

Saturday, August 22, 1874.

Stock Exchange and Money Market

Money has been in moderately active demand, but the very liberal offerings of capital have kept the market quite easy for all responsible borrowers on the basis of 2@3 per cent on call, and 5@7 per cent per annum, in the discount line. The speculative inquiry for accommodation was somewhat brisker toward the close, but was promptly met by lenders. And the better grades of mercantile paper were in more request within the range. Some time loans have been made to prominent Street houses on very advantageous terms for the borrowers. The City Banks have been reducing their leading averages, in good part, through preparations on the part of the commercial classes, for the Fall trade. The Government office in this city enlarged its specie and currency reserves; the former quite liberally. The City banks, last week, reduced their deposit and their specie averages materially, while again contracting their loan and discount line. They augmented their reserve of legal tender slightly, while also enlarging their item of circulation. The U. S. Sub-Treasury again increased both its currency and specie reserves. The City banks, last week, while increasing their reserve of legal tender notes $28,600, reduced their deposit item $4,346,100, and their specie average $3,388,000. They also report a decrease of $1,284,100 in the loans and discounts, and added $3,400 to the circulation. The U. S. Sub-Treasury in this city closed the week with a currency balance of $59,899,721, against $59,109,277 the preceding week; and a coin hoard of $51,716,376, against $50,294,683 on the previous return. The City bank exchanges, during the week, were $301,191,647, or a daily average of $50,198,608. The customs revenue of the port, during the week, was $2,745,000. The City banks reported their average of gold last week at $22,352,000, and their greenback average at $66,578,100. Their deposits stood at $237,915,500. The loan item was $279,250,200. The circulation was $25,809,100.

The outstanding amount of legal tender notes is now definitely established by law at 382 millions. The National bank circulation is over 350 millions.

The income of the Government, from internal evenues, thus far, in the current fiscal year, commencing with July 1, 1874, has been over 13 millions.

The Treasury balances at the opening of business on Wednesday were as follows: currency, $15,515,153; special deposit of legal tenders for the redemption of certificates of deposit, $60,045,000; coin, $70,292,146, including $31,904,000 in coin certificates; outstanding legal tenders, $382,000,000.

The Gold movement has been comparatively tame, since our last. The speculative dealings have been on a restricted scale. The customs call has been fair; while the export drain has been of less magnitude. Prices have not varied materially. The extremes of the price have been 109⅜@119¾, closing at 109⅝, as against 109⅝ on Wednesday of the preceding week. The specie outflow, last week, was $2,032,733. The imports of specie at this port since Jan. 1, have been $2,495,967, against $2,176,151 same time last year. The customs demand for Gold last week averaged $457,500 a day. Foreign Exchange has been quite moderately sought after. Bankers' sixty day bills on London closed on Wednesday at $4 87½@$4 88½; sight bills on London at @4 90@$4 91 to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $5,496,733.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $5,252,836.

Government securities have been in more confident demand chiefly on investment account, and the restricted offerings of the more popular issues have tended to stiffen values. U. S sixes of 1881 closed on Wednesday of this week at 118¼@118½; U. S. Five-Twenties of 1862, 112@112¼; U. S. Five-Twenties of 1864 at 115¾@116; U. S. Five-Twenties of 1865, 117@117¼; U. S. Five-Twenties of 1865 consolidated, 116¼@116½; U. S. Five Twenties of 1867, 117⅝@117¾; U. S. Five-Twenties of 1868, 117⅞@118; U. S. Ten-forties at 113¾@114; U. S. Fives of 1881, (Funding Loan) 112@112¼; Six per cent. currency Sixes from 117½@118.

State and Railway bonds have been generally

dull, yet quoted steady. Railway and miscellaneous share property has been more freely dealt in, especially toward the close, on a firmer and buoyant market.

General business has been more satisfactory as to amount, in the domestic produce lines, though, in instances, less so as to values. The Breadstuffs and Cotton movements have been fair. Provisions Petroleum, Naval Stores, and Tobacco, tamer. Wool, in good demand. Foreign merchandise has been more sought after as a rule. The Metal trade has been exceptionally dull in the local market, no important dealings having been reported in Iron. Eglinton Pig Iron quoted at 32 75@33 50; Glengarnock, $35; Sumerlee, $36; No. 1 American Pig at $31@$32, No. 2 do. at $27 @$29; Forge, $25@$27; English Rails at $50@ $52, gold; American Rails at works, 57 50@$62 50; Old Rails, $34@$38. Wrought Scrap, $35 @$37 50. Sales have been made of 450,000 lbs. Ingot Copper at 19¼. Ocean freights, have been more active, and quoted stronger toward the close.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Union Pacific Railroad.

The earnings of the Union Pacific Railroad for June, 1874, were $902,881 48, the expenses $408,418 52, and the net earnings $494,462 96. In June, 1873, the earnings were $969,863 68, the expenses $417,118 04, and the net earnings $552,745 64—showing a decrease in earnings of $66,982 20, with a decrease in expenses of $8,699 52, making a decrease in net earnings of $58,282 68. For the six months ending June 30, 1874, the earnings were $4,563,632 77, the expenses $2,422,102 72, and the net earnings were $2,141,530 05—showing a decrease in earnings, as compared with corresponding period of the previous year, of $19,343,50, with an increase in expenses of $69,187 89, making a decrease in net earnings of $88,531 39. The decrease of $88,531 39 in net earnings is on account of extra expenditures in filling up trestle bridges, which work will be completed within the next thirty days.

☞ The gross earnings of the Central Pacific Railroad for the six months ending June 30, 1874, were: coin, $3,478, 255 76; currency, $2,439,341 95—total, coin and currency, $5,917,597 71. During the same time the operating expenses were: coin, $2,404,068 34; currency, $18,287 66—total coin and currency, $2,422,356; leaving earnings over operating expenses $3,495,241 71. For the six months ending June 30, 1873, the total gross earnings, in coin and currency, were $5,772,495 59, the operating expenses $2,573,933 86, and the earnings over operating expenses $3,198,561 73—showing an increase in gross earnings of $145,102 12, with a decrease in expenses of $151,577 86, making the increase in earnings over operating expenses $296,679 98.

☞ The Flint and Pere Marquette Railroad Company have completed the first ten miles of their road west of Reed City, Michigan, where the work was suspended for want of rails. Only 30 miles now intervene between the terminus of the road and Ludington.

Virginia State Finances.

The Richmond correspondent of the Petersburg *News* says that the Governor of Virginia is in correspondence with the English bondholders regarding the public debt, paying of interest, &c.; and to be informed as to the resources and indebtedness of the people he has sent out circulars to clerks of courts inquiring the number and extent of sales and offers under judgments and executions. The bondholders complain that the present rate of taxation does not raise enough money to pay the interest upon the public debt, because Virginia has put down her assessments, but the Governor thinks he can show that in all sections of the State lands have been offered for sale by the courts on long credits, and have found no purchasers because they failed to bring three-fourths of their assessed value, as required by law. The correspondent adds:

"I do not know whether the information he is thus obtaining is preliminary to the conference with the bondholders provided for by law so far as the State is concerned, or is to be used in his annual message or otherwise. Certainly it will afford an insight into our affairs that we have never had. Whether it will increase immigration to Virginia or not remains to be seen."

☞ The earnings of the Indianapolis, Cincinnati and Lafayette Railroad for June, 1874, were $142,560, the expenses $87,015, and the net earnings $55,545; for the month of June, 1873, the earnings were $160,456, the expenses $130,060, and the net earnings $30,396. For the six months ending June 30, 1874, the earnings were $871,310, the expenses $569,777, and the net earnings $301,533; for the six months ending June 30, 1873, the earnings were $903,494, the expenses $741,103, and the net earnings $162,391. For the year ending June 30, 1874, the earnings were $1,859,076, the expenses $1,207,562, and the net earnings $651,414.

☞ The St. John *News* says that the contractors for the Albert Railway are making good progress with the work. Messrs. Gray & Wheaton at the Salisbury end, advertise for more men, as do also Messrs. McManus at the Hopewell end, but large forces are at work at both places, and the work of grading is making rapid progress. Mr. McDonald is succeeding well with the bridge across the river at Salisbury, and altogether the people may congratulate themselves on the prospect of the early completion of the road.

☞ The Atchison, Topeka and Santa Fe Railway will soon be extended to Pueblo, Col. The line locally known as the Pueblo and Salt Lake Railroad is now under contract and will be rapidly built eastward, to connect with the Atchison, Topeka and Santa Fe to Grenada, the present terminus of the latter road. This will make a continuous line of railway under one direction, from the Missouri River, at Atchison, to the foot of the Rocky Mountains.

☞ It is stated that the Pennsylvania Railroad Company have ordered a survey for a road to connect with the Newtown Railroad at Fox Chase, and to run as near a direct line as possible to connect with the Philadelphia and Trenton Railroad between Tyburn and Morrisville. This line will avoid Frankford, Bridesburg, Bristol, &c.

The Freight Business of the Pacific Railroads.

The San Francisco *Bulletin* publishes the following returns of freight forwarded to the Atlantic States over the Central Pacific and Union Pacific Railroads during the first half of the current year. The increase is 100 per cent. greater than the corresponding period of the two previous years, which is chiefly due to the shipments of barley and malt, new features in the operation of the roads. The movement in rice, sugar and syrup is also comparatively new. The prominent articles shipped within the period mentioned are as follows:

	Pounds.		Pounds.
Barley	19,067,200	Borax	819,300
Butter	270,700	Coffee	570,000
Dried Fruit	740,600	Fish, Salm'n	1,366,100
Glue	151,100	Hides	252,000
Hops	37,400	Leather	578,700
Malt	1,608,500	Powder	202,900
Quicksilver	196,700	Rice	238,800
Ripe Fruit	33,100	Silk	214,900
Sugar	40,000	Syrup	909,609
Tea	5,251,400	Wine	2,340,000
Wool	18,319,800	Merchandise	6,087,500
Total			59,121,200

In addition, over 6,000,000 lbs. of freight has been shipped direct to the East from prominent points in the interior, including 1,718,000 lbs. barley, 47,600 lbs. canned goods, 20,200 lbs. flour, 22,800 lbs. quicksilver and 23,800 lbs. California tobacco from San Jose; 18,00 lbs. leather and 92,000 lbs. wine from Stockton; 894,000 lbs. wool, 217,000 lbs. wine, 102,600 lbs. salmon, 304,000 lbs. malt, 269,500 lbs. barley, 120,000 lbs. flour and 105,760 lbs. fruit from Sacramento, and 1,000,009 lbs. barley and 109,000 lbs. hides from Marysville. The total shipments East from San Francisco and the interior aggregate 65,372,200 lbs, an increase of 39,000,000 lbs as compared with the same time last year. Included in the total is 22,000,000 lbs. barley, 1,922,000 lbs. malt, and 19,214,000 lbs. wool. It is difficult to determine the value of this trade, since there is no accessible record of the invoice cost of the shipments, and no means of ascertaining even an approximate value of the unspecified merchandise forwarded. It is probably safe to put down the value of this freight at $5,000,000, though a good portion of this sum is simply for merchandise in transit. It is noteworthy that the tea shipments are nearly 100 per cent larger than the average for the two previous years, notwithstanding the rupture between the railroad and steamship company.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending August 8, at 435,575 tons, and for the coal year 11,314,540 tons against 12,034,603 tons to corresponding time last year, being a decrease of 720,063 tons. The bituminous tonnage for the week is 72,371 tons, and for the year 1,742,680 tons, against 1,882,064, tons to same time last year, giving a total of all kinds for the week of 507,946 tons, and for the year of 13,157,220 tons, against 13,898,687 tons to same time last year, being a decrease of 742,467 tons.

☞ The Secretary of the Treasury has decided that pig lead imported from and after the 22d of June, 1874, is entitled to the reduction of ten per cent off the duties, under the provision in section 2,503 of the revised statutes of 1874.

☞ The net earnings of the Welland Railway of Canada for the year were £9,298; being equal to interest at 6 per cent. on £154,108, a result far above any previous season.

☞ In reply to an interrogatory by the Secretary of the Treasury, the acting Attorney General has decided that a railroad existing, in contemplation, or unfinished, is defined and identified by its track and termini. If, therefore, a land grant has been made to a company to aid it in constructing, in whole or in part, a road between certain termini, upon condition that it shall lie between the termini mentioned, no more or less, any subsequent change of termini will not affect the original application of the condition.

☞ During the season of 1873-'74, ending May 1st, there were exported from Japan to foreign markets 19,864,333 pounds of tea, of which 12,446,916 pounds were exported from Yokohama, all of which, except 4,500,000 pounds left that port on steamers bound for San Francisco. Most of the remainder was shipped by sailing vessels to New York. Nearly all the tea raised in Japan is taken by American consumers. The British patronise China and India almost exclusively for their teas.

☞ We notice heavy shipments of tobacco abroad from Richmond, Va. One firm is said to be filling an order from France for $8,000,000 worth, while another has a contract with Austria, amounting to $6,000,000, which is now being executed.

☞ The Central Pacific Railroad Company has declared a dividend of 5 per cent gold on its capital stock, payable on the 15th instant, on the presentation and surrender of dividend warrant No. 2. This dividend is out of the net earnings for ten months ending June 30, 1874.

☞ The Lowell and Andover Railroad Company began work on their bridge across the Concord river on the 17th inst. It is the last important job on the route. The first trip over the line is expected to be made October 1.

☞ Franklin Fairbanks, J. D. Bell, G. W. Hendee, W. Brigham, O. Buck, R S. Reed, D. D. Wead, A. B. Jewett, G. Abel, D. W. Aiken, and J. H. George, have been elected directors of the Lamoille Valley Railroad Company.

☞ In the construction of the railroad from Attleboro', Penn,, to Bristol, it has been agreed to select the route which passes through Hulmeville, Knights' Hollow.

☞ The Portland and Ogdensburg Railroad have commenced running three miles above upper Bartlett, giving half an hour more time at the Crawford House.

☞ The tolls received on all the canals of the State of New York up to August 8, 1874, amounted to $1,339,071, against $1,259,994 for the same period in 1873, an increase of $79,077.

☞ The vintage of California this season will, it is estimated, amount to 10,000,000 gallons, against 4,000,000 in 1873 and 2,500,000 in 1872.

☞ The indebtedness of San Francisco, Cal., amounts to $3,204,500, with a sinking fund to its credit of $115,000.

☞ Boston, Mass., has a debt of $42,735,785, which is partly provided for by the sinking funds which amount to $14,264,451.

Coal and Iron in California.

No country has ever yet in our day, attained to commercial greatness that has not been able to boast of large and easily accessible deposits of Coal and Iron. This is emphatically the Iron Age; we have Iron horses, stores, and churches, Iron ships—in short almost every article of convenience or utility is made of Iron or Steel, from the ponderous anchor to the bright Damascus blade. And the complement of Iron is Coal, for without the latter in large quantities, Iron Ore can only be smelted, reduced, and manufactured so long as the original forests of the land hold out. And of how short a time it will take to get rid of them an idea may be formed, when it is known that already the cry is being raised east of the Rocky Mountains, that the great forests of Canada, the Atlantic slope, and the Lake region are giving signs of being exhausted, before many years have elapsed.

The same thing must also happen on the Pacific Coast sooner or later, and then if we have not Coal to fall back on, to supply fuel for our manufacturing needs, we must give up all hopes of being a manufacturing people. To import Coal for this purpose cannot, save in exceptional cases, be even dreamed of. It is therefore with pleasure that we learn of the discovery of vast Coal deposits on the line of the Ione Railroad, connecting that place with the city of Stockton, and of the existence of Iron deposits in the same direction.

The Stockton papers are in ecstacies over the future which these discoveries open out for that prosperous and rapidly growing city. Speaking of them the *Independent* says:

"The supply of Coal on the above named grant is practically inexhaustible. It has been struck at different points for a distance of seven miles, and at one place the vein is nearly half a mile wide. At the point near Ione, where Coal is now being mined to supply the flour mill at Ione city and several quartz mills in the vicinity of Sutter Creek, the vein is on an average ten feet in thickness, and its limit has not yet been ascertained, although tunnels several hundred feet in length have been run in different directions to ascertain the size of the deposit. At this place it is estimated that the vein extends through a number of acres, and that there are at least ten thousand tons to each acre.

* * * * *

"It is feasible to construct a branch road from Linden via the Calaveras river and its branches to the Big Trees of Calaveras county, which undoubtedly would be one of the most profitable roads that could be built in the State, as it would tap one of the most extensive timber regions in California, pass in close proximity to the most valuable deposits of Iron Ore on the coast, and aid in the rapid development of a large region of country that abounds in valuable resources that would be rendered available as soon as the road is constructed."

If the figures given above are thoroughly reliable, it would indicate the existence of a Coal bed containing 22,400,000 tons, a quantity equal to the requirements of the coast for forty four years, with a population equalling the present. We may be sure, however, that this is not the only deposit that could be made easily accessible by the construction of a good railroad, and that other deposits of Iron Ore of equal importance will be discovered. Should this be the case, a great manufacturing future would be opened out before us.

Let good Coal for manufacturing purposes be laid down in San Francisco at $4 to $5 per ton, and let Pig Iron be laid down at $20 to $25 per ton, and our industrial millenium would have come. We would then not only be able to drive Eastern and English manufacturers of Hardware and Agricultural Implements out of our markets, but we could also compete with them in the markets of Mexico, South America, Australia, the Dutch and Spanish East Indies, and China and Japan, that is as soon as it became known that the trade marks of our manufacturers covered goods of acknowledged excellence. Cheap Coal, too, would enable us to carry on successfully many other branches of manufacture that we cannot now even dream of.—*San Francisco Journal of Commerce.*

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley left at tide-water from the commencement of navigation to the 31st July, inclusive, during the years 1873 and 1874, was as follows:

	Flour, bbls.	Wheat, bushels.	Corn, bushels.	Barley, bushels.
1873	57,700	6,804,400	5,127,000	22,200
1874	32,400	11,029,900	8,440,000	74,100
Dec.	25,300	*4,225,500	*3,313,400	*51,900

* Increase.

By reducing the wheat to flour the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows an increase equal to 819,800 bbls. of flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of July, in the years indicated:

	1872.	1873.	1874.
Canal opened—	May 13.	May 15.	May 5.
Flour, bbls.	47,100	57,700	32,400
Wheat, bush	2,951,000	6,804,400	11,029,900
Corn, bush.	11,458,900	5,127,000	8,440,400
Barley, bush	401,500	22,200	74,100
Rye, bush	245,800	550,400	189,800
Oats, bush.	3,165,100	1,672,400	1,214,400
Malt, bush.	447,900	313,400	308,700
Feed, lbs	3,296,700	3,362,200	181,500

☞ The new railroad line from Philadelphia to New York, through the lower end of Bucks county, is under the control of the North Pennsylvania Railroad Company from Philadelphia to Bound Brook, New Jersey. The road will be built from the main line at Jenkintown to the middle of the Delaware river, below Yardleyville by the direct action of that company, under its charter. From the middle of the Delaware to Bound Brook it will be built by the "Delaware and Bound Brook Railroad Company," formed under the general railroad law of New Jersey, with a fully subscribed capital of $1,000,000. It is stated that work will be commenced upon this line in a very short time.

☞ A company has been organized under the laws of Oregon, having its principal business office in Corvallis, for the purpose of constructing a narrow-gauge railroad from Corvallis to the navigable waters of Yaquina Bay, to connect there with ocean steamers and sail vessels.

☞ The Governor of the Cape of Good Hope, on the recent opening of Parliament, stated that the revenue of the colony was annually increasing, and that about 800 miles of railway will at once be built, at a cost of from £4,000,000 to £5,000,000.

☞ The imports at the Port of St. John, N. B., for the month ending July 31st, 1874, was $501,003, against $413,401 for July, 1873; and the exports were $688,319, against $508,133 for the corresponding month of 1873.

☞ The traffic of the Midland Railway of Canada for the year to July 31, 1874, was $177,417 99; year previous, $184,658 22—decrease, $7,140 23.

☞ The yield of wheat in Nebraska, in 1869, was but 148,867 bushels, while in 1873 it amounted to 3,000,000 bushels, notwithstanding the fact that it was an unfavorable year for agriculture. Nebraska wheat, though not so good as the wheat of California, is of excellent quality, and averages fair prices in the markets of St. Louis and Chicago.

OFFICE CENTRAL PACIFIC RAILROAD COMPANY, No. 9 NASSAU-ST., NEW-YORK, Aug. 14, 1874.

THE BOARD OF DIRECTORS OF THE CENtral Pacific Railroad Company have declared a Dividend of Five per Cent., gold, on its capital stock, payable on the 15th inst., on the presentation and surrender of dividend warrant No. 2, said dividend being for ten months ending June 30, 1874. Eastern shareholders can collect their dividend at the above office.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H Haswell

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company.

American Railroad Journal.

New York, Saturday, August 29, 1874.

Union Pacific Railroad.

The Land Department of the Union Pacific Railroad Company reports the sales of land for the month of July, 1874, at 22,005.54 acres for $100,568 07, or an average price per acre of $4 57. The total sales to July 31, 1874, have been 1,035,784.00 acres, for $4,719,367 79, or an average price per acre of $4 55. The lands belonging to the company remaining unsold, now amount to 11,044,315.10 acres.

Land grant bonds issued	$10,400,000
Less bonds cancelled by land department	$1,574,000
Less bonds cancelled by trustees	731,000
	2,305,000
Leaving bonds outstanding July 31, 1874	$8,095,000 00
Land notes on hand, July 31, 1874 —principal (interest not included)	$2,675,719 59
Cash in hands of trustees for the purchase of land grant bonds, July 31, 1874	$34,203 38

Horse-Car Railroads of San Francisco.

Annexed will be found full and most interesting statistics relative to the ten main street-car lines of San Francisco and their six branches—the cars and horses they own, the total length of their main and branch lines, the total number of passengers carried by each in 1873, and the gross earnings of each of the companies during that year. We also append the grand totals for 1872 -'3:

	No. of horses.	No. of cars used.	Total length in miles.	Passengers carried in 1873.	Gross earnings for 1873.
Omnibus (2 main, 1 branch)	280	30	6½	4,670,000	$233,500
N. B. and Miss'n (2 main)	250	36	6	4,274,702	213,735
Central (2 main lines)	215	22	5	2,670,162	171,610
Sutter-st. (1 main, 3 branches)	180	19	8¼	1,750,000	118,750
City (W'wds, 1 main, 1 branch)	200	26	4	8,500,000	180,000
Market-st. (1 main, 1 branch)	209	23	6⅔	2,786,965	130,253
Potrero and Bay View (1 main)	58	9	8¼	537,578	33,984
Clay-st. Hill (1 main)	22	10	2⅔	no returns	received.
Grand totals for 1872	1,391	163	40½	18,801,574	985,812
Grand totals for 1873	1,414	169	41⅙	20,189,397	$996,832

The street-car lines of San Francisco have never been very profitable to their builders, but they are monthly becoming more valuable, as the suburbs become filled with population. In a few years they will rank among the most profitable, as they are already among the safest local securities. The length of 41⅙ miles does not include the double tracks, but is based on the actual distance only over which the roads extend.

☞ The Wells and Mankato (Minn.) railroad, forty miles long, will be completed October 1st.

Land Grants to Railroads.

The following statement, prepared by the Congressional Committee, from the books of the General Land office at Washington, shows the number of acres of land granted to railroads which have reverted to the Government under the conditions of their grant and the recent decision of the Attorney General. The lands will soon be again opened for settlement. They are distributed as follows:

	Miles.	Acres.
Jacksonville, Pensacola and Florida R. R.	160	600,000
Pensacola and Louisville R. R.	43	165,000
Alabama and Florida R. R.	150	374,000
Coosa and Tennessee R. R.	37	67,784
Mobile and Girard R. R.	140	800,000
North Louisiana and Texas R. R.	90	250,000
St. Croix and Lake Superior R. R.	220	1,186,000
Jackson, Lansing and Saginaw R.R.	50	180,000
Total	888	3,106,784

It has long been held that lands that have once been granted to railroads could not revert to the national domain except by some subsequent legislation of Congress. This opinion was held by Joseph Wilson, the late Commissioner of the Land Office, and has not been reversed until within a few days, when Attorney General Williams, in response to an inquiry of the Secretary of the Interior, decided that subsequent action of Congress was not necessary, and that original grants were to be interpreted in accordance with the real intent of Congress, and not by the principle of the common law as to conditions subsequent.

Russian Railways.

On the 1st of January, 1874, the Russian Railway system comprised a total length of 15,842 versts, of which 5,262 versts were State owned lines; 651 versts are in Finland. These figures refer only to lines already fully completed and worked; 1,740 versts more are in progress of construction, and 2 348 versts are projected. Of the 50 railway companies existing in the empire, only 10 have constructed their lines altogether without government assistance; the remaining 40 are guaranteed—20 to the full amount of their capital, the other 20 only to a partial extent. The entire sum annually guaranteed by the State in the shape of interest and repayment of capital

amounts to 51,177,627 roubles. In 1873 14,592,172 roubles, being 78.52 per cent of the sum total, were actually paid out of the exchequer. The charters granted to railway companies are for the most part terminable after between 75 and 85 years. Some small companies have charters only for 37 years.

Mobile and Ohio Railroad.

The following is a comparative statement of the earnings and expenses of the Mobile and Ohio Railroad for the fiscal years ending December 31, 1872 and 1873:

Earnings:	1872.	1873.
From freight.....	$2,089,681 25	$2,074,794 84
" passengers.....	734,970 39	596,605 14
" express.....	67,150 00	68,000 00
" mail.....	60,705 95	61,727 40
	$2,952,507 59	$2,801,127 38
Expenses:		
Repairs of roadway..	$574,768 35	$514,247 85
Repairs of machinery.	522,211 34	522,037 21
Conducting transp...	792,076 92	820,378 47
Bureau expenses.....	41,162 57	39,600 86
	$1,930,219 18	$1,896,264 39
Net earnings....	$1,022,288 41	$904,862 99

Compared with the year 1872 the gross earnings of 1873 show a decrease of $151 380 21, with a decrease in expenses of $33,954 79, making a decrease in the net earnings of $117,425 42. The President in his report presented at the annual meeting of the stockholders held in Mobile on the 21st of April, 1874, says:

The receipts for 1873 were less than for 1872 by $151,380 21, of which $96,622 82 was in passengers alone during the panic months. During the first eight months of the year under review the business had steadily increased, and the prospects for the remaining four months were cheering. But on the 18th of September the most destructive financial storm burst upon the country ever known in its history. The development was first announced by the failure of two large banking houses in New York that were agents of the government, and had thereby an endorsement that gave to the market confidence in their strength.

The sudden shock thus given to public confidence was followed by the wildest excitement at all the money centres, even the banks presenting the anomalous spectacle of inability to continue—not specie—but currency payments. As might be expected, the business of the country was at once paralyzed, and even now, after seven months, is but slowly recovering itself. Acting upon the experience of the mariner who, when overtaken by storms, "takes in sail," your Directors at once set about the reduction of expenses in all departments by curtailment of forces and wages, confining all expenditures to what was only of absolute necessity for the protection of the property and the efficient operation of the road. By means of this it is believed that your net earnings will, for the present year, equal, if not exceed those of former years, while the economy being practiced by the people, added to the great stimulus forced by necessity in the direction of productive industry will, in the end, restore the country to a prosperity in which you are largely to participate.

The proposition for issuance of new stock submitted by your authority at the last meeting, was sanctioned by a vote approaching to unanimity, and was responded to by a large majority of the holders by payment of first installment of five dollars per share on first of July last, but the disastrous storm that followed prevented the larger number from completing the payments, thus leaving the company with an amount of untaken stock which necessity required should be utilized, to accomplish which, bonds of the company were issued, convertible into stock, at the pleasure of the holder, at the same price at which it had been forfeited to the company—all shareholders having been allowed stock to the full extent of payment made.

Under the advice of the best financial minds, your Directors have issued a consolidated mortgage bond for fifteen millions of dollars, depositing with trustees for the protection of bonds issued under former mortgages, twelve and one-half millions, and leaving the company with two and one-half millions unappropriated, and which may be hereafter used by our successors in the discharge of liabilities and the improvement of the property.

The condition of the roadway and rolling stock as exhibited in the report of the Chief Engineer and General Superintendent, will be found very satisfactory. The regularity with which trains have been run and the continued exemption from serious accidents, is just cause for congratulation, and more especially so in a season of unprecedented rains, when nearly all the roads in this region have been seriously injured by freshets, from which yours has been exempt, showing conclusively that your line was not only judiciously located, but substantially built.

The Okibbeha Branch has been completed, a distance of 4½ miles west of Artesia, and trains are now running over it daily; a contract has been made for grading the remaining distance to the town of Starkville, payable in the bonds of that county and town. The interest on these bonds has been promptly paid, and the bonds maturing in July next have been paid in advance of their maturity. The people of that county are deserving more than a passing notice, as they have, in a season of unprecedented pressure, and while laboring under an onerous tax, promptly met their engagements in full. You can safely rely that such a people are in earnest in seeking connection with your main line, and are possessed of resources that promise a profitable traffic with you.

There is a steady increase in manufacturing and mechanical enterprises along the line, which promise you not only a more diversified traffic, but a continuous one throughout the year.

The enquiry for lands has been for some months past on a much larger scale than heretofore known. The lumber men of the East and West are looking with eager eyes to your rich pine forests, while agriculturists of the colder regions are seeking a location in a more friendly climate. The sale and settlement of your lands looks promising, and nothing can be more desirable for your company, as it not only brings money in the treasury from its sale, but locates a permanent producer on your road, who is to aid for all time to come in swelling the volume of your business.

But little progress has been made since your last meeting with roads that proposed to connect with you. The financial storm had the immediate effect of stopping all new enterprises, and the time is probably distant when they will be able to resume work, as the men of capital are impressed with the belief that railway enterprises have been multiplied beyond the necessities of commerce, while they fear hostile legislation, either by the general or State government, that may affect the earning power and threaten the safety of their investments.

The floating debt, which in times such as we have experienced the past few months, becomes extremely embarrassing, is being steadily reduced by the economic plan adopted of suspending improvements and reducing all expenses possible. The policy of your Directors is to retire it at the earliest possible moment, and their efforts are being specially directed to that end.

The road is 472 miles in length, extending from Mobile, Ala., to Columbus, Ky., with branches from Narkeeta, Miss., to Gainesville, Ala., 21.5 miles, from Muldon, Miss., to Aberdeen, Miss., 9.5 miles, from Columbus, Miss., to Artesia, Miss., 14.5 miles, and from Artesia to Starkville, Miss., 11 miles—making a total of 528.5 miles owned and operated by the company, of which 56.5 miles are branches. There are also 47.5 miles of sidings and other tracks.

The cost of repairing each mile of road, including ballasting and new rails, in 1873, was $794 15; repairing bridges and trestle work, $122 26—total, $916 41, against $1,057 89 in 1872. During the year 24.5 miles of new iron, with fastenings, 232,005 cross-ties, 218,795 new fish-bar bolts, and a large number of spikes were used in repairs.

There were 93 engines in actual use in 1873, of which 5 were new Baldwin engines, purchased in January of that year.

The rolling stock consists of 37 passenger, 1 sleeping, 11 baggage and mail, 6 express, 678 box freight, 290 platform and 38 stock cars.

The service and performance of the locomotives during the year is as follows: on passenger trains, 549,636; on freight trains, 676,626; on gravel trains, 177,114; switching trains, 112,645—total, 1,507,021—a decrease, compared with the previous year of 114,460.

The earnings per mile of road were: from passengers, $1,156; from freight, $4,021; from mail and express, $251—total, $5,428, against $5,720 in 1872.

The number of passengers carried was 322,717; do. carried one mile, 14,183,438. Tons of freight carried, 347,588; do. carried one mile, 54,201,544. Decrease in number of passenger, 76,767; and in mileage of do., 2,129,080. Decrease in tons carried, 26,943; and in mileage of do., 1,197,758. Number of bales of cotton moved, 206,286, against 184,676 in 1872. The Superintendent, in his report, says:

An additional wire has been erected between Corinth and Jackson, Tenn., which has completed the necessary facilities for this all important branch of the service over the entire line. By its instrumentality, the rolling stock which would otherwise have been entirely inadequate was made to approximate the demands upon it, even in the busy season, and in the following manner:

The road is divided into five freight divisions, each run separately. As far as practicable, trains are made up into local and through freights for each division. These "locals" are run on schedule time, stopping at all stations for the transaction of business; whereas, the "throughs" stop only for wood, water and at meeting points. These last through telegraph trains, were enabled to make nearly double ordinary schedule speed, without running objectionably fast. This system has proved a very great success in an economical point of view since its adoption towards the close of the year, and has given additional satisfaction to the public, combining as it does, safety and speed.

In the summer months when business is lightest, weather finest, days longest, and consequently most work can be done, trains will be run almost exclusively by schedule to enable section hands and working trains, temporarily increased in number, to attain the utmost efficiency.

New general offices have been erected at Mobile, of such a character as to meet all reasonable requirements for many years to come. Several station buildings have been improved, and cotton platforms generally renovated, especially that at Mobile, which is capable of receiving 5,000 bales of cotton. This last has been surrounded by an enclosure—wall in front and fence in rear—intended to prevent hereafter the losses by theft which have been incurred in the past.

The water stations on the road have also received attention, having been greatly improved, and in many instances rebuilt. Two new turntables of an approved plan were greatly needed, and have been constructed—one at Macon, and

the other at Baldwyn—both points division termini. Additional side tracks have been made at Mobile, Shubuta, Macon, Baldwyn, and Columbus, Ky.—those at Jackson were already sufficient—by means of which, the separation of division "through" from "local" freight cars, has been greatly facilitated.

The paint shop at Whistler has been nearly doubled in capacity, an improvement absolutely required to preserve the passenger equipment, as well as maintain its neat appearance.

The half of a new 28 stall round house at Whistler, has been commenced. The foundations are in, the turn-table pit completed, a new iron turntable purchased, but not yet erected, and the greater part of the necessary materials secured. The prompt completion of this improvement is urgently recommended, as at Whistler are located, not only the mechanical headquarters of the Southern Division, but the principal repair shops of the company. The old round house having fallen into decay and been removed, there is no shelter for the locomotives nor those employed upon them. A double loss is thus incurred by the unnecessary exposure of men and machinery to the inclemency of the weather.

Two or three stations of comparative importance are without station houses. The construction of them at an early day, on a simple and economical plan, is earnestly recommended.

The year 1873 towards its close, has proved a very trying one to all railroad interests, including those of the Mobile and Ohio Railroad. Expensive preparations were made for a large fall business which never came, and hence net results have been injuriously affected. The preparations made, have, however, borne good fruit, inasmuch as the movement of trains during the past winter have been so economical, regular and free from accidents, as to compare favorably with that of any railroad in the country.

The Chief Engineer and General Superintendent, A. L. Rives, Esq., in concluding his report, says that since entering into office in May, 1873, he has given special attention to improving the attractiveness of the passenger equipment, to reducing the stoppage of trains at stations to a minimum, to increasing the average number of cars to the freight train, to the introduction of greater system generally, and latterly to the strictest possible economy consistent with safety. In these attempts, the hearty co-operation of the employes generally has been conspicuous, and is cordially acknowledged.

CONDENSED BALANCE SHEET, Dec. 31, 1873.

Cost of road and equipment	$17,303,161 50
Donated lands	1,796,153 11
Additions to rolling stock, etc.	532,880 63
Real estate	93 918 91
Cairo Extension	58,362 14
Okibbeha Branch	39,689 34
Supplies on hand	393,078 82
Railroad and County bonds	308,255 11
Convertible bonds	605,375 00
Railroad stock	288,232 44
Sinking fund 1st mort. sterling b'ds	82,634 90
Sinking fund Tennessee substitution bonds	17,249 18
City of Aberdeen—advanced to Aberdeen Branch	21,901 11
Interest on 1st and 2d mort. bonds paid in 1873	836,049 59
Interest paid on floating debt	117,527 98
U. S. Quartermaster's department	132,044 07
Bills receivable, secured by collaterals	59,875 58
Individual balances	19,905 76
U. S. Post Office Department	15,353 76
Connecting roads and agents	74,520 43
Uncurrent funds—Mississippi notes	4,709 00
Cash balance	25,500 22
	$23,021,878 58

Capital stock—active, 53,206 shares		$5,320,600 00
Convertible reserve—40,000 shares	$4,000,000	
Less par value of convertible bonds issued (in part of $1,000,000 authorized)	847,975	
		3,152,025 00
Funded debt ($12,073,953 47) viz:		
First mortgage bonds		9,719,120 00
Second mortgage bonds		1,453,858 46
Special, Gainesville Branch bonds		53,000 00
Convertible 8 per cent bonds		847,975 00
Floating debt ($1,451,647 77) viz:		
Bills payable, maturing 1874-75		1,018 882 45
Auditor's warrants		156,080 15
Pay roll warrants		129 272 77
Call loans, New York and Mobile		147,412 40
Sales of donated lands		84,166 00
Sales of station lots		8,860 46
Earnings less operating expenses, 1873		904,862 99
Profit and loss		25,262 89
		$23,021,378 58

President.—WM. BUTLER DUNCAN.

Vice President.—JOHN J. WALKER.

Directors.—W. P. Halliday, of Illinois; W. D. Dunn, J. J. Walker, W. H. Pratt, M. Waring, H. Hall, of Alabama; A. J. Gillespie, A. Murdock, of Mississippi; W. B. Duncan, David Utley, R. K. Dow, W. H. Hayes, Chas. Bard, of New York.

Secretary & Treasurer.—ALONZO L. WILLOUGHBY.

Auditor.—OLIVER S. BEERS.

Consulting Eng.—L. J. FLEMING.

Chief Engineer & General Sup't.—A. L. RIVES.

The Lake Superior Iron Mines.

A Marquette (Mich.) correspondent writes: "The great iron region may be roughly described as lying from twelve to thirty miles back from Marquette, and reaching into Wisconsin, a distance of one hundred and fifty miles, making such a magazine of iron ore as is nowhere else known. There are now in active operation more than fifty mining companies, giving occupation to many thousands of miners, mostly Scandinavians. The principal centres are Negaunee, Ishpeming, and Michgamme. The ores here obtained are of the valuable classes, chiefly specular and brown hematites and magnetic. During the year 1873 the total amount of iron ore shipped from the three ports, Marquette, Escanaba, and L'Anse, was over a million tons, besides a large amount of pig-iron, representing a cash value of more than eleven million dollars."

Alamaba and Chattanooga Railroad.

The London *Times* of August 6th publishes the following resolution of a meeting in London of Alabama and Chattanooga Railway eight per cent first mortgage bondholders:

That this meeting entirely approves of the action of the Hon. David A. Wells in his proceedings in the courts of Alabama, and, in the opinion of this meeting, it is now essential that all holders of Alabama and Chattanooga 8 per cent railway bonds in England, France and Germany should immediately deposit their bonds, so as to strengthen the hands of Mr. Wells, and insure a united action in the enforcement of their rights, and that the Corporation of Foreign Bondholders and the committee in Frankfort be empowered to take all necessary measures in their behalf for obtaining legal possession of the railway and controlling its management, and vesting it in a committee of five trustees on behalf of the bondholders; that an agreement conferring the necessary powers on the trustees be submitted to the bondholders for their execution; and that the Corporation of Foreign Bondholders be authorized to nominate three of such trustees on behalf of the English and French bondholders, and the Committee in Frankfort be authorized to nominate the remaining two trustees on behalf of the German bondholders.

Railroads of Ohio.

Work has been resumed on the Cuyahoga Valley Railroad, and the track from Cleveland to Canton will be laid this fall.

The Vinton *Record* says that the road will be completed and the cars running between Gallipolis and Vinton Station, on the Gallipolis, McArthur and Circeville Railroad, by the first of January next. This road, if continued on northwestwardly, will run through Troy to Bradford Junction, and thence by the Logansport branch of the Pan-Handle to Chicago. When completed it will form a bee line from the mineral region of southern Ohio to Chicago.

The grading on the Ohio and Toledo Narrow Gauge Railway has been nearly completed from Oneida to Minerva, and it is expected that trains will be running between Minerva and Carrollton by the first of October next.

A new railroad is proposed, to run from College Corners, on the Indiana State line, through Eaton, Lewisburg, Milton and Troy, making its eastern terminus at Urbana.

The Bowling Green and Tontogany Wood Railway is to be completed by October 1, and the railroad from Lake Erie to Pomeroy within a year.

Only seventy miles of the Baltimore, Pittsburg and Chicago road, between Defiance and Chicago, remains to be finished. The ballasting is rapidly going on, and the road will be ready for use by the first of January next.

Locomotives and Cars for South America.

A dispatch to the Boston *Journal*, dated New York, Aug. 20, 1874, says:

Nineteen locomotives and two hundred cars have been shipped from here for Peru, for a new railroad in that country. The ship Gardner Colby is preparing to take with her a very large cargo of a like nature for the same country. Peru has been ordering extensively for the past five years until within about twelve or eighteen months, when business generally became stagnant. Very recently exportation began to be lively again, and there is every prospect that it will continue to increase. Chili, too, is beginning to make demands for rolling stock, and the vessel Annie Camp is now here with eighteen locomotives on board, consigned to a southern part of that country.

☞ The Texas Midland, Gulf and New Orleans Railroad Company was recently organized at Waco, Texas, by the election of the following directors: W. A. Taylor, D. T. Chamberlin, O. E. Battle, G. C. McGregor, Waco, Texas; J. B. Robertson, Houston, Texas; Joseph U. Orvis, Norman A. Smith, New York; J. N. Harrington, James McKaye, London, England. The board subsequently elected the following officers: President, James McKaye; Vice President, W. A. Taylor; Assistant Treasurer, D. T. Chamberlin; Secretary, I. C. Colton, New York.

☞ A narrow gauge railroad from Petaluma, Cal., to San Quentin has been projected, the road also to be extended northward from Petaluma to Healdsburg.

☞ The Nashua and Rochester Railroad will be completed in October. Thirty out of the forty-eight miles are already laid.

New York and Oswego Midland Railroad.

The difficulties of the Midland Railway have increased so rapidly of late that the public need not be surprised if it shall learn that the road has suspended business altogether pending the sale on foreclosure. The current receipts under the present management have not been sufficient to pay the accruing obligations. The employes have not been paid since the 1st of June. Receiver Hewitt recently issued a circular apologizing for further delay on the ground that the Delaware and Hudson Canal Company had refused to pay over some $35,000 due to the road for coal transportation. The company's excuse for this refusal is based upon the fact that the Midland has failed to pay the semi annual rental for the Utica, Clinton, and Binghamton Railroad, and the Rome and Clinton Railroad. The coal company is the surety of the Midland in the lease of these roads, and expects to be obliged to make good the over-due rental. This amounts to $47,000, the total rental for the two roads being $94,000 a year. On the 26th of this month the sixty days expire which the law allows to the Midland Railroad to make good its obligations, under the lease. We have the best of reasons for believing that upon that day, the Delaware and Hudson Canal Company will take possession of the Clinton roads, and thereafter run them. News reached this city yesterday that an adjustment of the difficulties between the two companies had been effected. What the terms of this adjustment are it was impossible to discover, except that the Hudson Canal Company will not pay the Midland the $35,000 which it owes on coal freights. If it had been otherwise, the paymaster of the Midland would be under instructions to pay the employes the full amount past due to them. As it is the car starts to day to pay the men one sixth of their back wages. Yesterday the Midland Company resumed the transportation of the Canal Company's coal, after refusing to carry it for three days.

The surrender of the Clinton Branch is just now looked upon as the best thing that can happen to that road. No repairs have been put upon it since the commencement of the lease, and the whole line is in a most wretched condition. Many tons of new rails are needed, as well as some 10,000 new ties, to make it safe for the Winter. The branches from Utica to Smith's Valley, and from Rome to Clinton, have paid a handsome profit above their expenses. This is more than can be said of the main road.

Meanwhile another difficulty confronts the Midland management. The last Legislature passed an act directing that the property of the Midland Railroad be hereafter subjected to assessment and taxation. Assessors along the line are taking steps to discharge their duty under the law. Mr. Hewitt publishes a letter declaring the inability of the road to meet this tax. He takes counsel of his General Superintendent as to the advisability of resisting payment on the ground of the alleged illegality of the act of the Legislature. Such a resistance will gain time, but it does not seem likely that it can be otherwise successful. The people along the line of the road would willingly unite with the Receiver in the endeavor to resist the collection of the tax with a view to the ultimate repeal of the statute, if they had any guarantee that such a course would insure the continued operation of the road. The suspension of business would undoubtedly prove a great hardship to the people residing along its line. But it is feared that such a suspension cannot be much longer delayed. It is nowhere charged that Receiver Hewitt has not been efficient and honest in the management of the road since it fell into his hands. He has had difficulties to contend with which were insurmountable. It is not anticipated that the sale of the road will be made before the close of the year. Meanwhile the first mortgage bondholders have as yet united upon no plan of action regarding the purchase of the road, or the securing of their bonds. Its early suspension would be an advantage to them by decreasing the amount of indebtedness which is now daily increasing, and whose payment is contemplated in all plans of reorganization yet suggested. There is no doubt in our minds, as there never has been, that the Midland Railroad can ultimately be brought into a condition where it will pay the interest on a limited amount of indebtedness, and prove of great benefit in developing the country through which it runs. But great changes must be effected before that day arrives.—*Utica Herald, Aug.* 21.

Railroad Law.

RAILROAD COMPANIES.—ROLLING STOCK—SALE OF PROPERTY FOR TAXES.

The facts in the late case of Randall *v.* Elwell, (52. N. Y., 521), are sufficiently apparent in the following opinion, rendered in the Court of Appeals by Judge Grover:

The only objection to the validity of the assessment of the railroad company by the assessors, to the levying of the tax, the regularity of the sale by the Collector, and the purchase by the plaintiff, was that made upon the motion for a non suit, which was that the plaintiff had failed to show a title to the cars in question. This was too general to call upon the court to consider and determine any of the defects now insisted upon by the counsel. The counsel is mistaken in supposing that the evidence proved that the plaintiff was a director of the company at the time of the purchase by him, or that the evidence was such as to render that a proper question for the consideration of the jury if that fact was material. The plaintiff, in substance, testified that he thought he was not a director; that he had been two or three years before that time; had then gone to California, and, for the year preceding the purchase, had not acted as a director at all; and believed that he had not been elected as such. It was admitted by the plaintiff's counsel that the company in its report to the State engineer for the year in which the cars were purchased by the plaintiff, stated that the plaintiff was a director. This report was not evidence against the plaintiff. It did not appear that he had anything to with it, or knew anything about it. The questions whether had the plaintiff been a director at the time of his purchase it would have any and what effect upon the title, do not arise and will not be considered. The conclusion of the Judge upon the trial, that the testimony proved that the plaintiff purchased the cars for himself, and thereby acquired the title thereto, was correct. There was no conflicting evidence as to these facts. There was a conflict as to the value of the cars, and of their use while detained by the defendants. The counsel for the respondent states, in his points, that the parties finally agreed upon these facts, and refers to the folio that he claims shows it, which, upon examination, I think hardly sustain the counsel; but as the Judge, in his direction to the Jury, to find a verdict for the plaintiff, fixed the specific sums, which were to be found as the value of the cars, and of their use while detained by the defendants, and as no specific objection was made to either sums so fixed by the defendant's counsel, or any point made in this court founded thereon, I shall assume that such agreement was made.

The only remaining question is whether the cars were the personal property of the company against which the tax was levied, or a part of its real estate. If the former, no question can be made but that the Collector had the right to levy on and sell them for the purpose of collecting the tax; being at the time in possession of the company, against which the tax warrant was issued, irrespective of the lien or title of any other person by mortgage or otherwise. (1 R. S., 378, § 2.) If the cars were a part of the real estate, it is equally clear that the collector had no right to levy upon or sell them; and that the plaintiff, by his purchase at such sale, acquired no title thereto, as a collector of taxes has no power to sell real estate. The question is whether the rolling stock of a railroad company is real or personal property. It is obvious that the mode of propelling the cars, whether by steam, horse or any other power, can have no bearing upon the question. The question does not at all depend upon the length of the road, or whether the road of one company connects with that of others of the same gauge, and the companies so connecting, in the transaction of their business, are in the habit of running the cars of each other over all the roads so connecting (as is often done,) or whether the road has no connections, and, consequently, in the transacting of its business, its cars do not run beyond its own track. I think no one would claim that a car of the New York Central, which in the course of business, had been run to Chicago, was part of its real estate while there; and, if not such, I can discover no principle upon which the character of the property should be changed when it reached the Central track upon its return trip to New York. It must be borne in mind the defendants in this case can claim no equity upon the ground that they acquired title by purchase upon the foreclosure of a mortgage given to secure the bonds of the company, as the collector's warrant overrides all equities of third persons in the property. The question is presented, free from embarassment, whether cars, while owned and used by the company upon its track, were real estate or personal property. My conclusion is that they were personal property, and, as such liable to be seized and sold for the collection of a tax against the company. The reasons upon which this conclusion is based will be found in Stevens *et al., vs.* The Buffalo and N. Y. City R. R. Co., (31 Barbour, 590), and in Beardsley *et al., vs.* The Ontario Bank *et al*, (31 Id., 919), and the authorities cited and reviewed; and a repetition here is unnecessary. The reasons and authorities for holding that the cars were real estate will be found clearly and ably set forth in The Farmers Loan and Trust Co *vs.* Hendrickson, (25 Barb., 485.)

Steam Whistles.

Mr. A. A. Folsom, Superintendent of the Boston and Providence Railroad, has issued the following order:

To the Engineers of the Road—Under the recommendation of the railroad commissioners, both of Massachusetts and Rhode Island, a great reduction will be required in the use of the whistle on our locomotives.

You will therefore after midnight of Saturday, Aug. 22, discontinue its use for all purposes, except as a special danger signal.

It will not be used in passing other trains or in approaching crossings or stations, except at those regarded as specially dangerous, and in the case of freight trains where it is necessary to inform the station agents and switchmen that the train

men will have work at such station. In all other cases the signal must be given by the ringing of the bell.

American Bessemer Steel.

In 1868 an output of 500 tons of ingots per month was barely reached in the best works; in 1870 the production at Troy and Harrisburg had risen to about 1,700 tons per month, maximum. Early in 1872 the Harrisburg works turned out above 2,000 tons per month, and for a year or more these and the Cambria works took the lead in this direction, the latter plant having run as high as 640 tons in one week. During 1873 the Cambria, Harrisburg, North Chicago and Joliet works averaged 25 to 30 heats of five tons each, per 24 hours. During the week ending July 12, 1873, the Harrisburg works made 180 heats, yielding 890 tons of ingots. The product of the Cambria works, the week ending January 17, 1874, was 189 heats, giving 956 tons of ingots. During one twenty-four hours (Friday January 16), forty six blows were made. On Friday February 13, 1874, the Troy works made fifty heats in twenty-four hours, yielding 267 tons of ingots. This is the most remarkable run on record. During the week ending April 4, the Troy works made 195 heats, yielding 972 tons of ingots, which is the largest week's work. In January, 1874, the Troy works made 2,898 tons of ingots, and in April the North Chicago works made 3,526 tons, which is the largest month's work.

These are all five ton plants, consisting of two five ton vessels and accessories, and they work only eleven turns, or 5½ days per week.

The blooming trains employed at Troy, Cambria, North Chicago, Joliet and Bethlehem, are capable of rolling more than the average product of the Bessemer works. The first of these was erected at Troy in 1870; the feeding tables were first applied by Mr. Fritz to the Cambria mill, and have since been applied to all the mills, with some modifications. The Troy and Bethlehem mills roll ingots fourteen inches square, weighing over a ton, to make three rails each. The other mills at present roll twelve inch two-rail ingots.

The production of rails from blooms has been more uniform because the rail train was a highly perfected machine long before the Bessemer process was introduced. The Cambria mill has often produced 1,000 tons of rails per week, from a 21 inch train. Probably the best week's running on record, all things considered, was the Troy, ending April 25, 1874, viz: 1,012 tons of 62 pound rails, in eleven turns, from the mine furnaces and a 21-inch mill; of these there was not one second quality rail, and there were but 3¼ per cent of short rails.—*Mr. A. L. Holley in the Journal of the Franklin Institute.*

Mexico and Vera Cruz Railway.

The completion of the railway connecting Vera Cruz, the principal port, with the capital of the republic, at the beginning of last year, marks an epoch in the history of Mexico.

That railway is the most remarkable work of the kind on the continent, and in overcoming asperities of nature, seemingly insurmountable, it is a grand triumph of engineering genius. The length of the road is 200 miles, with a branch thirty miles long, connecting the main line with the city of Puebla. The highest altitude it attains is 8,500 feet. For more than twenty miles at the Cumbres of Maltrata, there is a continuous grade of four per cent, or one in twenty five.

The scenery all along the line of this road, from the moment of leaving Vera Cruz until your arrival in this city of Mexico, cannot be surpassed in beauty, majesty and sublimity. It is an ever changing and shifting panorama. Within a few hours you encounter several distinct changes of climate—the temperature depending less upon latitude than elevation.

As you ascend the eye is constantly feasted with the endless and exquisite forms of beauty, in hill, and valley, and plain, robed, for the most part, in the gay and brilliant colors so peculiar to the Mexican flora. The terrific grandeur of the mountain views between Orizaba and Boca del Monte must be seen to be appreciated or comprehended, although the outlook from the car windows appears to be perilous as you glance down thousands of feet upon the cultivated plains below. For more than one hundred miles you have constantly in view the snow-clad peak of the volcano of Orizaba.—*Extract from an Address by ex-Minister Nelson.*

Timing Railroad Trains.

The chief subject of interest on the east division of the Vandalia Railroad now is an ingenious arrangement for recording the rate of motion of railroad cars. A specimen is now on trial on caboose No. 10, now running between this city and Indianapolis. In the caboose, attached to one side, is an iron box, with a glass front, the key of which is kept by the officers of the line. There is a common clock in the box. A spiral thread is fastened upon one of the axles of the car, which turns a wheel over the axle. This communicates its motion to a set of rods, which in turn move another small wheel under the edge of the car and it again turns a small rod which projects upward into the iron box before mentioned, and moves a pencil point slowly back and forth across a long and narrow sheet of paper, wound upon a small drum, the drum being turned at a constant rate of progression by the clock work. The paper is ruled in red lines into very small sections, every fourth line the short way being a dotted line, representing a mile. Now, as the pencil is moved slowly across the paper by the rods, their motion being governed by the rate of the axle, and as the paper is slowly moved forward by the clock-work, at a uniform rate, the pencil point makes a diagonal line across the paper back and forth. If the car goes a mile in four minutes the line will cross just four sections diagonally from one dotted line to the next one. If it goes a mile in two minutes the line will pass forward more rapidly, crossing only two sections diagonally. And thus the rate of the car, and consequently the rate of the train, is recorded by the pencil point on the paper. If the train stops the line crosses the paper directly and not diagonally, and the time in minutes it stops is shown by the number of sections crossed in that manner. The names of the stations along the road are written at the proper places on the paper. Thus the exact rate made at any point on the line can be found afterward. If the train stops it can be told how long it stopped and where. If the wheels are locked and allowed to drag, it can be told how far they dragged and where. All fraudulent or reckless rates of progression can be unerringly detected, and if the train is run faster or slower than is allowed, the "bosses" are sure to know it. The railroad men are charmed with the ingenious arrangement. The specimen on No. 10 has now been in use for several days and is found to work well. The man who invented it is at work on a machine which will record the amount of resistance, in pounds, to be overcome in pulling any train up any grade.—*Terre Haute (Ind.) Journal.*

Norwich and Worcester R. R.

At a special meeting of the stockholders, held at Worcester, Mass., on the 20th inst., it was voted to accept the State legislation that authorizes the issue of $1,000,000 new stock. The proceeds of the new stock are to be devoted to the expenses of depot changes in Worcester, the construction of a new bridge at Norwich, and the extension of the road from Allyn's Point to Groton, where it could connect with the Providence and New-London road. It was stated at the meeting that the "facilities at Allyn's Point are not such as will admit of a coal transportation in large vessels, and the road should be extended. To successfully compete with Providence and other points the road should be extended to deep water." Commenting upon this the Providence *Journal* says: "It is vexatious to reflect that while the Norwich road is seeking deep water to successfully compete with Providence, Providence is taking no steps to check the encroachments that threaten to leave her without any deep water at all."

The Osage Land Case.

The great Osage ceded land case of Kansas has just been decided by the Circuit Court of the United States. The land in controversy was claimed by certain railroad companies under grants from Congress. The amount in dispute was about 1,000,000 acres, and the disputed tract is fifty by thirty miles in extent, embracing the counties of Neosho and Labette and part of the counties of Bourbon, Crawford, Allen, Wilson, and Montgomery, in Kansas, and upon which, claiming adverse to the railroad companies, are over 30,000 people. The court decided against the railroad companies, holding that they have no title, and setting aside their patents issued by the Interior Department. The opinion of the court was prepared by Mr. Justice Miller, of the United States Supreme Court, and concurred in by Circuit Judge Dillon, and the decrees have been forwarded by the latter from his residence in this city to the Clerk, to be entered at the adjourned term of the court, which meets at an early date. The court decided that when a patent for lands has been issued contrary to law, the United States may file a bill in equity to cancel it. It also decides that the lands in question, having been reserved in a treaty with the Osage Indians for their use, and being occupied by them at the date of the railroad grant of public lands, were not public lands of the United States within the meaning of the granting clause of the act; and also, that if such lands were within the granting clause, they were excepted out of this grant by the words that the grant should not extend to the lands previously reserved by the United States for any other use or purpose. This decision will create some stir in Kansas—and not only in Kansas but among a great number of capitalists and land agents in various portions of the United States and Europe, who have based loans upon them—not to mention the thousands of settlers who occupy the lands, and who have been nervous with anxiety over the claims of railroad companies for the lands they occupy. The settlers need feel nervous no longer, for the court decides in their favor.—*Davenport (Iowa) Gazette.*

☞ Among the passengers by the steamer City of Brussels, which sailed from this port the 22d inst., was Mr. J. D. Bigelow, Chief of the Loan division of the U. S. Treasury, having in charge $20,000,000 new Five Per Cent Bonds, which he will deliver to the Syndicate at London. The first installment of $5,000,000 was sent out about a week previous.

☞ The Paterson, N. J., *Guardian* of the 17th inst. says: "A corps of hands were put to work this morning in the Rogers shops. Large amounts of working stock are being put in and the prospect is that the works will be running to their full capacity in a short time. Danforth's will also have an increase of force. Business is getting better every day."

☞ Surveyors are actively at work in Ewing township, Mercer county, New Jersey, in laying out the grade for a new through railroad from the Delaware River to New York, which is to connect with the North Pennsylvania Railroad at Yardleyville. The surveying will be completed the coming fall.

RAILROAD EARNINGS—MONTHLY.

American Railroad Journal.

Saturday, August 29, 1874.

Stock Exchange and Money Market

The Money movement during the week has been indicative of continued ease for the leading borrowers on ample offerings of capital on both call and time. The demand from nearly all sources has been on a moderate scale for the season. Some inquiry has been noted for currency to be used in the forwarding of the abundant harvest products to market. The increase in speculative activity at the Stock and Gold Boards, especially the former, has tended to augment the requirements of the prominent Street firms. From the mercantile classes there has been a moderate demand for aid in the discount line. Lenders, however, have been liberal of accommodation. Call loans have been quoted to the leading borrowers at 2@3, and the best commercial credits at 5@7 per cent per annum. The City banks, last week, again reduced their deposit and their specie averages materially, while further contracting their loan and discount line. They likewise reduced their reserve of legal tender, while enlarging their item of circulation slightly. The U. S. Sub-Treasury again increased both its currency and specie reserves, the former quite liberally. The City banks, last week, reduced their reserve of legal tender notes $686,700, their deposit item $3,051,400, and their specie average $2,797,100. They also report a decrease of $674,200 in the loans and discounts, and an addition of $10,900 to the circulation. The U. S. Sub Treasury in this city closed the week with a currency balance of $62,254,381, against $59,899,722 the preceding week; and a coin hoard of $52,212,785, against $51,716,277 on the previous return. The City bank exchanges, during the week, were $320,109,469, or a daily average of $53,351,578. The customs revenue of the port, during the week, was $2,972,256. The City banks reported their average of gold last week at $19,554,900, and their greenback average at $65,891,400. Their deposits stood at $234,864,100. The loan item was $278,576,000. The circulation was $25,820,000.

The outstanding amount of legal tender notes is now definitely established by law at 382 millions. The National bank circulation is over 350 millions.

The income of the Government, from internal revenues, thus far, in the current fiscal year, commencing with July 1, 1874, has been over 14½ millions.

The Treasury balances at the opening of business on Wednesday were as follows: currency, $15,345,939; special deposit of legal tenders for the redemption of certificates of deposit, $61,430,000; coin, $72,485,471, including $30,884,200 in coin certificates.

Gold has been quoted stronger in price, on a more confident demand from speculative sources, and heavier drains for Custom House purposes. The export movement has been less extensive. The later dealings indicated less firmness. The extremes of the price have been 109½@110, closing at 109¾, as against 109⅝ on Wednesday of the preceding week. The specie outflow, last week, was only $693,229. The imports of specie at this port since Jan. 1, have been $2,942,628. The customs demand for Gold last week averaged $503,167 a day. Foreign Exchange has been less sought after and quoted lower. Bankers' sixty day bills on London closed on Wednesday at $4 86¼@$4 86¾; sight bills on London at @4 89@$4 89½ to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $5,660,319.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $6,871,325.

Government securities have been quoted somewhat firmer in price, on a fairly active demand, on investment account. U. S sixes of 1881 closed on Wednesday of this week at 118⅜@118⅝; U. S. Five-Twenties of 1862, 112½@112¾; U. S. Five-Twenties of 1864 at 116@116¼; U. S. Five-Twenties of 1865, 117½@117⅝; U. S. Five-Twenties of 1865 consolidated, 116½@116¾; U. S. Five-Twenties of 1867, 117⅝@117⅞; U. S. Five-Twenties of 1868, 117⅝@117⅞; U. S. Ten-forties at 114¼@114½; U. S. Fives of 1881, (Funding Loan) 112⅜@112½; Six per cent. currency Sixes from 117⅜@117⅝.

State and Railway bonds have been inactive at about former rates. Railway and miscellane-

ous share property has been much more freely dealt in, opening at firmer and buoyant prices, but closing lower, and unsettled.

General business, though fairly active, has not quite realized the anticipations of the mercantile classes. Domestic Produce has been quite freely dealt in; Breadstuffs, Provisions, and Cotton have been quoted lower. Flour and Wheat unusually depressed. Foreign merchandise has been in moderate demand. Scotch Pig Iron has been held more firmly, on light offerings. American dull and weak. Eglinton Pig Iron quoted at 34 @35; Glengarnock, $36@37; Sumerlee, $36; No. 1 American Pig at $31@$32, No. 2 do. at $27 @$29; Forge, $25@$27; English Rails at $50@ $52, gold; American Rails at works, 57 50@$62 50; Old Rails, $34@$38. Wrought Scrap, $35 @$37 50. Sales have been made of 600 tons of the latter on p. t. Ocean freights have been fairly active, opening lower, but quoted firmer toward the close. The Hardware business has been up to a good average; and values have been well maintained.

At the auction sale of Scranton Coal on Wednesday, 50,000 tons were disposed of within the range of $4 77½@5 92½ per ton; an advance on the July prices.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Pacific R. R. of Mo., 39⅝; do. 1st mort., 78½; Chicago and Alton scrip, ex-div., 93; Atlantic and Pacific R. R., pref., 14½; St. Louis, Kansas City and Northern pref., 22; Ohio and Mississippi 7s, consol., 91; do. consol. S. F., 92; Detroit, Monroe and Toledo 1st mort., 97¼; Union Pacific R. R. S. F. 8s, 71½; New York Central 1st mort., reg., 105; do. coupon, 105; Chicago and Northwestern consol. gold bonds, 79¾; Canada Southern 1st mort., 55; Toledo, Peoria and Warsaw 2d mort., 49; do. 1st mort., W. D., 73; Boston, Hartford and Erie 1st mort., 24¾; do. guar., 40; Central of New Jersey 7s, conv., 102¼; Del., Lack. and Western 7s, conv., 105; Morris and Essex 7s, 1871, 96½; Michigan Central 7s, 99; Albany and Susquehanna 1st mort., 103½; do. 2d mort., 101; St. Louis, Jacksonville and Chicago 1st mort., 96½; Long Dock bonds, 99; North Missouri 1st mort., 82⅝; St. Louis and Iron Mt., 1st mort., 83; Chicago and Milwaukee 1st mort., 92½; Lake Shore and Michigan Southern 7s, consol., reg., 97¾; Clev., Col., Cin. and Ind. 1st mort., 101½; Buffalo, New York and Erie 1st mort., 85; Western Pacific bonds, 82; Chesapeake and Ohio 1st mort., ex-coupon, 47; Western Union Telegraph, 76½; do. 7s, 99¼; Atlantic and Pacific Tel., 15; Consol. Coal of Md., 47; Maryland Coal, 20; Adams Exp., 107; Wells Fargo Exp., 75; U. S. Exp., 68¼; Quicksilver mining pref., 31; Connecticut 6s, 102⅞; Tennessee 6s, old, ex-coupon, 57⅞; do. new, do., 57½; do. 6s, n. s., 57⅝; Missouri 6s, l. bonds, 92¾; North Carolina 6s, Fund Act, 1868, 14½; do. 6s, old, Jan. and July, 18½; Georgia 6s, 79.

Philadelphia.—Pennsylvania R. R. div. scrip., 102; Huntingdon and Broad Top Mt. pref., 18; Catawissa new pref., 31; Fifth and Sixth streets, R. R., 55; Camden and Atlantic pref., 45¾; do. 2d mort., 100¼; West Pennsylvania R. R. bonds, 80; West Jersey R. R. 7s, 103½; Phila. and Reading Gen'l mort. 7s, reg., 105; do. deben. bonds, 79¼; do. 6s, 1844-'80, 100; do. 7s, new, conv., 104; Elmira and Williamsport 5s, 58½; Pennsylvania Canal 6s, 69; Delaware Division Canal 6s, 88; Schuylkill Nav. 6s, 76½; Pittsburg, Cincinnati and St Louis 7s 64¾; Allegheny Valley 7 3-10s, 89; Allegheny County 5s, 78½; Pittsburg 7s, 64¾. The latest quotations are: City 6s, 101¼@101½; do. free of tax, 104¼@104⅜; Pennsylvania State 6s, 2d series, 107½@107¾; do. 3d series, 109@111; Philadelphia and Reading, 55¼@55⅜; do. Gen'l mort. 7s, coup., 103½@104; do. reg., 104½@105½; do. mort. 6s, 1880, 99½@ 101; do. new, conv., 104@104¼; do. 7s, 1893, —@107; United New Jersey R. R. and Canal Co., 125¾@126; Camden and Amboy mort. 6s, 1889, 100@101; Pennsylvania R. R., 51½@51⅝; do. div. scrip, 102@102¼; do. 1st mort., 100¼@ 101¼; do. 2d mort. 100¾@102; do. general mort. coupon, 91@92; do. reg., 94@94¾; Little Schuylkill R. R., 47@48; Morris Canal, 48 @51; do. pref. 120@122½; do. 6s, 97½@100½; Susquehanna Canal, 5@8; do.6s, 73½@77; Schuylkill Nav., 6¼@7; do. pref., 12⅜@12½; do. 6s, 1882, 76½@77; do. 1872, 87½@91; Elmira and Williamsport pref., 35@40; do. 7s, 1878, 98@99; do. 5s, 58½@62; Lehigh Coal and Navigation, 45@ 45⅛; do. 6s, 1884, 96½@97; do R.R. Loan, 96½ @97; do. Gold Loan, 95¼@96; North Pennsylvania, 45½@46; do. 6s, 100@100¼; do., 7s, 102½@103; do. Chattle 10s, 107@108; Philadelphia and Erie, 17@17½; do. 6s, 90½@ 92; do. 7s, 84¼@85¾; Minehill, 52½@53; Catawissa, 14@17; do. pref., 43@43½; do. new pref., 31@31½; do. 7s, 1900, 100½@101; Lehigh Valley, 61@61½; do. 6s, new coupon, 100 @100½; do. reg., 100¾@101; do. 7s, 103½@104; Fifth and Sixth streets (horse) 55@56; Second and Third, 64@64¼; Thirteenth and Fifteenth, 22@25; Spruce and Pine, 29½@31; Green and Coates, 50@51; Chestnut and Walnut, 70@80; Hestonville, 19¼@19⅝; Germantown, 35@40.

Boston.—Worcester and Nashua R. R., 124½; Indianapolis, Cincinnati and Lafayette R. R., 6½; Cincinnati, Sandusky and Cleveland R. R., 10; Burlington and Missouri River R. R. in Nebraska, 55; do. 8s, old, 98⅜; Norwich and Worcester R. R., 122; Summit Branch, 35⅝; Nashua and Lowell R. R, 122¾; Rutland scrip, No. 6, 40; Chicago, Burlington and Quincy 7s, 96¾; Vermont Central 1st mort., 16; Grand River Valley 1st mort. 8s, 97; Boston and Albany 7s, 1894, 104½; Burlington and Missouri River R. R. in Iowa, 104½; do. Land Grant 7s, 98; Old Colony 7s, 1894, 104½; Boston Concord and Montreal 7s, 1893, 103; Eastern R. R. 7s, 1882, 93¾; do. 1887, 92¾; New Bedford R.R. 7s, 103½; Jackson, Lansing and Saginaw 8s, 1891, 94¼; Cary Imp., 5¾; Boston Land, 5; Boston Water Power Co., 11¾; Pullman Palace Car Co., 95¼; Essex Co., 125; New Hampshire 6s, 100¼; Chicago 7s, 1894, 99½; Cincinnati 7s, 1894, 101; Worcester 6s, 97; Cleveland 7s, 1879, 99½; Minneapolis 8s, 1899, 99¾; Toledo 8s, 1878, 101⅜; do. 7 3-10s, 95; Boston 5s, 1884, gold, 99¾; do. 6s, 1880@1894, 100; Cambridge 6s, 1884, 97; do. 1894, 96½; Charlestown 6s, 1891, 98¼; Allouez Mining Co., 8½; Calumet and Hecla, 127¼; Ridge, 5.

Baltimore.—Orange and Alexandria 2d mort. 6s, 82; Western Maryland 1st mort., guar. by Baltimore, 98⅞; do. 3d mort., guar. by Baltimore, 98; do. 2d mort., guar. by Washington Co., 91; Wilmington and Weldon 7s, 90; Virginia consols, coupons, 81; Virginia consols, ex-coupon, 49½; Virginia consols, new, 34; Memphis City 6s, 43; Santa Clara bonds, 12. The latest quotations are: Richmond and Danville 1st mort., 67½ @67½; Pittsburg and Connellsville 7s, 1898, 84¾ @86; Baltimore and Ohio, 169@170; do. 6s, 1875, 100½@101½; do. 1880, 100½@101; do., 1885, 101½@102; Washington Branch, —@175; Northern Central, 83@84; do. 6s, 1885, 92@93; do. 6s, 1877, 93@—; do. 1900, 90@91 do., 6s, 1900 gold, 90¾@91½; N. W. Va. 3d mort., 1885, 95@ 98; Marietta and Cincinnati 1st pref., 16½@20; do. 2d pref., 9@12; do. 1st mort. 7s, 1892, 102@ 103; do. 2d mort., 7s, 92½@92¾; do., 3d mort., 8s, 74@74½; Central Ohio, 42@43; do. pref., —@—; do. 1st mort., 92¾@93; Western Maryland, 1st mort. 6s, 1890, 80@89; do. 1st mort. guar., 98@100; do. 2d mort. guar., 98@100; do. 3d mort., guar., 98@99; do. 2d mort. pref., 60@70; do., 2d mort. guar. by Washington Co., 90@91; Virginia and Tennessee 2d mort. 6s, 69@75; do. 3d mort. 8s, 78@80; Orange and Alexandria 1st mort. 6s, 89@92; do., 2d mort. 6s, 80½@82; do., 3d mort. 8s, 80@81½; do., 4th mort. 8s, 74 @75; Orange, Alex. and Manassas 7s, 79@79½; Baltimore 6s, 1875, 101⅝@102; do., 1884, 100@ 102; do. 1886, 101@101½; do. 1890, 102@102¼; do., 1900, 101@101¼; do. 1902, 101@101½; do., 6s, exempt, 103¾@106; do. 5s, 80@86; Memphis City 6s, 42@43; Maryland Defense 6s, 1883, 106@ 108; do. 6s, 1890, 100@—; do. 6s, exempt, 106@ 108; do. 5s, 80@90; Virginia coupon 6s, old, 33¾ @33⅞; do. new, 30@40; do. consol. 6s, 52@52¼; do. coupons, 80½@81½; West Virginia, 9@10; City Passenger R. R., 19@20; George's Creek Coal, 140@150; Atlantic Coal, 2.30@2.40; Santa Clara, 4.50@6.50; Canton Co., 50@70.

Calumet and Hecla Mining Co.

At the annual meeting of this company, held in Boston on the 19th inst., the following Board of Directors was elected:, Alexander Agassiz, H. H. Hunnewell and George Higginson of Boston, Quincy A. Shaw of West Roxbury and James N. Wright of Calumet, Michigan. At a subsequent meeting of the directors Mr. Agassiz was chosen President, and Mr. Chas. W. Seabury Treasurer and Secretary. From the reports rendered it appears that, for the season of 1873, 18,392,000 pounds of copper were sold, netting 26 40-100 cents a pound. The expenses of marketing were .01 87-100, and of smelting and barrelling .01 27-100 a pound. The assets of the company over liabilities is $2,253,545. The mine never looked better, and is opened five years in advance.

☞ The first ten of the 65 locomotives ordered from the Grant Locomotive Works, at Paterson N. J., are now being shipped at Jersey City. They are to be delivered at the port of Taganrog, at the head of the Sea of Azov.

☞ Surveys have been completed for a branch of the St. Louis, Iron Mountain and Southern railroad which is to leave the main line near Benton, Ark., and run west about 25 miles to the Hot Springs.

☞ The Land Office of the Northern Pacific Railroad Company has been removed from Kalama to Tacoma.

Allegheny Valley Railroad.

A meeting of the creditors was held in Pittsburg on the 11th inst. to consider the report of the Executive Committee which had conferred with the Pennsylvania Railroad Company. The following proposition was reported by them as satisfactory to the Pennsylvania Railroad and accepted by Mr. Thos. A. Scott, who said if the creditors of the Allegheny Valley would fund their claims his road was prepared to execute a contract. The propositions are as follows:

1. That the Allegheny Valley Railroad shall apply to the payment of interest on the income bonds, all her surplus earnings, after providing for existing mortgages and operating expenses only.

2. That there shall be devoted to the payment of the interest and principal of three and a half millions income bonds, the amount due creditors other than the Pennsylvania Railroad and the Pittsburg and Erie Railroad, one-tenth of the gross receipts for freight to and from the Allegheny Valley Railroad, and over the Pennsylvania Railroad the Pittsburg and Erie Railroad and the Northern Central Railroad. This one-tenth shall be placed with the trustees of the mortgage, one of whom shall be the Safe Deposit Company of Pittsburg.

3. That for any deficiency in interest on the income bonds, by reason of the Allegheny Valley Railroad failing to realize a sufficient amount, the trustees shall apply (out of this ten per cent) a sufficient amount to pay the deficiency in interest, and the remainder shall be applied to the purchase of the three and a half millions outstanding bonds by advertisement.

4. The entire amount of income bonds under this trust shall be ten millions, of which a sufficient amount shall be used for the payment of existing debts at par, and out of the remainder the Pennsylvania Railroad shall be entitled to a sufficient amount at par, as may be necessary for her advances, and Pittsburg and Erie Railroad Company for indebtedness due to it.

5. These bonds to run for twenty years.

6. The interest to be at the rate of 7 per cent per annum.

An agreement was drawn up on the basis of these propositions and signed by $5,000,000 out of the total claims of $6,300,000. The settlement may thus be considered to be effected on this basis.

☞ A meeting of the holders of the consolidated bonds of the Oil Creek and Allegheny River Railroad was held in Philadelphia on the 18th inst., to consider the present difficulties of the company, and to agree upon a plan for reorganization. A letter from the president of the Allegheny Valley Railroad, John Scott, was read, suggesting as a basis of representation that the first mortgage remain at $2,580,000; that the second or consolidated mortgage be converted into preferred stock, at $1,100,000; that the floating debt, $368,000, be also made preferred stock, and that the capital be $4,959,000. A committee was appointed to co-operate with the trustees of the consolidated mortgage, and the meeting adjourned to October 13.

☞ The Tuscarawas *Chronicle* says that the twelve miles of railroad between Marietta and Parkersburg has come under control of the Marietta, Pittsburg and Cleveland Railway, and hereafter will be operated by that company. The southern terminus of the road is now Parkersburg, between which point and Canal Dover Railroad communication is established without change of cars.

Railroads of Colorado.

Work has been commenced on the section of the Pueblo and Salt Lake railroad, which is to extend from Pueblo, Col., east to Las Animas, the terminus of the Arkansas Valley Branch of the Kansas Pacific Railway. The length of road to be built is about 85 miles. From Las Animas to Carson City, Col., is about 56 miles.

It is said that work on the line of the Colorado Central Railroad, to Julesburg, is soon to be resumed. A section of this line from Golden Junction to Longmont, 39 miles, has been in operation some time.

The branch, or extension, of the Denver and Rio Grande Railway, eight miles in length, from Labran, Col., on the Canon Branch, to Canon City has been completed, and trains are now running from Denver to Canon City. The company has 163 miles of road in operation.

The Denver, South Park and Pacific Railroad is completed from Denver, Col., southwest to Morrison, a distance of 15 miles. The road is to be extended to Fairplay in the South Park and thence into southwest Colorado. It is 3 feet gauge.

☞ At the annual meeting of the stockholders of the Atlantic and Pacific Railroad company in this city on the 19th inst., the following Board of Directors was elected for the ensuing year:—Andrew Pierce, Thomas T. Buckley, Joseph Seligman, Andrew V. Stout, William H. Coffin, Clinton B. Fiske, David Salomon, Cornelius J. Bergen, James D. Fish, D. R. Garrison, Charles P. Choteu, Thomas W. Pierce and Henry F. Verhuven. The new board organized by electing Andrew Pierce President and General Manager, D. R. Garrison, of St. Louis, Vice President, and Clinton B. Fisk Treasurer.

☞ The Chester and Delaware River Railroad company is about to build the extension of its road from Chester Pa., northeast to Ridley Junction on the line of the Chester Branch of the Philadelphia and Reading, the old line of the Philadelphia, Wilmington and Baltimore. The distance is about four miles. The contract for the pile bridging, of which considerable will be required, has been let to Messrs Powell & Son of Philadelphia.

☞ A survey and map of the new Delaware and Bound Brook Railroad has been filed in the office of the Secretary of State at Trenton, New Jersey. The road commences at a point on the Delaware River below Yardleyville, and runs thence to a point on the Central Railroad distant nearly two miles west of the station at Bound Brook on that road.

☞ The Chippewa (Wis.) *Herald* is informed by Messrs. McDougall and Riley the contractors for the Chippewa Falls Railroad, that the road between Chippewa Falls and the West Wisconsin depot at Eau Claire will be ready for the iron by the 25th of October, and if the iron is secured by that time cars will undoubtedly be running in November.

☞ Four locomotives, designed for service across the Illinois and St. Louis Bridge, and through the Tunnel, have recently been constructed at the Baldwin Locomotive Works, in Philadelphia, and are now on their way to St. Louis.

Columbus and Toledo Railroad.

Those having charge of the interests of the Columbus and Toledo Railroad company expected to let the contracts for grading in September next, but some delay has attended the procuring of contracts for the right of way, and the letting of grading contracts is therefore necessarily delayed. Hon. N. Hatfield, of Wood county, has been devoting some time to the work of procuring right of way, and we believe this has about all been secured between Fostoria and Walbridge, a station on the Toledo, Tiffin and Eastern road near this city. Beyond Fostoria, we understand, there are still some unsettled claims for right of way, all of which will be disposed of as speedily as possible. The road will doubtless be ready for the cars by the fall of 1876.—*Toledo Blade.*

☞ The New-Orleans *Times* of the 18th inst. says: "The Louisiana State Funding Board began work last Thursday, seemingly in earnest, having received for conversion 228 old bonds, chiefly red-back bonds, which were examined and canceled Friday, and new consols issued in exchange for same on Saturday. The first coupon of interest due July 1 on each of the bonds was paid by the Treasurer on demand. A considerable amount of taxes for current interest has been collected, and there seems to be no reasonable doubt that the interest on the new bonds will be promptly and regularly paid. We trust the work will now proceed without further interruption."

☞ The Woodland (Cal.) *Mail* says: "The locating agent of the Central Pacific Railroad Company returned a few days ago from an official visit to the Colusa line above Dunnigans, and undoubtedly work will be commenced at an early day on the branch road from Woodland to Colusa. The right of way has been secured by all the landowners on the route except five or six, and they are only waiting for developments. We understand from good authority that the bridge which is to span Cache creek, near Cacheville, is already framed at Vallejo, and will be put in place just as soon as the work of grading and laying the track reaches that point.

☞ The Marinez *Gazette* says: "The Central Pacific Railroad Company has again put a corps of engineers in the field for a resurvey of what is termed the air line route from Sacramento, crossing the middle ground of Suisun bay, from the north side to a point on this side above Bay Point. This line was surveyed and soundings in crossing the bay taken some two years ago with much care and accuracy by a corps under Engineer Guppy, who has also charge of the survey now to be made."

☞ Railway carriages to the value of $260,568 were imported into Canada from the United States during the fifteen months previous to April, 1874. Importations of horse cars during the same period amounted to $21,448. To these sums a duty of fifteen per cent must be added to give the total cost.

☞ Along the Portsmouth branch of the Marietta and Cincinnati Railroad, from Hamilton to the Ohio river, a distance of 56 miles, there are 23 iron furnaces, and most of them are now in blast.

☞ One hundred and fifty men are employed in laying the rails from Berlin to the terminus of the Wicomico and Pocomoke Railroad.

Steam on the City Railroads.

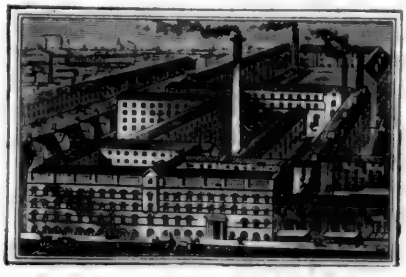
The Atlantic Avenue Railroad Company of Brooklyn, has been authorized to use steam in place of horses for street travel for a distance of four miles north from East New York. It is understood to be the intention of the company to apply the authorized steam power by means of dummy engines or fireless locomotives patented by the Ammonia and Thermo-specific Propelling Company of New Orleans. A dozen or two of these engines are said to be in use in New Orleans, and the number is to be increased. In Chicago some of them have been put to use. The full charge of steam required is two hundred pounds, and one charge will be sufficient on a level track to run the engine twenty miles. The locomotive can be easily changed in 2½ minutes, and only one person is required to manage it. Stoppages can be made every two or three blocks with ease. One or two cars to each locomotive will be the average. Last March the Common Council of this city adopted an ordinance permitting the use of steam on any of our city railroads, and it is quite probable, if the Brooklyn experiment should prove a success, it will lead to the adoption of such a system of locomotion on here. Some capitalists are understood to think favorably of the plan.

Burlington, Cedar Rapids and Minnesota Railroad.

Mr. George Greene, President of this road, in his report dated May 15, 1874, says:

"You now have over 400 miles of road, exclusive of side and transfer tracks, in successful operation. Last spring (1873), we had some 75 miles of road nearly graded, and about 100,000 ties, and a large amount of materials for bridges and culverts on hand. Notwithstanding financial difficulties, the Milwaukee extension was completed, and large and valuable additions were made in side tracks, equipments, station buildings, water tanks, machinery and fencing. All the work has been done in a thorough and substantial manner. The track being laid, except the first twenty miles, with the fish-plate rail, is remarkably smooth. The new portion of the line has been open so short a time that a satisfactory statement of the returns to be expected from the entire property cannot yet be given. For the purpose of showing the working capacity of the road, a small amount of construction account (less than $8,000) was added monthly to the earnings during the process of construction up to October 1, 1873, since which time the earnings, as reported, are the actual proceeds of regular traffic. The earnings for 1874 are estimated at $1,500,000. The company now own 29 first-class locomotives, 1 first-class switching locomotive, 556 box and cattle cars, 188 coal and platform cars, 14 first class passenger cars, and 18 other cars for traffic. The work of construction has been entirely discontinued, and will not be resumed until existing liabilities are liquidated, and the market value of the bonds advanced to at least 5 per cent."

☞ Peru has decided to construct a railroad from the Port of Payta to Piura, a distance of 68 miles. The Bank of Peru is to advance $300,000, and the firm of Bryce, Grace and Co., of Callao, has received a deposit of £200,000 in Peruvian bonds, and will at once advance the necessary funds for purchasing materials.



☞ The number of railroad cars in use in the United States is given at 859,979; and of locomotives, 14,167. In Canada there are 13,980 cars and 774 locomotives.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending August 15, at 886,942 tons, and for the coal year 10,999,303 tons against 11,848,896 tons to corresponding time last year, being a decrease of 849,593 tons. The bituminous tonnage for the week is 77,813 tons, and for the year 2,020,492 tons, against 1,982,923 tons to same time last year, giving a total of all kinds for the week of 464,755 tons, and for the year of 18,049,795 tons, against 13,781,819 tons to same time last year, being a decrease of 762,054 tons.

☞ The Baxter line have now six steam canal boats running between New York city and Buffalo. They have a carrying capacity of about 200 tons each, and make the trip each way in about six days. Allowing for one day at each terminus, the round trip is made in fourteen days or two trips a month. This is double the speed of the horse boats, they averaging but one trip a month. During the winter these boats will be run on some of the Southern canals. They are already playing a very important part in solving the problem of cheap transportation.

☞ Fried. Krupp, the celebrated iron master and steel maker of Prussia, has just bought in the Basque provinces of Spain a vast body of iron land containing four hundred and forty-four iron mines, four mines of coal, and five great founderies and workshops which he proposes to devote to the construction of iron ships of war. He has built a railroad about fourteen miles long to transport the metal to the coast of the Bay of Biscay.

☞ The Des Moines and Minnesota Narrow Gauge railroad is completed to Ames, on the Chicago and Northwestern railroad.

Manufactory of the Spencerian Pens, Birmingham, England.

SWAN QUILL Action!

SPENCERIAN

STEEL PENS.

These Pens are comprised in 15 numbers; of the NUMBER ONE PEN alone we sold more than

5,000,000

in 1873.

and the sale is continually increasing.

They are of superior English make, and are justly celebrated for their elasticity, durability, and evenness of point. *For sale by the trade generally.*

☞ *To accommodate those who may wish to try these Pens, we will send a Sample Card, containing all of the 15 numbers by mail on receipt of 25 cents.*

Quicksilver Mines.

Colusa County, California, from all accounts, is about to divide the honors with Santa Clara, Sonoma, Napa, and other quicksilver producing counties, in the extraction of valuable ores. The Colusa *Sun* of August 1st, says: "Both the Buckeye and the Elgin continue to take out quicksilver with their retorts. The latter sent down eight flasks last week. The castings for the furnace of the Abbott mine have all been made, and most of them will be at the Colusa wharf by the 3d instant. The brick will be ready for delivery by the 10th, and by the 10th of September the furnace will be ready to turn out from 500 to 1,000 pounds of quicksilver a day."

TRENTON, N. J.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company

Central Railroad of New Jersey.

The Central Railroad Company of New Jersey has decided to create a consolidated mortgage on all their railroad properties and appurtenances, the entire issue not to exceed $25,000,000. Of this amount they will reserve sufficient for the conversion by exchange of the existing $5,000,000 first mortgage bonds, $600,000 Newark Branch bonds, (assumed,) the $175,000 outstanding of the issue due in 1875, and as many of the $5,000,000 convertible bonds as may not be converted into stock by 1875. The new issue will be created from time to time as required by the necessities of the company. There will be 5,000 bonds issued, of the par value of $1,000 each, and having twenty-five years to run. They will be dated Sept. 1, 1874, to bear interest at the rate of 7 per cent. per annum, payable quarterly, and will be held free of all taxes, State or National. The bonds are offered to stockholders alone, at an issue price of 90 per cent., in view of the general depression in all securities, and subscriptions will close on the 15th inst. The proceeds are required for the cancellation of various items of indebtedness and completion of improvements now in progress or projected.

Redemption of Five-Twenty Bonds.

The eleventh call for redemption of Five Twenty bonds of 1862 is as follows:

TREASURY DEPARTMENT, Sept. 1, 1874.

By virtue of authority given by act of Congress, approved July 14, 1870, entitled "An act to authorize the refunding of the national debt, I hereby give notice that the principal and accrued interest of the bonds hereinbelow designated, known as five twenty bonds, will be paid at the Treasury of the United States, in the City of Washington, on and after the first day of December, 1874, and that the interest on said bonds will cease on that day. That is to say, coupon bonds known as the third and fourth series, act of Feb. 25, 1862, dated May 1, 1862, as follows:

Coupon Bonds.—Third series, $50, Nos. 14,501 to 17,874, both inclusive; $100, Nos. 45,101 to 54,928, both inclusive; $500, Nos. 28,701 to 30,968, both inclusive; $1,000, Nos. 78,201 to 79,182, both inclusive. Fourth series—$50, Nos. 1 to 1,310, both inclusive; $100, Nos. 1 to 1,966, both inclusive; $500, Nos. 1 to 1,786, both inclusive; $1,000, Nos. 1 to 4,370, both inclusive. Total, $12,000,000.

Registered Bonds.—$50, Nos. 1,751 to 1,800, both inclusive; $100, Nos. 13,301 to 13,900, both inclusive; $500, Nos. 7,701 to 7,950, both inclusive; $1,000, Nos. 31,610 to 32,950, both inclusive; $5,000, Nos. 9,801 to 10,150, both inclusive; $10,000, Nos. 11,751 to 12,500, both inclusive. Total, $3,000,000; grand total, $15,000,000.

Of the amount outstanding (embraced in the numbers as above) $12,000,000 are coupon bonds and $3,000,000 are registered bonds.

United States securities forwarded for redemption should be addressed to the Loan Division, Secretary's Office, and all registered bonds should be assigned to the Secretary of the Treasury for redemption.

B. H. BRISTOW, Secretary.

Appended to this call is a statement of the ten previous calls for the redemption of five twenty bonds, (act Feb. 25, 1862). They commence with Sept. 1, 1871, and aggregate to Aug. 1, 1874, $261,000,000, and with the present, or eleventh call, $276,000,000.

☞ Arrangements have been made for a regular weekly line of steamers from New York to Port Royal, to run in connection with the Port Royal Railroad.

Iron Steam Collier.

The iron steam collier Pottsville, built for the Philadelphia and Reading Railroad Company, was launched on the 27th ult., from the ship yard of Messrs. Wm. Cramp & Sons, in Richmond. This ship, says the Philadelphia *Ledger*, is the last of a fleet of fourteen constructed for the company, and it is expected that a number of additional ones will be built at the new ship yard, above the Reading coal wharves, during the next two years. The Pottsville is 250 feet long, 37 feet beam, and 20 feet depth of hold. She has only one deck, but has a full set of hold beams prepared for putting in a second deck if necessary. She is built entirely of iron, double riveted, with an iron deck, deck houses, hatches and covers, and iron waist. Her iron is from 9-16 to 13-16 inches thick. She has a "water bottom," 42 inches deep, and will carry 500 tons of water in it as ballast when not loaded. She has four water-tight compartments, provided with Kingston valves, opening from the spar deck, to relieve the hold of water that may collect above the water bottom.

The quarters for the officers and crew will be in the houses on deck. These houses are of iron, bolted fast to the iron deck, and will be provided with iron doors and round lights in brass frames, all of which shut on flanges of vulcanized rubber, thus making it practicable to shut the rooms up hermetically from the sea, the ventilation being supplied from the roof. She has four cargo hatches with iron covers, the flanges of which are lined with rubber. She has two masts, and is square rigged forward and schooner rigged aft, and will spread 2,150 square yards of canvass. She is to be provided with an Emerson patent windlass to work by steam or hand; she also will have two Williamson patent hoisting engines for hoisting and discharging cargo, and handling the sails and hatch covers. She will be provided with two Hall's pulsometer pumps, with a capacity of seven hundred and fifty gallons each per minute, with two steam syphons for pumping out the water bottom by steam from either the main or donkey boilers, and one steam pump for pumping, either from the water bottom, the hold or the sea. She will also have one double-acting circulating pump for pumping either from the sea or

the water bottom, and one bilge pump. She will have a vertical direct acting surface condensing engine of 540 horse power. Her propeller is 12 feet in diameter, and 16 feet pitch. She will have two return tubular boilers, besides a donkey boiler on the main deck. Her line shaft is provided with solid wrought iron collars, forged on, and the propeller shaft is faced with brass, and runs in lignum-vitæ stuffing. She will be provided with apparatus for forcing steam jets in the apartments in case of fire, and will have every provision and appurtenance requisite for a first-class iron steamship.

Kansas Pacific Railway.

The earnings of this road for the years ending December 31, 1872 and 1873 were as follows:

	1872.	1873.
From freight	$2 294.299 11	$2,077,169 67
" passengers	1,100,197 51	1,189,703 24
" U. S. troops	72,426 82	52,502 85
" U. S. mails	82,935 84	84,000 00
" express	84,000 00	98,655 00
" rents	34,904 85	30,696 15
" individuals and companies	39,234 95	19,554 56
" sundry sources	15,714 10	11,018 02
	$3,723,713 18	$3,563,299 49
Expenses, viz:		
Conducting transp	$615,865 64	$559,426 62
Motive power	719,534 66	665,684 26
Maintenance of cars	176,322 70	193,046 41
Maintenance of way	604,261 83	596,634 79
General expenses	113,280 94	102,198 51
	$2,229,265 77	$2,116.990 59
Net earnings	$1,494,447 41	$1,446,308 90

Compared with the previous year, the gross earnings of 1873 show a decrease of $160,413 69, with a decrease in expenses of $112,275 18—making the decrease in net earnings only $48,138 51. The percentage of operating expenses to earnings in 1873 was 59.41, against 59.87 in 1872. The first nine months of the year 1873 show an increase in earnings over the corresponding period of 1872 of $22,132 51; while the last three months give a decrease of $182,546 20—a result directly attributable to the panic, which so disastrously affected every branch of business during the last three months of 1873. The Government business of all kinds amounted, for the year, to $205,265 50; but, as since September 30, 1872, the Government retains all the earnings for services rendered it, no part of this amount has been available to meet any of the obligations of the company, and hence is to be deducted.

During the year 1873 there were constructed, under the auspices of this company, 33½ miles of the Junction City and Fort Kearney Railway, and 56 miles of the Arkansas Valley—making the length of road now operated 762 miles. For the purpose of comparison, however, the statements herewith submitted relate only to the main line and Leavenworth Branch, 673—being the same length of road as reported upon since August, 1870. The President, in his report dated April 30, 1874, says:

In all of the departments, except Maintenance of Cars, a reduction of expenses, as compared with previous years, has been effected. At the same time, not only has the Road-bed been improved by the substitution of substantial and permanent structures for more temporary ones, but the equipment has been maintained at its standard, and is in excellent condition. The report of the General Superintendent, for the year 1872, recommended the purchase of 250 Combination Freight Cars, to accommodate the Spring business, and there being no funds wherewith to pay for the same, arrangements were made with the Kansas Equipment Company to furnish them on a basis of mileage. Under the agreement, that Company has furnished 100 cars of the class required, which are now in the service of the Company. The cars were constructed under the supervision, and according to the specifications of your Company, and subject to the inspection of its officers; and the agreement provides that your Company may, at any time after ten days' notice, take the cars by paying for them at cost, less a liberal discount for wear.

The bridge over the Kaw River, at Kansas City, built in 1865, gave so many evidences of weakness, that it became necessary to replace it, and a new bridge having stone abutments and piers, and iron cords, has been substituted. The Atlantic and Pacific Railroad Company pay one half the cost, and use the bridge jointly.

During the year the Topeka Rolling Mills have been completed, and the re-rolling of worn rails can now be done at home.

The Junction City and Fort Kearney Railway was opened for business February 18, 1873, and since that date has been operated by your Company. The earnings for that portion of the year, over operating expenses, were $5,182 04. The trade coming to that Line has been hitherto, in a great measure, tributary to other Lines, and difficult to divert into the new channel, yet the rapid development of the valley of the Republican river warrants the belief that a paying traffic will accrue to the Road.

The Arkansas Valley Railway was opened for business from Kit Carson to Las Animas, in October, 1873. It crosses the Arkansas river at a point about 2½ miles west of Fort Lyon, by a bridge of 480 feet in length.

The earnings from the date of the opening of the Road, to Dec. 31, 1873, over operating expenses, was $2,959 22.

The principal and interest of the First Mortgage Bonds of both the Junction City and Fort Kearney, and Arkansas Valley Railways, were guaranteed, by endorsement thereon, by your Company, in accordance with resolution of the stockholders, heretofore adopted. It was contemplated that both of these Lines should be leased to the Kansas Pacific, but as yet no lease of either has been formally entered into. Your Company own a controlling interest in the stock of the Arkansas Valley, as well as in the Junction City and Fort Kearney Railway.

LAND DEPARTMENT.

The number of acres of Lands sold during the year was	25,423.43
Aggregate amount received for same, including lots sold	$93,335 43
Average price per acre,	$3 66¼

KANSAS PACIFIC LAND GRANT TRUST.

The net proceeds of sales of Lands and Lots for account of this Trust, in 1873, was	$44,740 54
Amount received on account of Interest	12,981 84
Total	$57,722 38
Amount previously placed in hands of Trustees	588,166 10
Total amount received by Trustees for redemption of the Bonds secured under this Trust	$645,888 48
Of these Bonds the Trustees have purchased and cancelled to Dec. 31, 1873, $248,250, for which they paid in cash	$215,034 49
Balance in hands of Trustees in cash and notes,—with 1,790,174.53 acres of Lands unsold	$430,853 99

DENVER EXTENSION TRUST.

This trust covers 8,000,000 acres of the most westerly lands, on 286 miles of your Road, and with a first mortgage on that part of the Road forms the security for the $6,500,000 Bonds known as Denver Extension Bonds.

The net proceeds of sales of Lands for the year for account of this Trust, were	$28,288 53
Amount received on account of interest	5,395 15
Total	$33,783 68
Amount received previous to 1873	145,367 58
Total amount placed in the hands of the Trustees for redemption of these Bonds	$179,151 26
Of the Bonds of this Trust, the Trustees have purchased and cancelled, to Dec. 31, 1873, $68,000, for which they paid, in cash	63,640 00
Balance in hands of Trustees, Dec. 31, 1873, in cash and notes	$115 511 26

Number of acres of lands unsold, 2,967,560.98.

PAYMENT OF INTEREST.

The severe stringency in the money market, and the general unsettling of business, resulting from the sudden and wide spread financial panic of September last, rendered it impossible for the Company to meet all its obligations as they matured, and has forced it to default in the payment of the interest on its bonded debt since November, 1873. The affairs of the Company have been laid before the representatives of a large proportion of the bondholders and creditors of the Company, and after mature consideration, a plan was decided upon for extending the time for the payment of the interest and outstanding obligations of the Company; the protection of the interests of the bondholders and to prevent any sacrifice of the property of the Company, which hasty and inconsiderate action would cause, and it affords me pleasure to be able to state that the plan agreed upon has already been accepted by so large a number of the bondholders, that arrangements are being perfected for carrying it out.

If the proposed extension is secured, we believe that the Company will be enabled to meet all of its obligations, and that the interests of all its bondholders and creditors will be fully protected.

The company have 86 locomotives and tenders, and 2 tank locomotives for switching. The number and description of cars is as follows: 27 first-class and 15 second-class passenger, 9 Pullman sleeping, 2 reclining seat, 1 directors', 1 pay, 18 baggage, mail and express, 36 caboose, 2 magazine, 106 combination, 169 stock and rack stock, 312 box, 210 flat, 228 coal, 3 construction, boarding and sleeping, 1 tool, 3 derrick, 118 hand and 113 push cars, and 4 large and 11 small snow plows. The locomotive mileage for the year was 2,114,496 miles; the traffic train mileage, 1,441,229 miles. The total cost of locomotive repairs was $155,746 58. Cost of locomotive service per mile run, 24.88 cents. Average miles run per ton of coal, 39.83.

INCOME ACCOUNT, DEC. 31, 1873.

Construction	$68,046 85
Real Estate	76 25

	$3,855,512 71

The total tonnage for the year was 273,405 tons, of which 122,980 tons were carried east and 140,425 tons west. Total number of tons carried one mile, 61,987 443. Average distance each ton was carried, 235.33 miles. Cost per ton per mile, 2.12 cents.

The number of passengers carried east was 80,238; do. west, 93,413—total number of passengers carried, 173,651. Number of passengers carried one mile, 23,589,686. Average distance each passenger was carried, 135.85 miles. Cost per passenger per mile, 2.64 cents.

No General Account is given in the Report. The Funded Debt, amounting December 31, 1873, to $21,108,100, (exclusive of Government Subsidy Bonds) is fully described on page 1113 of this week's issue. The statement of Resources and Liabilities at the close of the fiscal year is as follows:

RESOURCES.

Miscellaneous investments and assets		$2,884,338 08
Cash in hands of treasurer and agents		155,705 82
Value of material on hand		216,961 56
Bills receivable		364,252 87
Due from U. S. Gov.	$327,174 82	
Less fifty per cent to be retained by U. S. Treasury Department.	163,587 41	
		163,587 41
Due from foreign roads		332,721 94
Total		$4,117,567 68

LIABILITIES.

Bills payable, and loans	$2,584,365 10
Auditor's checks in circulation	170,527 77
Due on audited accounts, pay rolls, unclaimed wages and coupons	781,719 44
Due to foreign roads	51,093 97
Excess of resources over liabilities	529,861 40
Total as above	$4,117,567 68

President.—Robert E. Carr.

Vice President.—Adolphus Meier.

Directors.—Robert E. Carr, Adolphus Meier, Carlos S. Greeley, John D. Perry, S. M. Edgell, R. W. Lewis, Jr., and F. W. Meister, of St Louis, Mo.; Thomas A. Scott, Matthew Baird, Philadelphia, Pa.

Treasurer.—Carlos S. Greeley.

Auditor.—S. T. Smith.

Secretary.—Chas. B. Lamborn.

General Sup't.—Edmund S. Bowen.

☞ The directors of the Fall River Railroad met at New Bedford on the 29th ult., and completed a reorganization made necessary by a change in the articles of association, caused by the adoption of a new route. The following are the directors: J. A. Beauvais, John H. Perry, Charles R. Tucker, Lewis S. Judd, Geo. Wilson, George A. Bourne, L. M. Kollock, Benj. H. Waite, and George R. Phillips. J. A. Beauvais is president and T. B. Fuller clerk and treasurer. The road is to be located at once and work begun as soon as the cities and towns interested give permission. This company is not the one which asks aid from the city, all of the stock being subscribed.

Preservation of Wood.—The Seeley-Pelton Process.

In our Detroit exchanges, we find in the official report of the doings of the common council of that city, some facts and testimony bearing on the subject of wood pavements, which at this time have special value and interest not only to the tax payers of New York, but all other cities that use, or contemplate using wood for paving purposes.

It appears that the board of common council appointed a committee consisting of the Mayor, the President of the board of public works, and the Controller, to proceed to different cities and examine into the merits of the different methods of preserving the wood from decay, as well as the various plans in use for laying down the same to resist the wear and tear of street traffic.

It is only to that part of the committee's report relating to the treatment of the wood that we desire now to direct attention.

After a careful analysis and comparison of the different methods in use, this committee seem to arrive at a very positive conclusion that the Seeley-Pelton process is superior to all others, not only in the simplicity and economy of its application, but in the subsequent durability of the blocks so treated.

Hence the committee recommend that in all future use of wood as a paving material, it be carbolized or treated by the method above referred to.

The city journals from which we derive these facts, also strongly endorse the Seeley-Pelton plan.

And from a pretty exhaustive investigation made into this same subject some time since, we can cordially add our testimony to the above.

In conclusion perhaps we cannot do better than append the following letter received by the president of the Board of Public Works from Gen. Cram, who had entire charge of the St. Clair Flats Ship Canal, and whose opinion upon this treating process ought to be entitled to great respect:

Gloucester, Mass., August 8, 1874.

Harvey King, Esq., President of Board Public Works, Detroit:

Dear Sir—Your letter of the 1st inst., has just been received. In reply I have briefly to say:

First—If wooden pavement is to be made in your city I think the best known process for preserving the block is the Seeley process of carbolic acidizing, which is what I used for the timber laid in dirt, on the St. Clair Flats work.

Second—I have none of my printed reports at hand setting forth the durability of wood subjected to this process or I would send you one, nor can I get into the full explanation of the process in a letter.

Third—In this country the process has not yet been tried long enough to say how long it will prevent timber and wood, subjected as a pavement would be, will last; but in Europe, it proved, after thirty-two years, as sound as when laid down, and how much longer it will last remains to be seen. Very truly, T. J. Cram.

Since the foregoing was in type, later papers have come to hand containing an official report of the final action of the Detroit common council, adopting the Seeley-Pelton process of preserving wood from decay, as the one to be hereafter exclusively used in that city. This is pretty strong, practical testimony, as we view it, in favor of that system:

Whereas, The Special Committee who visited Pittsburg and Cleveland by the authority of this Council did, in their report of August 11th, recommend that all wood used in the paving of streets in this city should be treated with the Seeley Pelton, or some other equally good preserving process, therefore be it

Resolved, That this Common Council do adopt the report made by said committee and its recommendations, and they do hereby request the Board of Public Works to adopt as a specification for all wood pavements that the wood shall be treated with dead oil by the Seeley-Pelton process, believing that this treatment will result in a great saving of money to the taxpayers by preserving the wood from decay, and making it unnecessary to repave only at long intervals.

Laid on the table.

On motion of Ald. Thompson the resolution requesting the Board of Public Works to adopt as specifications for all wood pavements that the wood shall be treated with dead oil by the Seeley-Pelton process, was taken from the table and he moved its adoption.

Ald. Daly moved to amend by excepting cedar blocks from the requirements of the resolution.

The resolution as amended, was adopted.

Alabama and Chattanooga Railroad.

Justice Joseph P. Bradley, of the Supreme Court of the United States, has issued an order removing the present receivers, Abraham Murdock and A. Foster Elliot, and placing the trustees of the first mortgage bonds of the Alabama and Chattanooga Railroad Company in possession. The order also postpones the sale heretofore ordered until after the next meeting of the court, and removes the limit heretofore placed on the sale. It is therefore allowed that the bondholders shall obtain the best price possible subject to the receiver's certificates and court charges, which are a prior lien to the first mortgage bonds. The order also authorizes the Trustees to purchase the property for the protection of the bondholders in case it should become necessary, subject to the outstanding certificates and charges, and also that the bids of the Trustees shall inure to the benefit of the holders of the first mortgage bonds, who shall surrender their bonds to the Trustees for the purchase of the road.

☞ The annual meeting of the stockholders of the Consolidated European and North American Railway Company was held in Bangor, Me., on the 25th ult., and the following board of directors were elected for the ensuing year:—George K. Jewett, M. S. Drummond, A. Jardine, J. R. Ruel, E. R. Burpee, T. R. Jones, R. Robinson, A. Thompson, C. P. Stetson, Noah Woods, J. W. Emery, S. F. Hersey and W. G. Case. Subsequently Hon. G. K. Jewett was elected President, and Hon. Noah Woods, Treasurer of the company.

☞ The *Pajaronian* says that Messrs. F. A. Hihn and T. Hale, of the Santa Cruz Narrow Gauge Railroad, are seemingly pushing the work ahead in a manner very satisfactory to the stockholders. A number of prominent citizens of Santa Cruz lately passed over the road on invitation of Mr. Hihn, the President.

☞ The first construction train on the Lowell and Andover Railroad passed over a portion of the road on the 27th ult. It is expected that the road will be fully completed for travel by November.

Railroad Law.

RAILROAD COMPANIES—RESPONSIBILITY TO EMPLOYEES—CARE REQUIRED IN MAKING UP TRAINS.

The opinion in the late case of Flike *vs.* Boston and Albany R. R. Co., (53 N. Y., 549), is as follows:

The plaintiff's intestate was a fireman upon a freight train upon defendant's road, which left Albany at an early hour on a cold day. Some miles east of Albany eleven cars of another freight train, a short distance in advance, became accidentally detached and ran back and collided with the train on which the deceased was employed, by means of which he was killed. The evidence tended to show that the former train was deficient in brakemen; that but two were aboard when there should have been three, which was the usual number, and that if a third brakeman had been there he would have been stationed on the eleven runaway cars, and with the brakeman on them could have controlled their impetus and prevented the accident. The company had at Albany an agent, called a head conductor, whose business it was to make up the morning trains, hire and station the brakemen and generally to prepare and despatch these trains.

The general rule that the employer is not liable to one servant or laborer for an injury resulting from the carelessness or negligence of another servant or co-laborer has been recently so fully considered by this Court in the two cases of Lanning *vs.* N. Y. C. R. R. Co. (49 N. Y., 521), and Brickner *vs.* The Same (49 id., 672), that discussion is unnecessary except as far as may be pertinent to determine its application to the facts of this case. This doctrine was first promulgated in England in 1837, (3 M. & W., 1), in South Carolina in 1841, (1 McCollum, 385), and in Massachusetts in 1842 (4 Met, 49), and has been adopted in this and of the other States in the Union. There has been a diversity of reasons given for its adoption, which have led to some confusion in its application. The reasons for the rule are well stated by Pratt, J., in the first case in which it was applied in this State (6 Barb., 231), and were in substance that the rule *respondeat superior* does not itself spring directly from principles of natural justice and equity, but has been established upon principles of expediency and public policy for the protection of the community; and that in view of the unjust consequences which may ensue from its application for injuries by co-servants, the same principles of public policy demand its limitation, and that while the general rule was demanded for the protection of the community, the exception is demanded for the protection of the employer, especially in view of the manner in which the principal business of the country is now transacted. This view evinces the flexibility of the principles of the Common Law, which are capable of adaptation to new or changed circumstances and enables Courts to adjust the application of the principle not in obedience to a supposed arbitrary rule, but with such limitations and qualification, as best accord with reason and justice. In applying the rule we should be cautious not to violate the very principles upon which it is founded. While shielding the employer from unjust and burdensome liabilities, we should not withhold all redress from the employed for carelessness and carelessness in respect to duties which fairly devolve upon the former as the principal, and over which the latter have no control. In 5 M. H. & G., 852, the Court very justly said: "Though we have said that a master is not generally responsible to a servant for an injury occasioned by a fellow servant while they are acting in one common service, yet this must be taken with the qualification that the master shall have taken due care not to expose his servants to unreasonable risks."

The master is liable if his own negligence or want of care produces the injury, and this may be manifested by employing unfit servants or agents, or furnishing improper or unsafe machinery, implements, facilities or materials for the use of the servant, (25 N. Y., 562; 391 id., 468). It was at first doubted by this Court whether the exemption should not be limited to injuries by servants whose employment was the same (1 Seld, 492 per Gardiner, J.) but it has since been repeatedly held that injuries by servants or agents, engaged in the same general business or enterprise, are within the exemption. (Id.) Hence the difficulty of applying the rule in actions against corporations whose whole business can only be transacted by agents who are in some sense co-servants. In 39 N. Y., *supra*, the Court decided that a corporation was liable if negligence causing an injury to a subordinate servant could be imputed to the Directors, but did not establish any definite rule on the subject. The true rule, I apprehend, is to hold the corporation liable for negligence or want of proper care in respect to such acts and duties as it is required to perform and discharge as master or principal, without regard to the rank or title of the agent intrusted with their performance. As to such acts the agent occupies the place of the corporation, and the latter should be deemed present, and consequently liable for the manner in which they are performed. If an agent employ's unfit servants his fault is that of the corporation, because it occurred in the performance of the principals duty, although only an agent himself. So in providing machinery or materials, and in the general arrangement and management of the business, he is in the discharge of his duty pertaining to the principal.

In the case before us it was clearly the duty of the corporation, in making up and despatching the advance train, to supply it with suitable machinery and sufficient help for the business and journey which it was about to undertake; and if there was any want of care in these respects, which caused the injury, it is liable. Rockefeller had the general charge of this business, and, within the principle decided in the Lading case, represented the corporation itself.

It is claimed, by the counsel for the appellant, that the company are not liable, because the agent had in fact, employed a third brakeman to go upon this train, who, by reason of oversleeping, failed to get aboard in time, and hence, that the injury must be attributed to his negligence, or, if attributable to the negligence of the general agent in not supplying his place by another man, such negligence must be regarded as committed while acting in the capacity of a mere co-servant, within the doctrine of irresponsibility. Neither of these positions is tenable. The hiring of a third brakeman was only one of the steps proper to be taken to discharge the principal's duty which was to supply with sufficient help and machinery, and properly despatch the train in question, and the duty remained to be performed, although the hired brakeman failed to wake up in time, or was sick, or failed to appear for any other reason. It was negligent for the company to start the train without sufficient help. The acts of Rockefeller cannot be divided up, and a part of them regarded as those of the company, and the other part as those of a co-servant merely, for the obvious reason that all his acts constituted but a single duty. His acts were indivisible, and the attempt to create a distinction in their character would involve a refinement in favor of corporate immunity not warranted by reason of authority. As well might the company be relieved if the train was started without an engineer, or without brakes, or with a defective engine. The same duty rested upon the company, though every man employed had died or run away during the night, and if negligent in discharging it, either by acts of commission or omission, whether in employing improper help, or not enough of it, or in not requiring their presence upon the train, it is upon every just principle, responsible for the consequences. Nor is the company relieved, although negligence may be imputed to the defaulting brakeman. The only effect of that circumstance would be to make the negligence contributory with the brakeman, but would not effect the liability of the company. It is unnecessary, therefore, to enquire, whether the sleeping brakeman was so engaged in the common service as that the defendants could be exempted from liability if the injury was solely attributable to his neglect.

Assuming that the facts are as the jury must have found, the liability of the company is clear. These heavy freight trains were dispatched only five minutes apart, and traversed a very heavy grade, and were liable, especially in cold weather, to precisely such accidents as did occur, in which event collision, with fatal results, were almost certain to ensue. The principal protection in such cases is the prompt and efficient application of the brakes, and the utmost care should be exercised in providing a sufficient number of reliable men to perform this duty. If we were called upon to spell out a contract between the parties, it would be implied that the company agreed to use proper care not to expose the deceased to risks of this character. He was engaged upon another train in the discharge of his duty, and was not only in no way connected with the broken train, but he could neither know or provide against the defect.

No authority has been cited which would justify us in relieving the defendant from this liability, nor have I been able to find any. In 3 Cush., 270, the Supreme Court of Massachusetts intimate, although it was unnecessary to decide that a railroad company is liable for an injury to an employe, caused by a deficiency of help upon another train.

Mr. Redfield, in a note in a recent edition of his work on railways, expresses the opinion that corporations should be regarded as constructively present in all acts performed by their general agents, within the range of their employment; and the tendency of judicial, while it adheres to the general rule of irresponsibility, is against extending it.

Houston and Texas Central Railroad.

The great through line of railway in the State of Texas, is the one whose name heads this article. With its initial point at the city of Houston, it has its northern terminus at Red River on the border of the Indian Territory, there connecting with the Missouri, Kansas and Texas Railway, one of the livest and best managed roads of the country. The Houston and Texas Central Railroad is a very important link in the vast chain of roads reaching St. Louis from the south and west.

This long railway line and its completed branches, runs through Harris, Washington, Bastrop, Travis, Grimes, Brazos, Robertson, Fall, McLennan, Limestone, Freestone, Navarro, Ellis, Dallas, Collin and Grayson counties; seventeen counties, larger than many of our other States, and as rich agricultural counties as can be found in the State of Texas. The entire region that lies adjacent and pays tribute to this road is a great corn and cotton country. Along and near its line most magnificent farms are springing into existence; extensive orchards are showing golden fruit; the cotton gin and compress are being put into operation. Cities and towns are growing up rapidly, and manufacturing industries being established. The road penetrates a region rich in iron and other ores, marble, building stone, fire clay, ochre paints and other valuable substances. The connecting and branch feeders will go into regions rich in lead, copper and silver. There is no portion of the State now traversed by the Houston and Texas Central Railroad or will be by its branches, but what may be considered the best of pasture land. Portions of the country are heavily timbered with pine, cedar and hard woods.

There are millions of acres of the finest lands owned by the railroad company, that can be bought on the most liberal terms, and at low prices. There are millions more belonging to the State that can be entered at $1 an acre, but the best has been picked up. We have visited every county traversed by the road, and many of those where its branches are to be constructed, and we feel safe in saying that there is no region at this time offering superior advantages to the immigrant. We know of no region where a little money will buy as much, or large investments meet with so great reward. In the counties of Fall, McLennan, Bastrop, Washington and Brazos, there are cheap and splendid tracts to be had very low, and they are the best of corn and cotton lands. In Johnson, Tarrant, Hill, Ellis, Dallas and Grayson, there are splendid wheat, oats, corn, cotton and pasture lands.

With Mr. Baker overlooking the General Management, and Mr. Durand filling the place of General Superintendent, the Houston and Texas Central will meet with the success it deserves. Whenever there is promise of business from any point that will warrant special rates, they are cheerfully given. The Trenton group of limestones near Austin, afford a most splendid and durable stone for street curbing purposes, for flagging and paving. This rock is now being put down in Galveston at much cheaper rates than any other article. The distance is something near 210 miles, and the Houston and Texas Central Railroad Company give rates by which this stone is laid down so cheaply in the Island City of the Gulf.

Arrangements have been entered into by which low freights will be secured from any portion of Texas over this road and the Missouri, Kansas and Texas Railway for St. Louis, or from that city and other points to the southwest. With an immense business already secured, the rush of immigration pouring in to settle and develop the State of Texas, this road, ten years hence, will have more freight and passenger travel than one track can accommodate.—*St. Louis Railway Register.*

☞ The Secretary of the Treasury will sell $8,000,000 in gold during September, namely: $1,000,000 on the first and second Thursdays, and $500,000 on the third and fourth Thursdays during the month.

Grain Trade of Baltimore.

The extension of the Baltimore and Ohio Railroad to Chicago is now so nearly completed that in a few weeks the entire line will be open to traffic. This new route, leaving the Central Ohio and Lake Erie division of the Baltimore and Ohio road at Centerton, follows almost an air line at about an equal distance from the Lake Shore road on the north and the Pittsburg and Fort Wayne on the south, making a distance from Centerton to Chicago of 268 miles, crossing in its course thirteen other lines of railroad, with one of which—the Toledo and Wabash—by making a running connection, it can offer a line from Toledo to Chicago thirteen miles shorter than that of the Lake Shore and Michigan Southern or any other existing line. The company are building elevators at the points of connection with other roads as well as at Chicago, and are making every preparation to compete for the grain trade of that section. The distances from Chicago to Philadelphia, from Chicago to Baltimore and from Chicago to New York by the various lines are as follows: To Philadelphia, via Pennsylvania Railroad, 810 miles; to Baltimore, via Baltimore and Ohio, 815 miles; to New York, via N. Y. Central and Lake Shore, 982 miles; to New York, via N. Y. Central and Michigan Central, 972 miles; to New York, via Erie and its connections, 961 miles. In speaking of this new enterprise the Chicago *Tribune* remarks that the completion of the line "is an event of the greatest consequence to Chicago and the country tributary. The new line to the seaboard is some miles shorter than any of the old ones, except that to this city by the Pennsylvania Railroad. It has the additional advantage of leading to a port at which the elevator charges are comparatively moderate and where there is no expensive lighterage system," as at New York. This new enterprise has been going forward for more than a year past, though it has failed to attract the attention we think it deserves of the other Atlantic cities doing business in competition with Baltimore. The grain trade of Baltimore has largely increased, as will be seen by the following tabular statement of exports, and proves the importance of the action of the Baltimore and Ohio Railroad Company in its now nearly completed extension to Chicago.

	1870.	1871.	1872.
New York....	19,310,143	34,919,348	89,608,249
Philadelphia .	445,925	2,810,711	3,885,183
Boston	16,866	995,629	1,825 689
Baltimore..	....	3,004,868	5,232,168

It is in this grain trade that the ambition of Baltimore is most distinctly marked, as the construction of her elevators, piers and other works point out.

☞ The first meeting of the corporators of the Messalonskee and Kennebec Railroad Company was held in Augusta, Me., on the 31st of August. E. F. Pillsbury, Esq., presided, and William Atkinson was Secretary. The charter granted by the last Legislature was accepted and a Board of Directors chosen. A committee was appointed to draft by-laws and the sense of the meeting was that the road must be built.

☞ Ten miles of the Wyandotte, Kansas City and Northwestern Railroad, extending from Kansas City to Independence, have been completed. Regular trains are running over this finished section. It is proposed to build 34 miles more of road, from Independence east to the coal fields of Lafayette county, this fall. The gauge of the road is three feet.

Gt. Western (Canada) Railway.

The Toronto, Ontario, *Globe* of August 31, has a special dispatch from London, England, via Farther Point, dated Aug. 30. The reply to the Committee of Investigation into the affairs of the Great Western Railway Company has been issued by the Directors. The board review in detail all the matters referred to by the committee, and state that, while liable to err like other men, they have always striven to promote the company's interest to the utmost of their power. They add that over certain events they had no control. They could not mitigate the rigor of the unprecedented Canadian Winter of 1872-73. They could not stop the rapid advance of the price paid for labor and materials of all kinds. They could do no more than they did to ward off the construction of through routes by competing companies; and, above all, they could not foresee or control the aggravated financial American crisis of last Autumn, from the effects of which the property is at the present moment, in common with all other railways in this part of the world, suffering severely. A large amount of capital, expended in improving accommodations for a rapidly-increasing traffic, which the contractors were informed had no limit except the ability of the company to carry it, is for the moment partially unproductive; but when the present depression passes away and the ordinary course of trade is resumed, there can be no doubt that every shilling which has been laid out will yield an adequate return to the stockholders.

The Railway Troubles at Clifton.

Referring to the settlement of the difficulties between the Great Western and Canada Southern Railways concerning the right of way across the narrow strip of ground near the Suspension Bridge, the Buffalo *Express* says: The affair, which had a very bad look from a distance, does not seem to have been very seriously regarded by the men on the ground, as the employes of the conflicting companies are said to have spent much of the time when work was stopped drinking beer and joking each other over their belligerent attitudes. All good things must end, however, and so did the 'war,' and early this week the wrecked engine was removed and work was resumed. The terms upon which the adjustment of difficulties is made are private. The representatives of the two roads met at the scene of the difficulty and settled that the Canada Southern Company should have the right to lay their tracks to the bridge, as they had attempted to do before; but what consideration or reason led the Great Western Company to withdraw its objection is not stated. It also appears from the terms of the settlement that instead of the Great Western Company having a lease of the bridge, as heretofore, the Canada Southern now has an equal right to it, and each company will pay for its use in proportion to the freight it carries over it. But little work was necessary to connect the Canada Southern track with the bridge, and that work has already been completed. Connections have also been made by the Southern road with the New York Central and Erie roads, and the work of making connections with the International Bridge is under way, the necessary arrangements to that end having been completed.

☞ The preliminary surveys for the Spartanburg and Asheville Railroad from Spartanburg, S. C., northwest to Asheville, N. C., have been completed. Two lines were surveyed and estimates made for both. The estimated cost of the line by way of Columbus, North Carolina, is $1,000,757, and of the line by the Warrior and North Pacolet, $865,280. C. C. Memminger is president of the company.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included in that headed "Railroad." A dash (—) across the column signifies "nil," and running dots (.....) signify "not ascertained." Land Grant Railroads are printed in *Italics*. State and Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, September 5, 1874.

Stock Exchange and Money Market.

The Stock Exchange dealings have been increasing in volume, on a generally buoyant market; and business in Produce and Merchandise has also been more animated. The demand for Money has been consequently more active, but not yet equal to the prompt employment of the unusually liberal balances which have accumulated at this centre; and borrowers, in good standing have experienced very little difficulty in procuring all necessary aid on the previous basis of 2@3 per cent on call to the leading Street firms, and 5@7 per cent per annum on the best mercantile credits. There have been some further shipments of currency to the interior, to be used in forwarding to market the product of our bountiful harvests. The City banks, last week, enlarged their deposit line while further contracting their specie and loan and discount averages. They likewise augmented their reserve of legal tender, while contracting their item of circulation slightly. The U. S. Sub-Treasury again increased both its currency and specie reserves, handsomely. The City banks, last week, increased their reserve of legal tender notes $1,891,000, their deposit item $3,051,400, and reduced their specie average $916,800. They also report a decrease of $256,200 in the loans and discounts, and $16,700 in their circulation. The U. S. Sub Treasury in this city closed the week with a currency balance of $63,030,327, against $62,254,381 the preceding week; and a coin hoard of $53,258,273, against $52,212,785, on the previous return. The City bank exchanges, during the week, were $327,151,644, or a daily average of $53,351,578. The customs revenue of the port, during the week, was $2,987,817. The City banks reported their average of gold last week at $18,638,100, and their greenback average at $67,282,600. Their deposits stood at $235,000,100. The loan item was $278,319,800. The circulation was $25,803,300.

The business at the U. S. Sub Treasury in August embraced receipts from all sources of $48,860,913, including $12,058,813 from customs; and disbursements on all accounts of $41,500,455, including on interest account $4,114,942. The balance on hand at the close of business on Monday amounted to $117 489,565 61, of which $97,251,436 22 are to the credit of the United States, $17,606,951 23 to disbursing accounts, $2,472,824 88 to the Assay Office, and $108,303 28 to interest accounts.

The aggregate of the outstanding U. S. currency, of all denominations, Sept. 1, was $428,422,258. The outstanding amount of legal tender notes is 382 millions. The National bank circulation is over 350 millions.

The income of the Government, from internal revenues, thus far, in the fiscal year, commencing with July 1, 1874, has been over 18¼ millions.

The Treasury balances at the opening of business on Tuesday were as follows: currency, $16,619,232; special deposit of legal tenders for the redemption of certificates of deposit, $58,690,000; coin, $71,083,929, including $29,141,200 in coin certificates.

The Gold movement has been comparatively tame and uninteresting, the fluctuation in the price having been unimportant; while the demand from all sources other than for custom house purposes has been limited. The extremes of the price have been 109½@109⅞, closing at 109¾, as against 109¾ on Wednesday of the preceding week. The specie outflow, last week, was only $642,456. The imports of specie at this port since Jan. 1, have been $3,253,946. The customs demand for Gold last week averaged $500,000 a day. Foreign Exchange has been in less confident demand, with Bankers' sixty day bills on London closing weak on Wednesday at $4 86¼@$4 86⅛; sight bills on London at @4 89@$4 89⅛ to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $5,588,067.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $9,525,261.

Government securities have been in fair investment demand, and held with increasing firmness. The Public Debt Statement of Sept. 1, shows a further liquidation in August of $1,626,761, and since June 30th 1874, of $2,909,627.

U. S sixes of 1881 closed on Wednesday of this week at 118⅜@118⅝; U. S. Five-Twenties of 1862, 112⅛@112¾; U. S. Five-Twenties of 1864 at 116@116½; U. S. FiveTwenties of 1865, 116⅞@117¼; U. S. Five-Twenties of 1865 consolidated, 116⅜@116⅝; U. S. Five-Twenties of 1867, 117⅛@117¾; U. S. Five Twenties of 1868, 117⅝@117⅞; U. S. Ten-forties at 111⅝@111¾; U. S. Fives of 1881, (Funding Loan) 112⅜@112⅝; Six per cent. currency Sixes from 117⅝@117⅞.

State and Railway bonds have been in quite moderate request at about steady rates. Railway and miscellaneous share property has been decidedly more active and quoted much stronger and quite buoyant in price toward the close. The exchanges of Union Pacific incomes for Sinking Funds have been continued both here and in Boston, the total conversions aggregating nearly $8,000,000. The interest was promptly paid in both cities where the exchanges were made.

General business has been more active in produce and merchandise. Breadstuffs have been more confidently sought after, closing more firmly. Cotton has been unsettled in price, on a somewhat restricted trade, closing heavily. Provisions have been fairly active. Petroleum, Naval Stores, and Tobacco in good request. Metals have been attracting rather more attention. Ingot Copper has advanced to 21@21¼ cts per lb. Scotch Pig Iron has been held higher on a very light supply, but has been quiet. American dull and weak. Eglinton Pig Iron quoted at $35; Glengarnock, $37; Sumerlee, $36; No. 1 American Pig at $31@$32, No. 2 do. at $27@$29; Forge, $25@$27; English Rails at $50@$52, gold; American Rails at works, $57 50@$62 50; Old Rails, $34@$38. Wrought Scrap, $33@$35. Sales have been made of 400 tons of Wrought Scrap, port at $33. Ocean freights have been moderately active, but at easier rates. Wool, in fair demand and firmer.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Railroads of Ohio.

At the annual meeting of stockholders of the Cincinnati and Great Northern Railroad at Van Wert, Ohio, on the 29th ult., the following Directors were elected: J. R. Carson, New York; R. C. McMullen and T. P. Roberts, Pittsburg; Judge Latimer, Defiance; T. P. Turpen and W. A. Weston, Greenville; Davis Johnson, Van Wert; John A. Hubbard, President, of West Virginia. The directors decided to build twenty-four miles of road at once, which will take it to the crossing of the Wabash road in Paulding county.

It has been proposed to change the name of the Wheeling and Lake Erie Railroad to "Ohio City and Lake Erie."

The first coal train from the Mahoning Valley over the Painesville and Youngstown Narrow Gauge Railway passed over the line a few days ago.

The iron for the Atlantic and Lake Erie Railroad has been received at New Lexington. Iron enough has been shipped to lay the track as far as Moxahala.

The iron and rolling stock of the Carrollton and Ohio Railroad was sold recently to Edwin Reed, of Wood county, to be used in the construction of a branch road.

The entire engineer corps on the Pittsburg and Youngstown road has been transferred to the unfinished portion between Niles and Youngstown. The whole line will be completed and in running order by the last of September.

The Toledo and Maumee narrow gauge railroad is completed and in operation.

The Wheeling and Lake Erie road has been permanently located from Lodi to Milan.

Statement of the Public Debt of the United States September 1, 1874.

DEBT BEARING COIN INTEREST.

	Amount Outstanding.	Accrued Interest.

Totals	$64,623,512 00	$646,235 12

Interest paid by United States, $24,325,896 98; interest repaid by transportation of mails, &c., $5,388,092 54; balance of interest paid by United States, $18,936,704 44.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, August 31, 1874.

B. H. BRISTOW,
Secretary of the Treasury.

☞ There has been put on record in Indiana a consolidated mortgage on the Cleveland, Columbus, Cincinnati and Indianapolis for $7,500,000. The new mortgage is intended to cover the existing mortgages which amount to about $3,450,000, and a new issue of $4,050,000. Of the bonds to be issued under the new mortgage a sufficient number is to be retained to exchange for all outstanding issues.

☞ Mr. F. G. Palmer has secured the contract for building the Lake View and Collamer railroad, except depot and equipment, for $54,700; the work to be done by July 1, 1875. This road is to be seven miles long, from Cleveland, Ohio, east to Euclid. It is to be of 3-feet gauge and is intended for suburban passenger travel.

☞ The survey for the Worcester County Central Railroad is nearly completed. The road is to run from Worcester through Leicester, Spencer, North Brookfield, New Braintree and Hardwick, intersecting the Massachusetts Central Railroad at Furnace Village, in the last named town.

☞ The resignation of R. S. Bowen, Superintendent of the Kansas Pacific railway, was announced at Kansas City, on the 21st of August.

New York and Oswego Midland Railroad.

The report of the special committee of the first mortgage bondholders of the New York and Oswego Midland Railroad, made on the 28th ult., at the meeting in the Cooper Institute, embraced the following basis for reorganizing the company:

First—That the control and management of the road should be left in the hands of the first mortgage bondholders until the regular payment of interest on the bonds is secured.

Second—That holders the first mortgage bonds and Receiver's certificates should have new first mortgage bonds given them, which should bear coupons from as early a date as possible.

Third—That before the property of the company be mortgaged, money should be raised on it to secure the proper repairing and finishing of the road.

Fourth—Junior securities and outstanding indebtedness shall come in the exact order of their respective priority.

Fifth—That the Western Extension be regarded as a separate undertaking, having no relation to first mortgages, but that there should be some recognition among junior securities, invested on the main road.

The debate on adopting the above plans was long. Those in favor thought delay disastrous. After numerous motions and votes the plans proposed were adopted, and the committee who made the report were instructed to select five competent persons to act as trustees of the road.

Agricultural Machines.

The Chicago *Inter-Ocean* mentions that one of the symptons of a revival of trade generally is the increase in the volume of sales of iron in the last month, and adds:

This evidence is corroborated by what we learn in regard to some of the agricultural implement and machine makers. Thus we hear of several reaper factories that are not able to fill the orders that are now pouring in upon them. The movement of the grangers to buy by the wholesale, and to compel manufacturers to sell at low prices only, had the effect of alarming some of them so that they reduced their scale of operations, and the supply of many kinds of agricultural machines and implements has been so reduced that it is not equal to the present demand. We may therefore expect increased activity in this and cognate lines of business.

☞ The Los Angeles *Herald* says: "The tunnel through which the Southern Pacific will pass out of and into San Fernando valley will be nearly a mile in length, and will run through a range of hills out of which coal oil is constantly oozing. Experienced oil miners are confident that the tunnel will tap so many small veins of oil that a considerable quantity of crude petroleum will run steadily from its mouth. One enthusiastic San Fernandan predicts that the oil from the tunnel will flood the San Fernando valley. Certain it is that the oil is exuding from the mountain through which the tunnel must be cut."

☞ The Ohio Comet Silver Mining company, of Washington, C. H., with a capital stock of $100,000, in shares of $1,000 each, filed a certificate of incorporation with the Secretary of State at Columbus, Ohio, on the 18th inst. The mining and manufacturing establishment of the company will be located in Griffith Mining district, Clear Creek county, near Georgetown, Colorado. The corporators are John L. Van Demen, John N. Van Demen, H. P. Ustick, George Dahl and John A. Hamilton.

Belleville and Northern Hastings Railway.

The provisional board of directors of this company was organized in Belleville, Canada, on the 12th ult., and the following gentlemen were elected. Mr. A. F. Wood, Warden of the County, President; Mr. James Brown, M. P., Vice President; Mr. N. B. Falkiner, Solicitor; Mr. Jas. Young, Manager of the Royal Canadian Bank, Treasurer. Stock books were opened and stock taken to the amount of $170,000, ten per cent of which has been paid into the Royal Canadian Bank. The survey is to be proceeded with at once. This road is to connect with the Grand Junction Railway at some point east of Stirling, and run thence to the iron mines of Madoc and Pardee. A large proprietor of coal and iron in Lehigh Valley, Penn., has taken $100,000 worth of stock in the road. The company will run fifteen miles over the Grand Junction from Belleville, upon which road work is now being pushed ahead as fast as possible, the track being already completed through a portion of the town. They also have upwards of 15,000 tons of rails now at the dock ready for laying, and their own docks are being rapidly pushed towards completion.

Land Grants to Railroads.

It having been published that the Jackson, Lansing and Saginaw Railroad Company had forfeited the right to 180,000 acres of Government lands, we are credibly informed that that company had no interest in the lands in question. They were granted to a corporation which was to be called the Amboy, Lansing and Traverse Bay Railroad Company—the road to extend from Amboy, on the Indiana line, north through the State of Michigan. This road never was completed and the lands, if any, revert to the Government, and are the ones referred to as forfeited. The Jackson, Lansing and Saginaw Company purchased a portion of this road between Lansing and Owasso, with all its franchises, including the land grant applicable to that portion.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending August 22, at 328,150 tons, and for the coal year 11,436,094 tons against 12,266,601 tons to corresponding time last year, being a decrease of 880,607 tons. The bituminous tonnage for the week is 86,428 tons, and for the year 2,178,008 tons, against 1,974,491 tons to same time last year, giving a total of all kinds for the week of 414,578 tons, and for the year of 13,604,172 tons, against 14,241,092 tons to same time last year, being a decrease of 636,920 tons.

☞ The West Virginia Iron Company has been incorporated, with a capital stock of not less than ten thousand or more than two hundred thousand dollars, and is to mine, manufacture, and transport iron, coal, &c., along the line of the Washington, Cincinnati and St. Louis Railroad. The company will commence operations at once.

☞ The Attorney-General has decided that the revised statutes do not change the law as to the toll upon tonnage of vessels engaged in foreign commerce, and that now, as formerly, the said tax is only collectable upon the entry of such vessels, and not before their clearance, and is only collectable once in each year.

The New Fairmount Bridge.

The new bridge across the Schuylkill River at Callowhill street is well advanced towards completion. The stone-work of the eastern approach is finished except the laying of the coping stones of the upper wall, the coping-stones of the lower wall being laid except for a distance of about 40 feet. On this side the approach is graded, drain-pipes are being put in, and the work of curbing will begin this week and will shortly be followed by the paving. The Callowhill street abutment requires only the laying of the cornice for its completion.

Both the eastern towers on Callowhill street for the upper deck of the bridge are finished to the cornice, and between them and the river eight small granite shafts are ready to receive the columns which will support the iron work. The eastern river abutment is up to within one course of the bridge seat. On this abutment two towers will be raised, but the main span crossing the river can be placed in position before the completion of these towers. This span will be 348 feet long, and will be entirely supported by iron columns springing from the bridge seat. The false work for the raising of the iron work for the main span is all up.

For the foundation of the western abutment 600 piles have been driven, and there will be 60 or 80 more. The laying of the concrete has also been commenced. In preparing the foundation for this abutment part of the old bridge has been cut away, leaving one side for the passage of vehicles and pedestrians. On the west side of the river all the masonry, except the cornices on two of the towers, and all the supporting iron work, have been finished. The floor beams, or buckle for the upper floors, are yet to be put on.

Between the river and Thirtieth street are six towers and sixteen shafts, all sunk to the solid rock, at an average depth of 50 feet—the depth in some places being 60 feet below the surface. At Thirtieth street is a large pier, and west of it are four low piers for iron columns, with another large pier at the end. Here terminates the city's portion of the work, at a distance of 125 feet from the Pennsylvania Railroad, and begins that of the Pennsylvania Railroad. Engineers were yesterday surveying the ground for the location of the railroad company's share of the work.

Between the last city pier and the railroad the company will erect two low piers for iron columns and one high pier to support the span across the railroad track, which will be over 100 feet in length. West of the railroad the span will end at a large road abutment with side wings extending back about 35 feet to support the embankment of the roadway, and beyond this abutment the grade of the street will be raised to meet the level of the bridge. The stone and iron work done by the railroad company will correspond with that of the other portions of the new bridge.

The contractor for the city's portion of the mason work is Wm. M. Wiley, while the contract for that of the Pennsylvania Railroad is executed by Wiley & Smith. The railroad company's part of the stonework it is estimated will cost $70,000.—*Phila. Ledger, Aug.* 28.

☞ The Clarion (Penn.) *Democrat* says: "The Bennett's Branch is becoming a great thoroughfare. Besides two passenger and two freight trains each way, every day, there are four or five oil trains each way, making fifteen or sixteen trains a day on the road. The coal trade at New Bethelem, Reynoldsville, and other points along the line, is becoming extensive."

☞ The stockholders of the Cincinnati, Rockport and Southwestern Railway Company have elected the following Board of Directors: S. S. L'Hommedieu, A. H. Sabine, Jacob Seasongood, Wm. Hannaman, H. Lewis, F. Smith, F. M. Sabine, John A. Munn, Aquilla Jones, M. N. Moore, W. O. Rockwood, H. G. Hannaman, Clement Doane.

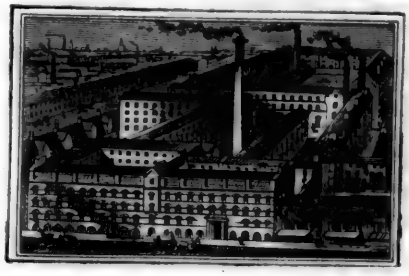
Texas Railways.

The Texas and Pacific railroad company have commenced work again west of Dallas, and will have the road ironed to Fort Worth as soon as it is possible to have it done.

The Missouri, Kansas and Texas railway are transporting coal for the Osage coal company from McAlister to various towns and cities in Texas.

Work is progressing favorably on the Galveston, Harrisburg and San Antonio railroad.

Denison has been determined upon as the terminus of the Houston and Texas Central railroad, and the permanent junction with the Missouri, Kansas and Texas railway.



The Missouri, Kansas and Texas railway at McAlister, are grading a track from that station out to their coal mines and coke ovens.

☞ At the regular meeting of the directors of the Maine Central Railroad Company, held August 25th, it was decided to build an iron bridge in place of the present wooden structure which spans the river at Ticonic Falls, Waterville, the work to be done by Clark, Reeves & Co., of Phoenixville, Pa., contractors for the new bridge just built at Waterville. The bridge will be built the present season, the rebuilding of the piers having already been begun.

☞ The contractors, Larochelle and Scott, are pushing forward the grading on the Levis and Kennebec Railroad from Levis, Quebec, southward. Much of the lumber required for buildings, fences and bridges was cut and brought out of the woods on the line last winter. A Howe truss bridge over the Echemin river at St. Anselm is contemplated. The rails are on the way from England, and two engines from the Rogers Locomotive Works at Paterson are on the road.

Baltimore and Ohio Railroad.

The Illinois Central Railroad Company is now laying an additional track from Hyde Park to this city for the use of the Baltimore and Ohio Railroad. It is also building a new freight depot for the use of the same company. The new building will front on South Water street, just east of the Michigan Central depot and opposite the Michigan Central offices. As the present grounds are used only temporarily, the building will be unpretentious. The dimensions will be as follows: Length 850 feet; width 52½ feet; heighth 20 feet. The foundations will be of stone, four feet above ground, and the walls will be of brick, 16 inches thick. It will be two stories high, and have a quarter-pitch roof, covered with slate. The track will be on the west side of the building. The passenger trains will enter the present Central depot.—*Chicago Tribune.*

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, U. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company

Union Pacific Railroad.

The assets of the Union Pacific Railroad Company are as follows:

Notes receivable	$7,655 66
Cash	225,878 02
Due from United States Treasury Department	515,267 12
Colorado Central Railroad bonds and stock	1,220,411 00
Utah Central Railroad stock	500,000 00
Utah Southern Railroad bonds	412,000 00
Omaha Bridge bonds	5,161 35
Union Pacific stock	8,244 13
Atlantic and Pacific Telegraph stock	2,420,080 00
St. Louis, Council Bluffs, and Omaha bonds	29,711 31
Douglas and Washington County bonds	170,000 00
Due from Central Pacific Railroad	87,170 71
Due from Utah Northern Pacific Railroad	64,311 02
Land agent and sundry accounts	5,400 00
Land notes to July 1, 1874	2,675,719 54
11,044,000 acres of land at $5 per acre	55,220,000 00
Total	$63,517,099 20

These assets are exclusive of the road, its equipments, and franchise. The land-grant notes, which are a mortgage upon the farms and improvements along the line of the road, have been increased from $2,042,606 in January, to $2,675,719 in July, an increase of $633,000 since Jan. 1, by the company's purchases. They now stand at a little over $,8000,000, and at the average price of the last three years the amount of land notes on hand would be sufficient to retire $3,500,000 more of the bonds. This would leave only $4,500,000 outstanding, and the sale of another million acres of land would entirely wipe out the land grants. Then the company would have 10,000,000 acres of land upon which the new sinking fund bonds would be a first mortgage. It would require the sale of only 2,500,000 acres to pay off the sinking fund bonds, leaving 7,500,000 acres for the stockholders.

Atlantic and Pacific Railroad.

The following table shows the earnings of the Atlantic and Pacific Railroad and leased lines for July and August, 1874, compared with the same months in 1873:

	July, 1873.	July, 1874.	Increase.
Earnings	$377,825 40	$387,358 37	
Less exp	260,057 71	249,664 31	
Net	$117,767 69	$137,694 06	—$19,926 37
	Aug. 1873.	Aug. 1874.	
Earnings	$438,168 19	$459,779 41	
Less exp	260,370 90	249,450 17	
Net	$177,797 29	$210,329 24	— 32,531 95
Total			$52,458 82
Net earnings for six months to June 30, 1873		$794,341 56	
For same period in 1874		888,725 79	—94,384 23
Increase of net earnings from Jan. 1 to Aug. 31, 1874, over corresponding months in 1873			$146,842 55

Baltimore and Drum Point Railroad.

Our readers will be pleased to learn that the directors of the Baltimore and Drum Point railroad have entered into contracts with Messrs. McDonald and others for the entire grading and construction of the road. The contractors are gentlemen of large means, who have had great experience in railroad building, having recently constructed the Valley road and other important works under the management of the Baltimore and Ohio railroad. The contracts in the present instance have been carefully prepared by the experienced vice-president of the road, Wm. R. Hutton, Esq., and there can be no doubt of faithful execution by the contractors. By discarding the heavy rail used by the great trunk lines, and using lighter rails and rolling stock, a saving of nearly a fourth of a million of dollars will be made on previous estimates of the cost of the work. We are reliably informed that the commissioners of Anne Arundel county will at their next meeting make the subscription of $200,000 authorized by the Legislature.—*Calvert County Journal.*

Illinois Central Railroad.

The statement of this Company for the month of August, 1874, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	2,048.11 for	$14,258 79
Acres Interest Fund Lands Sold	..... for	.....
Acres Free Lands Sold	..... for	.....
Total sales during the m'th of August, 1874	2,048.11 for	$14,258 79
To which add Town Lot Sales	..... for	....
Total of all	2,048.11 for	$14,258 79
Cash collected in August, 1874		$35,646 48

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois. 707 Miles.	In Iowa. 402 Miles.	Total. 1,109 Miles.
Freight	$386,979 00	$85,302 00	$472,281 00
Passengers	98,242 25	42,784 80	141,027 05
Mails	9,671 66	3,059 33	12,730 99
Other sources	80,328 34	2,440 67	82,769 01
Tot'l Aug. '74.	$575,221 25	$133,586 80	$708,808 05
Total actual earn'gs, Aug., 1873	$623,187 05	$146,560 65	$769,747 70

The San Jose Railroad.—The Shore Line to be Built.

We some time since stated that Wm. C. Ralston and Wm. Sharon had purchased the Burlingame tract, three miles this side of San Mateo, and that they designed laying out a new town there. The work is now in progress. The first and most important point was to secure much more frequent and rapid communication with the property, and this has finally been arranged. Sharon and Ralston have made an arrangement with the Southern Pacific Railroad Company, by which the trips are to be increased to six daily. Early and late trips will be made, the intention being to have the last train leave the city at 10½ or 11 P. M. The line of the Southern Pacific road is to be changed between the city and the Seventeen Mile House. The short line route—across South Beach, the Potrero, and South San Francisco—is to be immediately built; the right of way, where not

already secured in San Mateo County, now being arranged for. The rate of fare will be reduced to a very low figure, and every effort made to make the eastern portion of San Mateo County a suburb of this city. This will be a heavy blow to Oakland, and a great advantage to outside property southward, which has long languished for just such aid as the proposed change will give it. This change will also be of the greatest possible benefit to land contiguous to the railroad line all the way to San Jose. In this matter the railroad company will have placed the public under lasting obligations. This is the most important information bearing on the value of real estate southward, that we have had the pleasure of publishing for five years.—*San Francisco Real Estate Circular.*

Railroads of Ohio.

The survey of the proposed Massillon and Coshocton Railroad has been completed.

Upper Sandusky has subscribed $40,000 of the $75,000 necessary to secure the Wheeling and Lake Erie Railway.

Central Railroad and Banking Company of Georgia.

The earnings of the Central Railroad and Branches for the years ending November 30, 1872 and 1873 were as follows:

	1872.	1873.
Up through freights..	$302,698 12	$290,932 49

	$2,116,441 92	$2,689,158 25
Earnings less exp...	$1,142,514 49	$748,261 71

Compared with the year 1872, the gross earnings of all the roads show an increase of $178,463 55, with an increase in expenditures of $572,716 33, making a decrease in the net earnings of $394,252 78. The President in his report for the year 1873, says:

The earnings of your road and Bank, with those of the Southwestern and Upson County Railroads, for the past year, have been $3,489,398 03, as follows:

Central Railroad, Savannah Division.	$1,780,116 06
Central Railroad, Atlanta Division..	748,995 60
Central Railroad Bank....	51,978 07
Southwestern Railroad....	895,967 95
Upson County Railroad....	12,340 85
Total for roads and banks	$3,489,398 03

The expenses properly chargeable for the same period have been for Central Railroad, Savannah Division $1,097,709 84

Central Railroad, Atlanta Division.....	547,473 54	
Central Railroad Bank	22,943 80	
Southwestern Railroad	624,548 27	
Upson County Railr'd.	12,426 60	
		2,305,101 55
Leaving.....		$1,184,296 48

But in addition to the above expenses there have been payments made that belonged, fairly, to the previous year, with extraordinary payments that have fallen into this year's business, as follows:

Central Railroad, Savannah Division.....	$194,000 00	
Central Railroad, Atlanta Division....	150,000 00	
Southwestern Railroad.	63,000 00	
		407,000 00
Leaving net.....		$777,296 48

The very great increase in expenses over the previous year is accounted for by the General Superintendent, and your attention is specially called to his detailed statement of items that make up the excess. By the report of the Superintendent of the Atlanta Division, it will be seen that that part of the line has called for very heavy outlays, and yet there is necessity for a considerable amount of iron, to provide for the removal of that which has become so much worn, that it is difficult to keep the track up to the standard of a first class road. The complete reconstruction of all the tracks at Atlanta, with additional grading in order to obtain more room for new tracks, has been attended with considerable expense at that point, but all the improvements that have been made, were absolutely necessary to enable us to conduct the business with economy and dispatch, and it is yet necessary to erect a shelter over a portion of the transfer platform, for the protection of men and goods in inclement weather. It will also be necessary to erect a house at Atlanta for the protection of engines at as early a day as possible, the old house having been blown down by a severe gale on the night of November 16th. The loss by its destruction was but little as the roof was very temporary, and the walls had been so much damaged by fire when Atlanta was destroyed, that they were hardly safe.

The destruction of iron rails has become a very serious matter in the cost of maintaining our road, and from experience thus far it is feared that there is no remedy except by the use of steel. Early in the year the Board had this matter under consideration, and, judging from the trial of a small lot of re-rolled rails which had proved satisfactory, together with a proposition to guarantee the quality equal to the best imported iron, it was determined to obtain our year's supply by re-rolling, with the hope of better results than had been obtained from English rails, but from a recent inspection of those which have been in the track less than six months, it is feared that we shall be greatly disappointed. Your special attention is called to the remarks of the road master, on the Savannah Division, upon this subject, and to statistics furnished by him as to the durability of rails that we have laid during the last few years.

While upon this subject of expenses, it is proper to remark that the Board recognizes fully the necessity for reducing them as far as possible, and to that end instructions have been given to each of the Superintendents, to reduce wherever it is practicable, consistent with keeping up your property, and it is not doubted that the close of another year will show a very much more favorable result.

From the foregoing statement of earnings and expenses, it will readily be seen that the declaration of a dividend is wholly inconsistent with a prudent management of your financial affairs. This the Board regrets exceedingly, but it is beyond their power to change and it is believed to be sound policy, to place your financial condition beyond doubt rather than yield to the temptation of distributing money which has not been fairly earned.

In the last annual report a brief reference was made to securities held by the company, all of which appear in the balance sheets of the road and bank, but for a more clear understanding as to their exact character, the following detailed statement is given, and for the purpose of showing the entire amount, all investments are included outside of the Road and appurtenances. Large as this amount appears, it is believed that the outlay has been rendered necessary in order to protect the interests of your company.

Real estate, other than railroad and appurtenances—

Vale Royal property, cost $82,000, improvements $130,000, pays more than 10 per cent on	$300,000 00
Macon City property, valued at	122,000 00
Banking House....	50,000 00
West Broad street property, not in use of road, (city valuation)....	17,200 00
Purse street property, not in use of road, (city valuation).....	47,000 00
New street property, not in use of road, (city valuation).....	6,000 00
Canal lots property, not in use of road, (city valuation)....	8,000 00
Received from Macon and Western Railroad lots in Atlanta, Macon and Pulaski county....	47,500 00
	$597,700 00

Stocks—

4,900 shares Southwestern Railroad..	$490,000 00
241 shares Eatonton Branch R. R..	24,100 00
770 shares Macon and Western, now Central Railroad....	77,000 00
6,715 shares Mobile and Girard Railroad, at 25c....	167,875 00
1,555 shares Savannah, Griffin and North Alabama Railroad, at 25c...	38,875 00

Western Railroad Bonds, with Georgia Railroad and Banking Company—	
1st mortgage, $600,000, our half...	300,000 00
2d mortgage, $1,200,000, our half..	600,000 00
	$1,492,500 00
Total liability	$5,179,000 00

For the purpose of carrying out the union and consolidation of the Macon and Western Railroad Company with the Central Railroad and Banking Company of Georgia, as contemplated by the lease of the road of the former company to the latter, an Act was passed by the General Assembly of Georgia, approved August 24th 1872, prescribing certain terms for the union and consolidation of the two companies, under the name and charter of the Central Railroad and Banking Company of Georgia. In compliance with this Act the two companies were united by the formal action of the Board of Directors of the Central Railroad and Banking Company of Georgia, on the 26th day of November, 1872, and by the Stockholders and Board of Directors of the Macon and Western Railroad Company on the 7th day of January, 1873. The proceedings of both companies were duly certified to the Governor of the State, and are on file in the office of the Secretary of State.

By the report of Wm. R. Garrison, Esq., the company's agent for the management of its steamships, it will be seen that they continue to yield a profit, and the advantage resulting from their ownership by the company cannot be doubted. New York is, and will continue to be, the great commercial centre of the country. This being recognized, and the fact that there are numerous land routes from the South and Southwest, terminating at New York, the question to be settled is whether an all rail or rail and ocean transportation is the cheapest. This contest is upon us, and without the absolute control of ships, it would be quite out of our power to make the issue, which, it is believed, must ultimately be decided in our favor.

The company's steamboats on the Chattahoochee continue useful as outposts, and they are gradually refunding advances that were made while they had to encounter competition. The Southwestern Railroad made these advances, and its return has gone into the accounts of that company, but upon closing their books will inure to your benefit.

It will be seen by the report of Virgil Powers, Esq., Chief Engineer, that the branch to Perry has been completed, and the extension of the Southwestern road to Blakely is finished to Arlington, a point within about 14 miles of Blakely. As soon as it was seen that the very large amount necessary to be expended upon other parts of the line, would call for all the available means of the company, orders were given to stop this extension at Arlington, but it is hoped that more propitious times will return, so as to enable us to carry this extension to Blakely, as originally contemplated.

The Cashier's usual balance sheet from the books of the Bank, with his report, will show the result of operations in this department. The agencies at Macon and Albany have continued to act as valuable auxiliaries in the transaction of our business, but they, as well as the principal office, could be made much more useful, if we had the requisite capital to conduct them upon a scale commensurate with the demands that are made upon us for monied facilities.

The report of the General Superintendent of the Central Railroad will show, in detail, the business of the entire line under control of your company, as well as the condition of the road and its appurtenances under his immediate charge. The condition of the Southwestern Road and the Atlanta Division will be shown by reports of their respective Superintendents. By an examination of these reports it will be seen that we have had a most disastrous year in the way of accidents, and two of the most fatal were caused by gross carelessness on the part of the company's employees. The parties in fault in one of these cases were prosecuted, but upon trial they were acquitted. The public appear to regard a railroad as a person, that must suffer for every wrong act, but that its employees are in no way responsible, however much they may be in fault, forgetting, apparently, that, for the time, the company is represented by the very person who is in fault. Until public sentiment is changed in this particular, it will be vain to expect that care on the part of railroad employees which is necessary for the protection of life and property.

The improvement of the Vale Royal property rendered a connection between it and the city necessary. The City Council was therefore asked to open Canal street over the Savannah, Ogeeche and Altamaha Canal, and thence through its property to Musgrove Creek, the company agreeing to bridge the creek and thus make the shortest possible connection with the business part of the city. This the city declined to do, but agreed to open the street upon condition that the company would construct the bridge and build the road to the company's wharf, the city agreeing to keep up the bridge over the canal and the company to keep up the road from the canal to its wharf.

After mature deliberation the Board agreed to the terms proposed by the City Council, and the work was commenced early in the fall and is now so far completed that it has been brought into use. It will cost $3,525 00, and while it is believed that the expenditure ought to have been made by the city, I am fully satisfied that it will largely enhance the income from our wharf property.

Messrs. Wadley & Co., who have very extensive saw mills in Emanuel county, being desirous to obtain facilities to ship their lumber from this port without the necessity of draying through the city, proposed to the company the construction of a wharf on its property, specially for the lumber trade, and as an inducement offered to take the company's bonds at par to the extent of the cost of a wharf 500 feet in length and a track to it for the delivery of lumber; also to guarantee the shipment of 4,000,000 feet of lumber, annually for three years over the company's river road and from the wharf to be built, thus giving the road an income of $2,400 per annum on this improvement, which it was estimated would cost not far from $12,000. This proposition was accepted by the Board, and it is expected that the work will be completed early in January, at a cost of not much over $10,000.

The number of locomotives in use is stated at 103, viz: on the Central Railroad, 56; Atlanta division, 16; and Southwestern Railroad, 31. The number of cars is as follows: On the Central Railroad—28 first class and 15 second-class passenger and baggage, 5 mail, passenger and baggage, 19 baggage and package, 8 express, 589 box, 212 platform, 26 stock, 15 coal, 21 conductor's, 4 provision, 2 paymaster's and 2 construction cars; On the Atlanta Division—10 first-class and 8 second-class passenger, 4 baggage and mail, 2 express, 142 box, 41 platform, 6 conductor's, 16 stock, 11 coal and 2 construction cars; and on the Southwestern Railroad—17 first-class and 11 second-class passenger and baggage, 5 baggage and mail, 1 express, 231 box, 131 platform, 8 stock, 11 conductor's and 2 construction cars. The aggregate number of cars of all classes in use on all the roads is therefore 1,595, viz: 55 first-class and 29 second-class passenger, 14 mail and baggage, 19 baggage and package, 6 express, 962 box, 384 platform, 50 stock, 26 coal, 38 conductor's, 2 paymaster's, 4 provision and 6 construction cars. Adding the 133 box cars detailed for "Green Line" service, would make the whole number of cars owned by the company 1,728. The number of passengers carried was 131,404, viz: through, 1,544; way, 115,958. Number of bales of cotton moved, 477,448; pounds of guano, 94,358,025.

Gen'l Superintendent.—WM. ROGERS.

Auditor.—B. J. CUBBEDGE.

Treasurer.—H. C. CUNNINGHAM.

Finance and Taxation.

We give below a portion of a letter from ex-Secretary Hugh McCulloch, addressed to gentlemen in Cincinnati. The remainder will be published in our next issue.

PLAINFIELD, N. J., August 17, 1874.

GENTLEMEN—Your kind letter of the 25th ult., was forwarded to me from Fort Wayne after I had left. I regret that other engagements prevent me from accepting your flattering invitation to meet my fellow citizens of Cincinnati, with many of whom I was formerly connected by business and social ties, and to speak to them upon the interesting and what you term "perplexing" subjects of finance and taxation.

I am in no sense a teacher. My opinions upon these subjects are valuable only as the views of one who has given to them some thought, and who has been influenced in his conclusions neither by personal nor political (party) considerations. As, however, you desire an expression of them, and as I now find this cannot be given *viva voce*, I do not hesitate to express them in this manner.

It will be sufficient for my purpose to consider that you especially refer by "finance" to the currency and by "taxation" to the tariff, although this is but a limited view of the terms. From want of time I shall only be able to express the conclusions I have reached, without undertaking to give the facts or arguments on which they are based.

My opinions on the subject of the currency are well known by those who took the trouble to read my Fort Wayne speech, and my reports as Secretary of the Treasury from 1865 to 1869. The opinions I then expressed, in language as strong and unequivocal as I could command, have neither been changed nor modified. On the contrary they have been confirmed and strengthened by further observation and reflection. I thought it to be the duty of Congress, considering the subject in its moral as well as its financial bearings, to adopt decisive and effective measures to bring about specie payments, and that the time for the adoption of these measures was at the close of the war. I did not think that "the way to prepare to resume specie payment was to resume," but I did think it of vital importance to the best interests of the country that the restoration of the specie standard should be the end and aim of all legislation bearing upon the subject of the currency. My conviction was clear and decided that this could only be effected—within any reasonable time, and before such financial disaster as has recently occurred would overwhelm the country—by retiring so much of the paper currency in circulation as would be necessary to bring up the residue to par. I thought that this could be accomplished without the occurrence of the apprehended disaster to the business of the country, and without affecting in the least the real value of property; that by a curtailment of the amount of inconvertible notes in circulation the purchasing or measuring power of the remainder would be proportionately increased, and that consequently the amount of real money in circulation would not be thereby diminished; that the measuring property by a false standard could not add to its value, nor, by any a true standard reduce it. There was, it seemed to me, but one class in the community, the debtor class, who could be benefited by a depreciated currency, and I was anxious that decided action for relieving the country of such a currency should be taken immediately after the close of the war, when individual indebtedness was less than it had been for many years. It seemed to me, also, that the injury to this class from a reduction, and consequent improvement, of the currency, would be altogether less than was feared by them; that what honest and energetic debtors needed was not legislation to enable them to pay their debts in a depreciated currency, but legislation that would give activity to well directed, not speculative, enterprise, and stability to business; that as, in fact, one debt is, in the course of trade, usually paid by the the creation of another, and the general indebtedness of the people is not ordinarily, from year to year, materially reduced, the debtor class itself was in no serious danger of being injured by the elevation of the standard of values, and that if debtors were to be injured by it, the injury would be small in comparison with that which had been inflicted upon the creditors through the legal tender acts, which compelled them to receive, in satisfaction of existing contracts, a currency of far less value than that which was the only lawful money at the time they were made, and who generally bore their losses without murmuring, as a sacrifice required by the government in its struggles with a gigantic rebellion. At that time, in language which made up by explicitness what it may have lacked in strength, I pointed out the danger and the immoral influences of an inconvertible and depreciated currency. By every argument I could make, and every illustration I could bring to bear upon the subject, I endeavored to prove in each of my reports that a depreciated currency was, and never could be anything else than, a positive, unmistakable injury to the people, morally and financially; that in regard to such a currency there could be no "stand-still-until the country-grows-up-to-it" policy; that by wise legislation we should move toward specie payments, or by unwise laws, or by drifting without chart or compass, we should find ourselves upon financial breakers before we were conscious of immediate danger.

In my earliest utterances upon the financial question, in a free talk with my Fort Wayne friends, I remarked "that while I regarded an exclusive metallic currency, among an enterprising and commercial people, an impracticable thing, I regarded an irredeemable paper currency as an evil, which extreme circumstances for a season might render a necessity, but which should never be sustained as a policy; that the legal tender notes were issued as a war measure, and as the war had been brought to a successful termination, measures should be taken for retiring these notes altogether or bringing them up to the specie standard; that I had no faith in prosperity that was based upon depreciated paper money, and that I saw no safe path to tread but that which led to specie payments; that the extremely high prices prevailing in the United States were an unerring indication that we were measuring property by false standard, that the United States was becoming the best country in the world for foreigners to sell in, and the worst to buy in; that the longer inflation continued the more difficult would it be to get it back to the solid ground of specie payments; that if Congress should early in the approaching session (1865-6), authorize the funding of the legal tender notes, and the work of reduction should be commenced and carried on resolutely, but carefully and prudently, we should reach the solid ground without serious embarrassment to legitimate business. If not, we might have a brief period of hollow and seductive prosperity, resulting in widespread bankruptcy and disaster." Such were my sentiments then and such are they now.

The truth is, gentlemen, and the reiteration of it ought not to be necessary, gold and silver are the only standards of value, and as long as we are a part of the great family of nations and are a commercial people we can adopt no inferior standard without being greatly the loser by it. A sound currency is the very life-blood of a commercial people.

None but bankrupt nations, with the exception of the United States, keep in circulation an irredeemable paper currency—a currency which, in their cases tends to produce and perpetuate the poverty it indicates. To the United States such a currency is utterly disreputable, since there is not the slightest necessity for it. That a nation so rich as ours, so grand in its resources, so vast in its productions, a nation which has challenged the admiration of the civilized world by the rapid reduction of its public debt, commencing that reduction at the close of a war the most expensive that has ever been carried on, and actually reducing its indebtedness at the rate of nearly a $100,000,000 a year, that such a nation should, for so long a period, maintain a depreciated circulating medium, made lawful money by statute, is, to intelligent foreigners, an inexplicable mystery. The specie standard ought to have been restored before now, and I believe it would have been if that great power in the land, the press, had given the doctrines enunciated from the Treasury Department from 1865 to 1869 the hearty indorsement it has given to similar doctrines when proclaimed by the President in 1874.

If the financial trouble that has come upon us and the consequent prostration of the business in nearly all branches of trade, notwithstanding the plentifulness of currency, shall tend to correct the public sentiment in regard to the nature and offices of money, they will not be entirely without compensation. It required the sacrifice of a great war to uproot slavery; perhaps it required the experience of a great financial disaster to teach the people the danger of discarding the true measure of value, and substituting therefor the uncertain, fluctuating standard of irredeemable legal tender notes. It will be lamentable, indeed, if, instead of having profited by experience—our financial trouble, the result of our financial mistakes—we shall cause a still wider departure from the paths of wisdom and safety. Real money—and the world always has had, and ever will have, plenty of it for legitimate uses—leaves or avoids countries that have an inferior substitute for it, no matter what other standard may be adopted by law or how the fact may be attempted to be disguised, for the value of all property is still regulated by it. The Legal Tender act compels the people of the United States to treat the greenback dollar as if it were a dollar in fact, but, except in payment of debts, it is not one. It has not the purchasing power of one. Its value has been forty-five cents; it is now ninety; a year hence it may be ninety five, or what it may be no man can tell. It is the paper dollar, not the gold dollar, that fluctuates, and is, therefore, an uncertain and dangerous standard. Can it then be doubted that it is the duty of Congress so to legislate as to make, as soon as practicable, the paper dollar of which it authorizes the issue equal to the gold one?

The question then arises what legislation is required to effect this most desirable result. Our new Secretary is a gentleman of ability, and he belongs to a State in which good financial seed was sown at an early day, as has been proved by her high financial credit and the soundess of her banking institutions. I know not what his views are, but he would not be a true scion of Kentucky stock if he were unsound upon the financial question. If the management of our finances were in his hands I for one should be willing to take him upon trust, not doubting that he would pursue the right course to relieve the country from the burden—for so it is—of an irredeemable currency. But such is not the fact. His hands are tied. Congress is to determine what shall be our financial policy, and this determination may depend on the result of the approaching elections.

As parties now stand the financia lquestion can not be made a strictly party question, nor will it be—as in the better part of the late session it was feared might be the case—a sectional one. It is a question upon which there will be differences of opinion among men of the same party and the same State. That there should be speedy legislation and a definite policy established every one who is not a gambler in business admits and desires. Nothing but further inflation can be worse than uncertainty upon a matter so important to the well being of the country as the currency. It is for these reasons that I now feel at liberty to give my opinion upon the financial legislation that is required. I state my views frankly, not as presenting the only way, but as that which seems to me the most certain and direct path for reaching specie payments. If a wise plan shall be adopted no one will be more pleased than myself.

First—Congress should fix a period, say the 1st of December, 1876—the time is not material if it be not remote—after which United States notes should cease to be a legal tender.

Second—The Secretary of the Treasury should be authorized to retire (by the use of the surplus revenue, and if this should be insufficient, by the sale of bonds) at least $50,000,000 of United States notes per annum, until all have been retired, and he shall be prohibited from reissuing the notes thus retired under any pretext or circumstances whatever.

Third—In lieu of the United States notes retired an equal amount of bank notes, if they should be required, should be issued to national banks.

Fourth—When the specie standard has been re-established by the repeal of the Legal Tender acts, banking should be made free, and Congress should cease to interfere with the currency except so far as may be necessary to prevent illegal issues and to provide that every dollar in circulation by authority of law shall be secured beyond contingency, as is now the case, by a deposit of United States bonds in the treasury.

It is obvious that as long as United States notes are a legal tender the specie standard will not be restored. These notes should be gradually retired, because until the volume is reduced they will not permanently improve in value, and because, until the banks perceive that the reduction is actually taking place, they will make no effort to supply themselves with coin for the protection of their own circulation. It will be safe to provide for an issue of notes for supplying the place of United States notes as they may be retired, because the bank notes will not be applied for if the business of the country does not require them, and because they ought to be furnished if it does. It is not likely that an issue of bank notes, corresponding to the amount of United States notes withdrawn, will be required, as the value of both kinds of our paper money will be steadily increasing, and specie will be taking the place of paper as a reserve of the banks, and, ultimately, as a circulation among the people. This will be a self-regulating matter. As the United States notes are retired the banks will fortify themselves with coin, so that when the time of coin redemption comes round they will be prepared to meet the calls which may be made upon them, but which cannot be large, as the preparation for this state of things will have brought the business of the country into a healthy condition and there will be little demand for coin for exportation.

Nor will this withdrawal of United States notes preparatory to a return to specie payments, nor the return itself, affect the value of property or disturb business. Some intelligent men, who are anxious to stand again upon solid ground, are apt to speak of the "shrinkage" which must occur before this can be brought about, not reflecting that the real value of property is not affected by the standard by which it is estimated. Property is not dependent for its value upon a fiction. We speak of the price of gold, of its rise and fall, and some of us seem to think that we are richer as it rises and poorer as it falls, while its real value is permanent, except so far as it is effected by the yield of the mines. In spite of the Legal Tender acts it is to day, and it must continue to be, the real measuring standard of property. There is no foundation, therefore, for the apprehension of a shrinkage in the value of property as a consequence of a return to specie payments; nor is there any more foundation for the apprehension that such a change in our financial policy will make money scarcer and times harder. As I have already said, money, whether it be gold or paper, goes where it is wanted.

The advocates in Congress of inflation, or an increase of the currency, were chiefly from the Western States. How truly they reflected the sentiments of that section I cannot say; but I am sure that what is needed in the West is not so much more money as better money, and greater and cheaper means for the transportation of its products to markets. There is no class of men who are so much injured by irredeemable paper money as the agriculturists.

It is the farmer especially who is cheated by fictitious money. It is said, I know, that he pays his taxes with it and for what he needs to purchase; but is it not true also that it increases his taxes and adds largely to the cost of what he buys? The cotton, sugar and rice of the South and the grain, beef and pork of the West are needed at home and by foreign nations, and these necessaries will always command money. The people who have them to dispose of must decide what kind of money it shall be—money in the form of broken promises or gold and silver and convertible bank notes.

I have been for a long time absent from the country, but I am greatly deceived if the demand of the West for more currency does not come chiefly from those who have little or nothing to sell, and who would be consequently injured by a compliance with their demands. There may be at present depression in the price of agricultural products, but this is not owing to scarcity of money, but to a falling off in the demand. Consumption at home is less and the foreign demand is smaller than it has been. Many of our manufactories are idle, and European markets are disturbed by our financial troubles. It is these causes—that are only temporary—and not scarce money which occasions the depression that at present exists. There has never been a time when the products of the West (I can speak advisedly of this section) have failed to bring what they were really worth, according to prices at the home and foreign markets, for want of money to pay for them, and there never will be. I know that these products have commanded at various times extremely low prices, but this was owing to the lack of means of transportation or of a supply superior to the demand. The fact that nine out of ten of those who have been engaged in buying and shipping the products of the West to the seaboard, where prices are usually regulated by the European markets, have failed in business, is an evidence that those products have not been sacrificed or sold at home for less than their value by reason of a scarcity of money. There need, then, be no apprehension on the part of the farmers of the West that they will be injured, or that there would be a scarcity of money, by reason of the withdrawal of the United States notes or a reduction of paper circulation. For every dollar of depreciated currency withdrawn they would have a dollar, in value, at least, of convertible paper or of specie. What is true in regard to farmers is equally true in regard to manufacturers, merchants, and laborers.

My own deliberate opinion is that we shall never have really cheap money, as we can never have reliable money, until the United States notes are stripped of their false character, retired from circulation and their place supplied by specie and perfectly secured convertible bank notes. Specie, then, will cease to flow out of the country, as now it does, but will commence flowing in as soon as we drive out of circulation the notes which have deprived it of its monetary character. The products of our gold and silver mines now leave us because we have no use for them. As the precious metals are not circulating mediums, nor bases for money, they would be a burden if retained.

In regard to a substitution of bank notes for greenbacks, I have only to say that there ought not to be, and there will not long be, two kinds of paper money in circulation. One kind or the other will occupy the field. This I think inevitable. We shall get rid of United States notes, or there will be an irresistible demand for more of them. I advocate the substitution of bank notes for United States notes, because the latter stand in the way of a return to specie. The government lacks the means and machinery to keep in circulation a convertible currency of its own. To maintain such a currency the Treasury Department, or a department to be created for the purpose, would necessarily become a bank of issue. Such a bank would be as unsuited to our institutions as it would be deficient in the power required to give flexibility to its issues, and secure a joint and equal distribution of them throughout the country. For such an experiment we are not prepared. As long as we have a legal tender paper currency we shall have an incontrovertible currency. I advocate the substitution of bank notes for United States notes also, because I regard it of exceeding importance that the subject of the currency should be withdrawn from politics. Politicians are necessarily agitators. They cannot be otherwise. They need capital, and agitation is their capital. That this capital should not be made by a perpetual interference with what affects every man's interest is an obvious truth. A government currency, therefore, is not what is needed for a circulating medium. No political party should be intrusted with the power of making money—or what is called money—scarce or plentiful at pleasure. Let the United States notes then, be retired. Let the restraints upon bank circulation be removed. Let banking be free, and the business of banking be managed by those who embark in it. Let the circulation of banks, secured by the bonds of the government, be regulated by their ability to redeem, and by the requirements of the country, and we shall have that freedom from political interference, and that flexible, yet stable, because convertible, currency which is needed to stimulate enterprise and secure to labor its proper reward. The loss that the people would sustain in the matter of interest by the withdrawal of the United States notes would not be felt. If this loss should not be made up by the taxes assessed upon the banks and the facilities which they render to business it would be small in comparison with what would be gained by the withdrawal of the currency question from the arena of politics. I am no advocate for banks. If they did not exist, I might regard the creation of them a question of doubtful expediency; but they are so interwoven with our financial interests that they could not be destroyed without a financial revolution. And it must be borne in mind, in considering our banking system, that it is a very different one from that it superseded, inasmuch as it gives to the people a circulation of uniform value and unquestionable solvency. It is undoubtedly the best system now in existence, and it should be sustained until a better one is devised, or until the country is prepared to do without banks altogether.

In what I have said in regard to the United States notes I must not be understood as reflecting upon the financial minister who advocated, or the Congress that authorized, the issue. In regard to the wisdom of this measure there are now, as there were then, differences of opinion; but, admitting that this was not the wisest measure, the advocacy of it ought not to detract from the great merit of Mr. Chase, to whose administration of the Treasury the successful termination of the war is very largely to be attributed. If Mr. Chase lacked financial training and experience, he possessed what was better in the trying circumstances in which he was placed, courage, nerve, faith. Great victories in the field are but seldom won by a strict adherence to the scientific rules of war. Great commanders are seldom found in distinguished military engineers. The same is true in great financial contests, and the struggle for supremacy between the government and the Southern States was as much a contest of dollars as of arms. If the government had broken down financially the rebellion would not have been suppressed. That it did not break down was largely owing to the qualifications of Mr. Chase for the position he held. He undoubtedly made mistakes, but there is cause for wonder that he did not make more. I do not believe there was another man in the Union who would have made less.

☞ The Bay City Lumberman says it is stated that contracts for grading nine miles of the projected railroad from St. Louis, Michigan, to Bay City were let on Friday. Midland is to be left out in the cold, the road crossing the Flint and Pere Marquette Railroad near Freeland's, according to report.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, September 12, 1874.

Stock Exchange and Money Market.

Money continues quite easy in the open market, notwithstanding the more active dealings in Stocks, Produce, and Merchandise, and the consequent increase of demand for accommodation in the loan and discount line. Call loans to the leading Street houses have been quoted at 2@3 per cent; and the best mercantile cre its have rated at 5@7 per cent per annum. The outflow of currency to the interior, for crop moving purposes, has been more liberal, yet the city banks have maintained the average reserves, remarkably well; while the Government office has been losing both currency and specie. The City banks, last week, reduced their deposit line while augmenting their specie and loan and discount averages. They reduced their reserve of legal tender, while further contracting their item of circulation slightly. The U. S. Sub-Treasury reduced both its currency and specie reserves, the former materially. The City banks, last week, diminished their reserve of legal tender notes $1,677,900, and their deposit item $254,100, while enlarging their specie average $258,200. They report an increase of $765,100 in the loans and discounts, and a reduction of $140,900 in their circulation. The U. S. Sub Treasury in this city closed the week with a currency balance of $60,827,320, against $63,080,327 the preceding week; and a coin board of $52,553,648, against $53,258,273, on the previous return. The City bank exchanges, during the week, were $373,742,143, or a daily average of $62,290,357. The customs revenue of the port, during the week, was $2,760,000. The City banks reported their average of gold last week at $18,891,300, and their greenback average at $65,604,700. Their deposits stood at $234,746,000. The loan item was $279,084,900. The circulation was $25,662,400.

The aggregate of the outstanding U. S. currency, of all denominations, Sept. 1, was $428,422,258. The outstanding amount of legal tender notes is 382 millions. The National bank circulation is $350,584,208.

The income of the Government, from internal revenues, thus far, in the fiscal year, commencing with July 1, 1874, has been over 20¼ millions.

The Treasury balances at the opening of business on Wednesday were as follows: currency, $15,249,862; special deposit of legal tenders for the redemption of certificates of deposit, $59,255,000; coin, $68,612,461, including $29,119,440 in coin certificates.

Gold has been comparatively quiet, all through the week, with the price ruling almost stationary. The speculative demand has been devoid of spirit. A fair average inquiry has been noted for coin for custom house purposes. The export drain has been unimportant. The extremes of the price have been 109⅛@109⅞, closing at 109¾, as against 109¾ on Wednesday of the preceding week, showing no variation of movement from previous reports. The specie outflow, last week, was only $472,244. The imports of specie at this port since Jan. 1, have been $3,553,222. The customs demand for Gold last week averaged $460,000 a day. Foreign Exchange has been quite moderately sought after, with Bankers' sixty day bills on London closing heavily on Wednesday at $4 85@$4 86; sight bills on London at @4 87½@$4 88½ to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $5,907,998.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $6,771,208.

A comparatively steady market has been noted for Government Securities, the demand for which has been fairly active, chiefly from home investment buyers.

U. S sixes of 1881 closed on Wednesday of this week at 118⅜@118⅝; U. S. Five-Twenties of 1862, 112¼@112½; U. S. Five-Twenties of 1864 at 115⅝@115⅞; U. S. Five-Twenties of 1865, 116⅝@117; U. S. Five-Twenties of 1865 consolidated, 116⅜@116⅝; U. S. Five-Twenties of 1867, 117⅜@117⅝; U. S. Five-Twenties of 1868, 117¼@117¾; U. S. Ten-forties at 111⅝@111⅞; U. S. Fives of 1881, (Funding Loan) 112⅜@112⅝; Six per cent. currency Sixes from 117⅜@117¾.

State and Railway bonds have been attracting more attention and have been quoted rather firmer. Railway and miscellaneous share prop-

erty has been much more freely dealt in and prices have been quoted decidedly stronger, and quite buoyant.

General business has been fairly active for the season, both in Produce, and in Merchandise. A free movement has been reported in Breadstuffs and Cotton, but at variable prices. Provisions have been rather less confidently dealt in, and values of hog products have been depressed and lower. Wool, Tobacco, and Naval Stores have been in good demand and held more firmly. Petroleum has been quiet and weak in price. Hides, Leather, and Skins, have been moderately active on generally steady basis as to values. Foreign merchandise has been more salable, with prices, however, quoted irregular. Hardware has attracted less notice, while Earthenware has been quite dull. The Metal trade has been slow. Scotch Pig Iron has been scarce and held higher on a very light supply, but has been inactive. American depressed and unsettled, under the influence of some forced realizations. Eglinton Pig Iron quoted at $35; Glengarnock $37; Sumerlee, $35@$36; No. 1 American Pig at $30@$32, No. 2 do. at $27@$29; Forge, $25@$27; English Rails at $50@$52, gold; American Rails at works, $55@$60; Old Rails, $34@$38. Wrought Scrap, $33@$37. Ocean freights have been moderately active, but weak as to rates, in most instances.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The Chicago and Northeastern Railroad Company has been organized at Lansing, Michigan, for the purpose of building a railroad, 47 miles long, from Lansing east by north to Flint, to connect the two divisions of the Chicago and Lake Huron. It is designed to begin work at once.

☞ The work on the Southern Extension of the Chicago, Danville and Vincennes Railroad is progressing rapidly. It is now completed to Big Creek and is ready for iron as far as Hutonsville, 60 miles south of Terre Haute.

☞ The earnings of the Ohio and Mississippi Railroad in August, 1874, were $324,359 70, against $306,560 77, in August, 1873—an increase of $17,798 93, or 5⅞ per cent.

☞ Edmund S. Bowen, who has been appointed General Superintendent of the Erie Railway, was formerly General Superintendent of the Kansas Pacific Railway.

☞ An immediate extention of the Shore Railroad from West Brighton, S. I., to Mariner's Harbor, is proposed.

☞ The net receipts of the Philadelphia and Erie Railway for the first six months of the current year, as previously given, were $265,054. The gross receipts for the month of July were $313,615; the expenses for the month were $231,291, leaving as net receipts for July $82,323; which, added to the net receipts of the previous six months, makes the total net receipts for the seven months of the year $347,378. The increase of net receipts in July last is $51,991 in excess of those in corresponding month in 1873. The net earnings of the company for seven months of 1874 about equal the net earnings of the entire year of 1873.

☞ The Springfield and Illinois Southeastern Railroad is to be sold at Springfield, Ill., September 15, under a decree of foreclosure of the first mortgage granted by the United States Circuit Court. The smallest bid which will be accepted is $1,000,000, and payment must be made in cash, or in bonds *pro rata*, (that is each bond will be accepted only for such fraction of the purchase money as it forms of the whole issue of bonds.) The road is 228 miles long, from Beardstown, Ill., southeast through Springfield to Shawneetown on the Ohio. The first mortgage bonds outstanding amount to $3,400,000.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending August 29, at 287,913 tons, and for the coal year 11,724,166 tons against 12,787,803 tons to corresponding time last year, being a decrease of 1,063,637 tons. The bituminous tonnage for the week is 79,174 tons, and for the year 2,202,129 tons, against 2,058,880 tons to same time last year, giving a total of all kinds for the week of 366,087 tons, and for the year of 13,926,295 tons, against 14,846,383 tons to same time last year, being a decrease of 920,188 tons.

☞ The earnings of the Indianapolis, Cincinnati and Lafayette Railroad in July, 1874, were $141,539, the expenses $88,174, and the net earnings $53,365. In July, 1873, the earnings were $159,174, the expenses $109,148, and the net earnings $50,026—showing a decrease in earnings of $17,637, with a decrease in expenses of $20,974, making an increase in net earnings of $3,339.

☞ The earnings of the Central Pacific Railroad in August, 1874, were $1,301,000, against $1,251,622 in August, 1873, and $1,271,628 in August, 1872. For the eight months ending August 31, 1874, the earnings were $8,911,903, against $8,791,582 for the first eight months of 1873, and $8,052,755 for the first eight months of 1872.

☞ At a distance of thirty miles south of the Union Pacific Railroad, and 900 miles west of Omaha, a great hill of almost pure sulphur was discovered about two years ago. This is one of the most remarkable deposits of native sulphur in the world. It contains only fifteen per cent of impurities.

☞ Since the 1st instant, the Terre Haute, Paris and Decatur Railroad has been operated by the Vandalia Line. D. Hitchcock has been appointed General Superintendent, H. W. Hubbard General Freight Agent, and C. E. Follett General Passenger Agent.

Texas Railroads.

Texas has just added another stretch to her railway facilities by opening ten miles of road from Gonzales, on the Gaudalupe, up that river into Caldwell county, with the promise of adding an equal amount this month. At Gonzales the road connects with the Houston, Columbus and San Antonio, that is incomplete. It is intended to continue the construction to Austin, on the projected Fulton and San Antonio road, connecting there with the Columbus. Harwood is to be the shipping point for Gonzales and much of Caldwell county, though Port Lovca and Indianola are the contemplated points on the Gulf.

☞ The Wilmington, Del., Every *Evening* says: "The Smyrna and Delaware Bay (or Bombay Hook) railroad is under execution, and the sheriff of Kent county will sell all the property on Thursday, 17th of this month, at the instance of several creditors. The sale will take place in Smyrna."

☞ There is a movement for the extension of the Bethpage branch of Stewart's Central Railroad further north,so as to accommodate the farming interest of the neighborhood. Mr. G. D. Barton, Superintendent of the road, was in Farmingdale a day or two ago looking to the matter.

☞ The Sandusky, O., *Register* says a rolling mill at Columbus has recently contracted to furnish a large amount of rails to a railroad company at $52 a ton, which is said to be $3 a ton less than the same quality of rails are quoted at in the English market.

☞ The narrow gauge railroad will be completed from Galena to Plattsville this fall. The city and citizens of Galena have already invested nearly $300,000 in the road, in grading and tunnelling.

☞ It is said that the contract for the extension of the railway in Halifax, N. S., has been awarded to Mr. McKeene of Moncton.

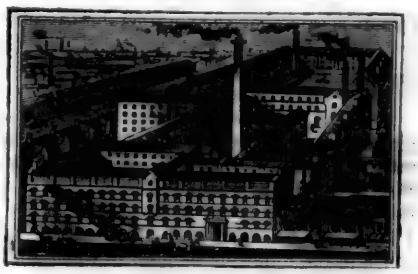
Railroad Law.

RAILROAD COMPANIES—IN WHAT MANNER SUBJECT TO LAW OF OTHER STATES THAN THOSE GRANTING THEIR CHARTERS.

The facts in the late case of Milnor *vs.* N. Y. and N. H. R. R. Co., (53 N. Y., 363), are fully set forth in the following opinion of Chief Justice Church:

It is very clear, from the facts found by the Court, that the plaintiff has a good cause of action for the loss of the baggage of his assignor, and the only question is whether he has sued the right party. We have been asked to place the decision in favor of the defendant upon the ground that it is a Connecticut corporation, and that the Courts in that State have decided that it had no power to contract for carrying passengers and baggage or freight beyond the line of its road; and if such is deemed to be the contract in this case, it is *ultra vires* (22 Conn., 1,502; 33 id., 179.)

Although in the view we take of this case, it is unnecessary to pass upon this point, it is proper to suggest that, for obvious reasons, we should be disinclined to accede to this position. It is well settled in this State that a railroad corporation may bind itself, by contract, beyond its line, (45 N. Y., 514; 22 id., 269; 4 Seld., 17; N. Y., 306.)—



When the defendant sought and obtained permission of the Legislature to continue its line and transact business in this State, it must be deemed as to its contracts made here, to possess the powers, and be subject to all the liabilities of similar corporations created by this State, as adjudicated by our courts. It should not be permitted to make a contract valid here and enforcible according to our decisions, and then, when its interests dictated, set up the decisions of Connecticut, holding a want of power as an excuse for its violation. All obligations of comity are fully discharged in permitting the defendant to build its road and transact its business in this State upon the same footing as like corporations created here. The decisions of Connecticut are exceptional to the general current of authority on this subject, and, in 33 conn., 180, before cited, I infer from the opinion that the Courts in that State are contemplating the propriety of modifying their former decisions "for the sake of uniformity."

We must assume that the defendant has power to contract to carry the plaintiff's assignor and his baggage to Sheffield, which was off from their road and on the Housatonic railroad.

The precise question is whether the defendant did so contract, or rather whether the Court was puted facts that such a contract was not proved, justified in holding from the admitted and undis-The defendant received the usual fare from New York to Bridgeport on its road, and also the fare over the Housatonic road from Bridgeport to Sheffield, in one sum, and gave the person applying two tickets printed together, but easily detached, one purporting on its face to be the defendant's tickets from New York to Bridgeport, and the other the ticket of the Housatonic company from Bridgeport to Sheffield, the latter containing a notice to change cars at Bridgeport; and the defendant also checked the baggage to Sheffield with a check, a duplicate of which was delivered to the owner marked H. R. R., indicating that it was a check of the Housatonic Railroad. It appears, affirmatively, that the baggage was property transferred by the defendant's employes at Bridgeport to the latter Railroad Company, and was destroyed while in its possession, under circumstances which render it liable for its value as a common carrier. The facts proved are not merely consistent with an agency on the part of the defendant to sell the Housatonic tickets, but we think they fairly imply such agency. The line was not a continuous Railroad route, the cars of the defendant did not pass over the Housatonic Road, and there was no fact proved tending to show that the defendant assumed to contract to Sheffield, except the sale of the separate tickets, the receipt of the fare and the use of the Housatonic check. The facts import an agency, and not a contract as principal, and the obligations of the parties are the same as though the tickets had been purchased at the offices of the respective companies. There was no community of interest between the two companies, and it does not appear that the defendant derived any pecuniary benefit from the transaction. The stipulation and finding is that the arrangement to sell tickets was for the mutual *convenience* of passengers and companies. It is obvious that the convenience of passengers would be promoted in

saving the care and trouble of rechecking baggage, and purchasing a ticket at Bridgeport, and some care and labor would be also saved by the companies. The finding of convenience repels the idea that the arrangement was for a pecuniary or other purpose. The inference is that the two companies exchanged tickets, and each sold as agent of the other, and furnished the other with checks to be used as occasion required. The circumstances that the tickets were printed upon the same paper does not change the presumption; that was formal and for mere convenience. The face of each ticket spoke for itself. One was the defendant's ticket, and the other was the Housatonic ticket, and persons purchasing such tickets would not infer that the defendant was operating the latter road, or had any other arrangement than an agency to sell tickets, and the use of a check of the latter Road would confirm rather than weaken the inference. If the check had been the defendant's, stamped from New York to Sheffield, there would have been force in the argument of the plaintiff's counsel likening it to a bill of lading issued by the defendant from the former to the latter place, but we do not intend to say what the legal effect would have been. We only intend to decide this case. The importance to the public of holding the first company liable was pressed upon us upon the argument. It was conceded that it is competent for one company to sell tickets as the agent of another, in which case the company selling would not be liable where it appeared, as in this case, that the injury was caused by the neglect of another company. We can see no propriety in straining the rules of law or overturning ordinary presumptions of fact upon the supposed ground that the public will be benefited thereby. It is conceded that a notice upon the ticket, that the defendant acted as agent in the sale of the Housatonic ticket, would have relieved it of responsibility. The effect, therefore, of a decision against it, instead of benefiting the traveling public, would only lead to a slight change in the form of the tickets.

The case of Quimby *v.* Vanderbilt (17 N. Y., 306) was very much relied upon by the counsel for the plaintiff. This court held in that case that separate tickets were not such contracts as precluded parol evidence that the contract was in fact entire. Denio, J., said, "They are quite consistent with a more special bargain," and added, "we do not say that the receiving of separate tickets for the different lines is not evidence of some weight upon the question whether the contract was entire, but we hold that it does not come within the rule which excludes parol testimony respecting a contract which has been reduced to writing." In that case there was positive evidence of a verbal contract from New York to San Francisco for a specified sum in gross, and there were various facts and circumstances tending to prove that the contract was entire on the part of the defendant. I agree that a contract might be shown independent of the tickets, and it would be competent to show that the tickets were delivered in pursuance of such contract, and it is unnecessary to say that the tickets would be inconsistent with proof of an entire contract. Here there was nothing proved but the sale of the tickets, he use of the check, and the receipt of the money; and in holding that, from these facts, and that the arrangement was for convenience, the presumption is an agency to sell the Housatonic tickets, we do not collude with anything said or decided in the case referred to. In the case of Hart *v.* The Rensselaer and Saratoga R. R. Co., (8 N. Y., 37), the defendant was the last of three connecting railroads between Whitehall and Troy, and was held liable upon the ground that the defendant's agents received the baggage at Whitehall and had charge of it through to Troy. The separate tickets were not material. In Weed *v.* Saratoga and Schenectady R. R. Co. (19 Wend., 534), the defendant contracted to Albany and ran its cars the whole distance, but a part of the way over the Mohawk and Hudson River railroad. In Cary *v.* Cleveland and Toledo Railroad Company (29 Bart., 35), where the circumstances were similar to those in this case, the Court held, upon the point as to a thorough contract, that it was a question of fact for the Jury and as no request was made to submit it, the decision of the Court was not erroneous. In the recent case of Burnell *v.* The N. Y. C. R. R. Co. (45 N. Y., 184), the ticket and check were from Palmyra to New York, and the contract was therefore held to be a through contract and the defendant liable for the negligence of the Hudson River Railroad Company. Each case must depend upon its own facts, but I have been unable to find any authority in this country which holds that the facts in this case constitute in law a contract on the part of the company selling the tickets for the entire route. The decided tendency of the authorities is the other way. (Knight *v.* Portland S. and P. R. R. Co., 56 Maine., 234; Brooke *v.* Grand Trunk R. Co., 15 Mich., 332; 2 E. D. Smiths, 184; Root *v.* Great Western R. Co., 45 N. Y., 524).

Manufactory of the Spencerian Pens, Birmingham, England.

SWAN QUILL Action!

SPENCERIAN

STEEL PENS.

These Pens are comprised in 15 numbers; of the Number One Pen alone we sold more than

5,000,000

in 1873.

and the sale is continually increasing.

They are of superior English make, and are justly celebrated for their elasticity, durability, and evenness of point. *For sale by the trade generally.*

☞ *To accommodate those who may wish to try these Pens, we will send a Sample Card, containing all of the 15 numbers by mail on receipt of 25 cents.*

IVISON, BLAKEMAN, TAYLOR & CO.,

138 & 140 Grand Street, N. Y.

☞ The Chester (Pa.) *News* says that Mr. John Roach, of that city, has received the contract for building three new vessels for the Pacific Mail Steamship Company, and that preparations for their construction have been commenced. These steamers will, as usual, be of iron, 352 feet in length, 40 feet breadth of beam, with 36 feet depth of hold, and will, in regard to construction, machinery, &c., be equal to former specimens of marine architecture built at the same establishment.

☞ The contract for grading and bridging the extension of the Wisconsin Valley Railroad from Stevens Point to Wausau has been let to Messrs. Thompson & Smith of Detroit.

Iron Bridges, Pivot Bridges,

AND

TURN TABLES.

F. C. LOWTHORP,

CIVIL ENGINEER,

Patentee and Builder,

78 E. STATE-ST.,

TRENTON, N. J.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, U. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company

THE

NEW-JERSEY AND NEW-YORK RAILWAY COMPANY

Offer for sale through their Financial Agents,

Messrs. Knoblauch & Lichtenstein,

37 BROAD ST., NEW-YORK,

$500,000 OF THEIR

FIRST MORTGAGE 7 PER CENT. GOLD BONDS.

Coupon Bonds of $1,000 (£200) each.

Interest March 1 and Sept. 1,

PAYABLE IN NEW-YORK OR LONDON,

At the option of the Holders.

Principal due 1893, at 87 1-2 and accr. inter.

Particulars, Maps, and Pamphlets at above Agency.

Railroad Bridge at Havre de Grace.

The replacement of the wooden spans of the Philadelphia, Wilmington and Baltimore Railroad bridge over the Susquehanna River at Havre de Grace with iron is progressing rapidly. On the 9th of July a contract was closed with Messrs. Clark, Reeves & Co., of the Phœnixville Bridge Works, for building from three to five spans during the present season. The contract stipulated that one span should be completed in sixty days, and another in each ten days thereafter, if the railroad company required them so rapidly. All of the iron for span 6, having first been put together at Phœnixville, was delivered at Perryville on the 17th August. The work of raising was begun on the 27th of August, and finished on the 5th inst., and on the 6th it was satisfactorily tested with five locomotives. The other spans are ready for forwarding, and will be raised as soon as the necessary preliminary work can be done. The span is 255 feet long and 35 feet high, and weighs about 200 tons, composed entirely of wrought iron, except the post feet and joint boxes, which weigh in all about 10 tons.

Chesapeake and Ohio Railroad.

Messrs. Fisk & Hatch, 5 Nassau st., New York, have just issued a circular (supplementary to the circular of August 1st) addressed to the bondholders and creditors of the Chesapeake and Ohio Railroad Company, in which are exhibited many and important details as to the company's present condition, prospects, capabilities, and intentions. This document is especially designed to answer all questions which might be suggested by the former pamphlet, and shows that about $10,000,000 first mortgage bonds have been already funded or negotiated for that purpose; three-fourths of the floating debt creditors have accepted the company's proposition for settlement, and nearly all the second mortgage bondholders have acquiesced in the terms offered. A statement is also given showing the earnings of the road for the eight months ending August 31, 1874, to have been $998,578 95, against $812,465 64 in the corresponding eight months of 1873, showing that, notwithstanding the general depression and stagnation of business throughout the country, and the unsettled condition of the financial affairs of the company, there has been a moderate but steady increase in the business and earnings of the road. It is but fair to say, however, that the earnings have thus far represented but little more than ordinary, miscellaneous and incidental business, with but comparatively little contribution from the coal, iron, and through traffic, from which its principal revenues will ultimately be derived.

Portland and Rochester R. R.

The Common Council of the city of Portland, Me., at an adjourned meeting held on the 10th inst., concurred with the Board of Aldermen in their action of Monday evening, and accepted the report of the Joint Special Committee on the Portland and Rochester Railroad affairs; they also accepted the agreement drawn by the City Solicitor and the orders authorizing the Mayor to sign and execute the same. The action in both Boards was unanimous. The report and agreement in substance adopts the proposition of the directors of the Portland and Rochester Railroad, that in view of the delay in the construction of the Nashua and Rochester road, which will now be finished in November, they find the outlay for prospective business so large as to compel them to ask the city for temporary assistance, as follows: That the company will provide the equipment for the road required by the contract with the Nashua and Rochester road, and will pay the interest on the $350,000 loan, and the interest on all bonds issued by the city, to meet the interest on the loan to the road, the city to issue its bonds on six years to pay interest on its loan to this company as it falls due during the next three years, the bonds thus issued to be paid by the company when due. Upon completion of the Nashua and Rochester road, opening the New York, Worcester and Portland line, the Portland and Rochester Directors are confident that the road will be placed in a most prosperous and thriving position, and its business be very large and important.

☞ A company of Rhode Island capitalists have obtained the contract for constructing a railroad from San Buenaventura to Bogota, a distance of 240 miles.

How to Keep Railroad Trains on the Track

The Boston *Journal* says an experiment extremely interesting to railroad men and to people who are anxious for the greatest safety in railway travel occurred on the Eastern Railroad at Revere on the 10th inst., and then adds:

A special train of two cars left the Eastern depot in this city about 2 o clock, having on board about one hundred gentlemen, including Hon. George B. Loring, Hon. Moses Kimball, Mr. F. M. Johnson and Mr. Crafts of the Railway Commission, Vice President D. Waldo Lincoln of the Boston and Albany Railroad, President White of the Boston and Maine Railroad, Superintendent Heywood and Mr. Adams of the Fitchburg Railroad, Manager Hatch of the Eastern Railroad and many others interested in railroad matters. Arriving at Revere, on the track of the Eastern Railroad running to East Boston, the party found an engine waiting, with an ordinary platform car, on which was about four tons of iron rails. The car bore the inscription, "Emery & Doyen's patent safety shoe."

An inspection of the car showed that there were four wheels each running on an independent axle, that is to say, the axle did not extend across the track from wheel to wheel, but each had two journals. Extending along each side of each wheel, a half inch from the rail and an equal distance from each wheel, was a horizontal strip of wrought iron seven-eighths of an inch thick and six inches wide, having a flange upon each edge, forming what the inventor calls a safety shoe. The car was built expressly for the experiments and was a little heavier than the ordinary platform car. It was intended to have one with eight wheels, but through some misunderstanding it did not arrive. With a car having four trucks or eight wheels the inventors claim the experiments are vastly more satisfactory. The first test was to open a switch, or set it wrong as a misplaced switch would be, so that a train must inevitably run off the track. The engine then got up a speed of about twelve miles an hour; the car was detached before reaching the switch. The wheels ran off as soon as the switch was reached, but the shoe immediately caught the rails and the car slid along about three rods and stopped. By means of a switch rope the car was then got on the track by again leaving the switch open, the wheels striking the rails, the distance from the edge of the shoe to the centre of the wheel being exactly that of the distance between two rails when a switch is opened.

The second test was at a greater rate of speed and was equally successful, the car sliding on the track by means of the shoes only a short distance further than before. The third time the engine went back a long distance from the switch and put on a speed of from thirty to forty miles an hour, and the car came at a fearful rate. The result was exactly the same, the shoes holding the car on the track and sliding a distance of about 300 feet before it stopped. The next test was to take out one rail entirely from the track. The car was then sent along the track at a speed of nearly twenty miles an hour. As soon as the open space left by the taking up of the rail was reached the wheels were thrown from the opposite rail, but the shoe on that side caught and held the car on that rail until the open space was crossed, when the shoe on the other side also caught and the car stopped within three rods. The last experiment was a desperate one. One rail was loosened and the end to be first reached by the car was turned toward the inside of the track about twelve inches. The result must naturally be that if the shoe caught on that rail it would give the car a direction to throw it from the track unless the shoes were strong enough to resist the tremendous strain. The speed was about fifteen miles an hour and the loosened rail was passed in safety, but the tremendous strain on the rear shoe on that side broke it and the car was left with one shoe on the track. An examination showed that the iron had a weak spot in it, through being improperly welded. The frame work of that truck was somewhat smashed, and one or two iron rails were torn off, but otherwise the car sustained no damage and was easily got on the track again by means of an appliance fastened to the rails. The experiments were very interesting and the general opinion quite freely expressed by railroad men and others present was that it was, if not a complete insurer against any serious accidents, certainly a great additional safeguard. Mr. A. L. Richards of Watertown, formerly a member of the Legislature, and who is interested in the patent, claims that it will bear even severer tests, and has done so at Portland, Maine, where trials were made with greater weight and upon curves. The shoe can be applied to any trucks with but slight change and at an expense for a passenger car of about $115, and of a freight car about $90. In addition to its being a preventive to trains running off the track it acts as a brake, stopping a train as quickly as a Westinghouse brake or any steam brake. Other experiments are to be made.

Wisconsin Railroad Law.

DECISION OF THE SUPREME COURT OF WISCONSIN.

The following is an abstract prepared by Chief Justice Ryan of the opinion of the Supreme Court of Wisconsin in the case brought by the Attorney General and the Railroad Commissioners for an injunction to compel a compliance by the Chicago and Northwestern Railroad and the Chicago, Milwaukee and St. Paul Railway Companies with the provisions of the Potter Railroad law.

This court has no original jurisdiction of proceedings by injunction at the suit of private persons or to enforce private remedies, but has jurisdiction of the writ in matters of public injuries upon information of the Attorney General in the nature of injunction bills to restrain excess where a mandamus would go to remedy the defect. The writ given by this court in a group of prerogative writs is given as a quasi prerogative writ for prerogative purposes. [Attorney General Blossag, Wisconsin 317, considered and approved of sections 13 and 14, chapter 148, R. S.] Courts of Equity in this State have jurisdiction, upon information of the Attorney General, ex-officio, to restrain corporations from excess or abuse of corporate franchise, or other violation of public law, under color of franchise, to the public injury. These sections confer no jurisdiction in this court. Whether they operate to limit the jurisdiction of the Circuit Courts is not here considered. It is for the courts to determine in such an information whether the acts charged work a public injury. This jurisdiction was an established equitable jurisdiction at the time of the adoption of the State Constitution, and section 5, article 1 of that Constitution, in relation to trial by jury, has no application to it. Were this otherwise, the questions raised by these informations are questions of law, and the jurisdiction of them in equity deprives the defendants of no right of trial by jury.

Chapter 273 of 1874 is not repealed by chapter 292 or 341 of the same session. All the chapters can well stand together. The court finds no difficulty in holding that the Chicago, Milwaukee and St. Paul Railroad Company is the corporation designated as the Milwaukee and St. Paul Railroad Company in chapter 273. The corporation is sufficiently indicated by the name used in the statute, although it had a month before added the prefix of "Chicago" to its name.

The constitutional amendment of 1871, prohibiting special acts of the Legislature for granting corporate powers or privileges, except to cities, is prospective only, and has no relation to existing corporate charters by special acts before the amendments. These may be amended or repealed by special act as before. The rule established in Dartmouth vs. Woodward (4 Wheaton, 518,) considered this point so far as it is extended to quasi private corporations intrusted by charter with public interests, so as to constitute them quasi public corporations. The rule is followed, nevertheless, by the court, because it is the rule of the Supreme Court of the United States, on the construction of a clause in the State Constitution. But the reserved power in the State Constitution to alter or repeal corporate charters was designed to take, and does take all corporations created under it, out of the rule in the Dartmouth College case, and the Legislature has the same power over such corporations as if the rule in that case had never existed.

The reserved power to alter or repeal has no other limit in law than is implied in the words used. The exercise of the power should be under the guidance of extreme moderation, and should not be oppressive and unreasonable. But all this rests in the legislative discretion. So far as the corporate franchises are concerned, the Legislature is under a moral obligation not to reduce the tolls of railroads below a fair and adequate amount, but its power over the franchise is absolute. But the power to alter or repeal cannot affect the property of corporations other than the franchise. Such right of property is inviolate. It is not material here whether the defendants had an election to accept or reject the alternative of their charters by chapter 273. They were bound to obey the statute or to discontinue their operations as corporate bodies. In either case they had no right to conduct their operations in defiance of public law.

Chapter 273, of 1874, so far as its provisions are before the court in these cases, is a valid amendment of the special charters of the defendants, granted by the State. Whether it would be a valid amendment of the general Railroad act of 1872, is not here considered.

The Territorial charter of 1847 of the Milwaukee and Waukesha Railroad Company, extended by the Territorial act of 1848, is the subsisting charter of the railroad built under it from Milwaukee to Prairie du Chien. It does not appear in this case whether the charter was accepted and the corporation organized under it before the adoption of the State Constitution. There is a presumption in the circumstances that they were. Such being the case, the charter is not subject to the reserved power to alter or repeal, and as chapter 273 of 1874 would impair the obligation of a franchise of that charter, within the rule in the Dartmouth College case, chapter 273 of 1874 can not be held to apply to the railroad built and existing under that charter, if accepted before the adoption of the State Constitution. An information in equity by the Attorney General *ex-officio* has the same effect as to answer and injunction, as a bill in chancery, verified on information and belief. Here the question is unimportant, because the violation of chapter 273, charged, is apparent from the affidavits on both sides. There is a judicial discretion to withhold injunction and mandamus in aid of private remedies, but there is no such discretion at the suit of the State in mat-

ters of public injuries. In such cases writs go peremptorily *ex debito justicia*. The court has no discretion to withhold either of the writs in cases of positive public injury.

The motions of the Attorney General must be granted, and the writs issue, as to all the roads of the Chicago and Northwestern Railroad Company and all of the roads of the Chicago, Milwaukee and St. Paul Railroad Company, except the railroad from Milwaukee to Prairie du Chien, built under the Territorial charter of 1847 and 1848. But before the writs issue the Attorney General must file in these cases his official stipulation not to prosecute the defendants for forfeiture of their charters for any violation of chapter 273 charged in these informations before the 1st day of October next, that time being allowed by the court to the defendants to arrange their rates of toll under chapter 273.

Connecticut and Passumpsic Rivers R. R.

The earnings of this road for the years ending June 30, 1873 and 1874 were as follows:

	1873.	1874.
From passengers	$287,110 53	$287,488 27
" freights	484,046 43	445,760 59
" mails	13,780 95	22,080 82
" express	7,800 00	8,700 02
" rents	10,101 38	7,923 15
	$802,889 29	$771,902 35
Expenses, viz:		
Repairs of road	$189,153 83	$151,680 89
Stations and buildings	6,412 44	18,843 28
Bridges	7,919 66	11,603 68
Wood	89,951 76	74,029 73
Car & locomotive repairs	89,388 54	96,981 62
Oil and waste	10,288 82	7,726 73
Passenger expense	37,076 76	37,098 01
Freight expense	63,066 30	53,147 50
Losses and bad debts	4,676 52	9,349 53
General expense	17,792 19	19,818 43
Tools	3,540 45	2,389 63
Shop expense	6,513 02	7,010 52
Stationery and printing	8,025 12	4,404 30
Insurance	6,703 61	5,028 15
	$540,564 02	$499,112 10
Net earnings	$262,275 27	$272,790 25
Add balance of income, June 30, 1873		118 54
Total income		$272,908 79
Disbursed as follows:		
Paid trustees of sinking fund		$8,000 00
Interest on bonds and notes		79,294 90
Coupons on Massawippi R. R. bonds		26,547 80
Dividends, February and August, 1874		154,356 00
Balance of interest account		1,297 72
Balance of income, June 30, 1874		3,412 37
Total, as above		$272,908 79

Compared with the previous year, the gross earnings of 1874 show a decrease of $30,936 94 with a decrease in expenses of operating of $41,451 92—making an increase in net earnings of $10,514 98. The President, in his report, says:

The tonnage is less than last year by 5,085 tons; this is mainly in the article of lumber, which trade has been very much depressed since the panic of last season. Other classes of freight have held up very well, considering the dull state of trade throughout the country. The passenger receipts are a trifle over last year, being $287,488 27 against $287,110 53 last year. The local passengers have fallen off some, but this has been made up by a gain in through passengers, and the prospect in the future for passenger traffic we look upon as encouraging. We have continued liberal expenditures on the road-bed and track, and the road is now in a very satisfactory condition, and we think will compare favorably with most New England roads; 843 tons of new rails have been laid, and 6,945 rails have been taken up, repaired and relaid during the year; 51,420 new sleepers have been used in the track. Extra attention has been paid to the bridges, and they have been examined and repaired in the most thorough manner; we feel that they are all safe and will compare favorably with the bridges of any other road. Our aim has been to put the bridges and road in such a condition that it can be operated with safety and economy.

The equipment of the road is now ample for the business we have, and it has been kept in thorough repair. There have been built at our shops and added to equipment during the year—1 first-class engine; 2 boarding house cars for wood department, 3 belt cars, 2 section hand cars, 4 push cars 2 station push cars, 2 wood cars, 2 section dump cars, and 2 first-class monitor top passenger cars (purchased). Rebuilt—5 platform cars, 1 hay car, 1 horse car, 12 platform cars, new above the trucks, 1 section push car, and 8 hand cars, and 2 coal cars changed to horse cars.

One hundred and fifty-one new brakes have been put on to freight cars. We have purchased the right for the Miller platform and put it on to thirteen passenger cars; also for the Westinghouse air brake and put it on to sixteen passenger cars; all the above has been charged to the current operating expenses of the road. No charge has been made to construction during the year. The stations and buildings have been carefully looked after and kept in good repair, and some new buildings have been added, and we think that the general condition of the road, the bridges and all the property has materially improved within the year.

The equipment of the road now consists of 24 locomotives, 17 passenger, 7 baggage, 330 platform, 8 ore, 12 horse, 55 hay, 93 rack, 170 box, 8 saloon, 22 gravel, 3 crane, 40 push, 27 wood, 2 boarding house, 3 belt and 42 hand cars, and 1 snow plow. Number of miles run, 458,662. Number of passengers carried, 193,520; do. carried one mile, 6,736,788. Tons of merchandise carried, 153,343; do. carried one mile, 9,722,187.

The indebtedness of the corporation and the assets applicable thereto, are as follows:

INDEBTEDNESS.

Coupon bonds due 1876, 6 per cent	$296,500 00
Coupon notes due 1876, 7 per cent	480,000 00
Coupon notes due 1881, 7 per cent	154,000 00
Coupon mortgage bonds due 1893, 7 per cent	603,000 00
Notes payable	268,119 58
	$1,801,619 58

ASSETS.

President.—EMMONS RAYMOND, Boston, Mass.

Vice President.—B. P. CHENEY, Boston, Mass.

Directors.—Emmons Raymond, Josiah Stickney, Elijah Cleveland, B. P. Cheney, Albert Knight, Henry Chase, Gardner C. Brown, T. P. Redfield, F. M. Weld, Horace Fairbanks, Amos Barnes, S. S. Thompson, D. R. Sortwell.

Treasurer.—N. P. LOVERING, Boston, Mass.

Secretary.—ELIJAH CLEVELAND, Coventry, Vt.

Sup't.—GEORGE A. MERRILL, Lyndonville, Vt.

Flushing, North Side and Central R. R.

Negotiations which have been pending for some time between the Flushing and North Side Railroad, A. T. Stewart, and other owners of branches, for a consolidation of five roads, has been perfected and the new corporation is to be known as the Flushing, North Side and Central Railroad Company. The roads consolidated are: the Flushing and North Side Railroad, from Hunter's Point to Whitestone; the Whitestone and Westchester, which is about a mile long and terminates at the East River; the North Shore Railroad, from Flushing to Great Neck; the Central Railroad, from Flushing to Farmingdale, and the Central Railroad extension, from Farmingdale to Babylon. The new company has already negotiated a loan of $1,500,000 through an English banking house, and as soon as the money arrives the work of extending the Flushing branch is to be begun. It is to be extended to Great Neck, thence crossing Manhasset Bay to the village of Huntington.

Conference between the Commissioners and Creditors of Virginia.

The following circular, addressed to the "Creditors of Virginia," has just been issued by the Governor and Treasurer of the Commonwealth:

TO THE CREDITORS OF VIRGINIA:

Pursuant to authority vested in the Governor and Treasurer by a joint resolution of the General Assembly of Virginia, approved April 30, 1874, we invite and appoint a conference to be held in the Capitol, at Richmond, at 12 o'clock M. on Tuesday, the 10th day of November next, between all the creditors of the State—home and foreign—or their duly accredited deputies, and the undersigned, as Commissioners for Virginia. The object of the conference is to effect such exact and authentic understanding of the resources and liabilities of Virginia, and to consider such propositions for final agreement between the parties interested as will afford the best attainable security for the rights and interests both of public creditors and the Commonwealth.

JAMES L. KEMPER, Governor.
R. M. T. HUNTER, Treasurer.

Richmond, Va., Sept. 10, 1874.

☞ A dispatch from Fort Garry, Manitoba, Sept. 14th, says: "Mr. Whitehead, contractor of the Pembina Branch Railroad, will arrive by boat to-morrow, when work will be commenced forthwith."

Finance and Taxation.

We give below the remainder of the letter from ex-Secretary McCulloch, addressed to gentlemen in Cincinnati; the preceding portion having been given in our last issue.

There is another subject to which I should not allude, if there was not a "plank" in the "platform" adopted by the recent Democratic Convention at Indianapolis in favor of the payment of five-twenty bonds in greenbanks. Although it is known that party platforms are usually made to be disregarded and "spit upon," the expression of such a sentiment by an intelligent and highly respectable body of men, claiming to represent a great political party, whose record upon financial questions has been most credible, is calculated to mislead well meaning people, if not to damage the national credit. This subject is rapidly losing its interest in a pecuniary point of view, by the fact that the six per cent five twenties are being rapidly converted into five per cents, which, in order to prevent any question in regard to the currency in which they are to be paid, are on their face made payable in coin. Still, presented as the resolution has been for the consideration of the voters of Indiana, it is not without importance. I feel it to be important because it affects the good name of my own State. That such a proposition should be revived by men claiming to represent democracy indicates a want of political sagacity on their part and an abandonment by them of principles to which the democratic party, in the palmy days of its greatness and power, conscientiously adhered, and which it must again avow and adhere to if it is to become the party of the future as it has been of the past. If this resolution of the Convention truly expresses or reflects the sentiment of the democracy of Indiana it is to be hoped that the spirits of Jefferson and Jackson, of Benton and Wright, and the host of other democratic worthies whose fame is the nation's pride, do not witness the apostacy of those who claim to be their followers. That the five-twenty bonds should not and cannot be paid in depreciated greenbacks is evident, for the following reasons:—

First—These bonds are national obligations, intended to be circulated and held in foreign countries as well as in the United States, and all such obligations are always understood to be payable in the currency which alone is recognized as money by the common consent of the great family of nations.

Second—They cannot be paid in greenbacks, because it could not be done without increasing the issue of legal tender notes beyond $400,000,000; and a large portion of these bonds were issued after the faith of the government had been pledged by act of Congress that this should be the limit, and also because Congress by a special act, in 1869, declared that these bonds were payable in coin.

Third—Because it was the express understanding between the government and the people which these bonds were issued that the principal as well as the interest should be paid in coin.

The language of the Indiana resolution, "We are in favor of the redemption of the five twenty bonds in greenbacks, according to the law under which they were issued," if not positively untrue, is calculated to mislead. That these bonds should be paid in greenbacks is not in accordance with the law under which the issue was made. The reverse is the fact. It is true that the law does not expressly state that they are payable in coin, but it is provided that the interest be so paid. If it is silent in regard to the principal it is because no one at that time regarded United States notes as anything else than a temporary currency, which was to be redeemed or retired by conversion into bonds long before the bonds by their terms would be brought under the control of the government. Who, in fact, ever heard of a national obligation the interest on which was payable in one kind of currency and the principal in another and depreciated kind, and what would be thought of a people who should take advantage of the technical construction of their own law and compel the holders of their bonds to take in payment their own dishonored paper, notwithstanding their servants in the Treasury Department, their servants who solicited subscriptions and the public press, with the full knowledge and approval of the lawmaking power, had represented the principal as well as the interest of the bonds to be payable in coin! By every member of the House and of the Senate who participated in the debate when the subject of the issue of these bonds was under consideration, and who in terms alluded to them, they were spoken of as "gold bonds." To repudiate all these promises now the people of the United States would reach a depth of degradation and dishonor to which no nation has yet descended. The statement of the proposition, stripped of all its disguises, is enough to condemn it in the estimation of all honorable men. It is not, I am sure, in harmony with the sentiments of a majority of the democrats of Indiana. As a bid for votes the resolution of the Convention was a blunder, which in politics is worse than a crime. Morally and economically considered as well as politically, if it was an expression of the intelligent sentiment of its members, which I apprehend it was not, it might justly be pronounced a crime and blunder combined.

I have said so much upon the currency question I have neither time nor space to dwell long upon the tariff. Nor is it necessary that I should, as it is a question which is being discussed by those who have given to it much more attention than I have and who understand it better. I favor a revenue, not a protective, tariff. The present tariff has been highly productive of revenue; and it is therefore contended that it is in fact a revenue tariff, and that, inasmuch as a large portion of our revenues are to be derived from customs duties, the difference between a tariff for protection and a tariff for revenue must always be more imaginary than real. Now, while it is true that since 1862 the importations into the United States have been heavy, and the revenues from this source have, consequently, been large, it does not follow that the present tariff, in the proper meaning of the term, is a revenue tariff. It was intended and framed to protect certain interests in the United States, and it has done and is still doing this by preventing fair competition between home and foreign manufacturers, thereby increasing to consumers the cost of many articles of common and indispensable use. It is true also that this, to some extent, must be the effect of any system of raising revenue by custom duties; and free trade, desirable as it may be, is not likely to be adopted as long as large revenues are needed for the payment of the public debt and for defraying the expenses of the government.

Indirect taxation especially taxes upon imports, is undoubtedly the most expensive and demoralizing, if not the most unequal, mode of raising revenue that has ever been resorted to; and yet it is the most popular, because it is not inquisitorial and does not introduce the tax gatherer to the consumer, and it is felt only in the enhanced prices of the articles which are subject to it; the cause of such enhanced prices is not often considered. The policy of raising revenues by taxes upon imports is not, however, to be abandoned; and it will not be possible, even it were desirable, to frame laws which will yield such revenues as will be required from this source without giving home industry liberal protection.

Now, what I think the people should earnestly and persistently contend for is a tariff in which revenue should be the object and not the incident; that a commission fairly representing the different sections of the country be appointed by Congress to prepare a bill, the aim of which should be to raise the necessary revenues from the smallest number of articles, discarding the policy of protection, and which should be so clear in its provisions and language that common people could understand it. I suggest that such a bill should be prepared by a commission, because it seems to me to be the only means by which an intelligible, symmetrical, and consistent bill can be secured. As long as tariff bills are prepared by committees that do not command the confidence of the House in a sufficient degree to insure their passage through that body, without important alterations, and such bills are subject to still further alterations by the Senate, and receive their final touches from committees of conference, amid the haste and confusion distinguishing the closing hours of the session, we shall have inconsistent patchwork, difficult to understand, and fruitful of fraud and litigation, instead of symmetrical, consistent and intelligible laws. It is true that the work of a commission would be subject to the same ordeal as would the reports of the Ways and Means and Finance committees; but, as the commission would be selected for the single purpose of preparing a tariff, it would be more likely to fairly represent the different sections of the country than a committee. It would have more time for the preparation of a bill than a committee, and if composed, as it ought to be, of able and upright men—not partisans, nor the representatives of particular interests—I believe such a commission would prepare a bill that could be carried through both houses without change. It cannot be denied, I apprehend, that by the present tariff both the revenues and the people are badly cheated; that it is in regard to some articles prohibitory; that it increases the cost of many things, without yielding revenue enough therefrom to cover the expense of collection, thereby profiting home manufacturers to the amount of that increased cost, without benefiting the government; that, by its heavy duties upon some kinds of raw materials, it has rendered unprofitable and gradually destroyed industries that before the war were prosperous and profitable, and, finally, that it is difficult of interpretation and on some points inconsistent, thus opening the door to, if not inviting, fraud on the part of importers and giving opportunity for oppressive and dishonest practices to the officers of the customs.

Whether the protective principle be retained or not, there is no question that the present tariff should be subjected to a thorough revision, and I believe this will only be done in the manner in which it ought to be done—through the agency of a commission. The policy of protection should, in my judgment, be abandoned, because it favors, by direct legislation, particular interests; because it induces the manufacturer to rely upon the government in a contest with foreign competitors instead of cultivating skill, economy and a spirit of self-reliance, which are so important for success in all branches of business; because, as we cannot sell liberally unless we buy liberally, it diminishes the foreign demand for our agricultural and other products, and, consequently, lessens the price of them; because it is inconsistent with the spirit of the age, which demands that all unnecessary obstacles in the way of the freest exchange of products between nations should be removed, and, finally, because its end, if not its aim, is to enrich the few at the expense of the many. In its essential character a protective tariff is barbarism. Such a tariff may be defended for a time, like an irredeemable currency, on the ground of necessity, but not as a permanent national policy. I am not prepared to say that there have not been periods in the history of our manufactures when protection was necessary, in order that inducements might be offered to capitalists to engage in them and that labor might be properly educated; but such periods have passed by. Our manufacturing interests, long fostered by government, no longer need protection against foreign capital and skill. If they were not able in their infancy to stand alone they are able now; but even this they will not be required to do, as they will have the advantage over their foreign rivals of government duties for revenue and the cost of transportation afford. That this will be sufficient not only to enable them to continue business, if economically conducted, but to make handsome profits, there can be little doubt. If there be any kind of manufacturing in the United States that cannot live with such advantages as a judicious revenue tariff and the cost of transportation from distant countries give, it is very clear that it is unfitted

to the country or the habits of the people, and that it ought not to be encouraged. I have so high an opinion of the faculty for invention and aptitude in the use of machinery of my countrymen that I am satisfied there is no branch of manufactures suited to the country that has prospered under existing laws which would not continue to prosper even under a system of absolutely free trade.

It is very certain that under a wise tariff many new industries would come into existence, and others which have died out, or are languishing under existing laws, would be restored to life and quickened into prosperity. I have time to mention but one instance. Iron steam ships can even now be built about as cheaply in the United States as they can be in Europe. With a reduction of duties upon the materials which are used in their construction they could be built cheaper, so that the great shipyards for building iron ships, not only for the United States, but for other nations, would be found, at no distant day, on the Delaware instead of on the Clyde.

The great State of Pennsylvania, an empire of itself, clings to protection, as if her prosperity depended upon it; but she will never know how great her resources and power are, nor what her people are capable of accomplishing, until she ceases to look to the government to protect her interests and learn to rely upon herself. There is no more reason why she should ask the government to protect her iron manufacturers against foreign competitors than against the competition of Missouri, Virginia and Tennessee.

The plan that American labor must be protected against what is called the "pauper labor" of Europe is, if I may use the expression, "played out." Pauper labor in the factories and furnaces of Europe is a myth. Skilled labor is in as great demand, and is as costly, estimating the difference in the expense of living on the other side of the Atlantic, as on this. If it were not so the difference would be more than equalized by our superior machinery and our superior cleverness in the use of it. We have in the United States the best cotton mills in the world, with all the capital that is needed to run them, and we are producing better cotton than can be grown elsewhere. Is it possible that the cotton spinners of New England need protection against the cotton spinners of Great Britain?

We have iron literally cropping out of the earth—mountains of it, in fact—of the best quality, and coal for smelting and manufacturing it in its immediate neighborhood. In Great Britain iron is only found hundreds, if not thousands, of feet below the surface, a large portion of which has to be transported at great expense to the coal districts to be manufactured, and at still greater expense, when manufactured, to the markets of the United States. Do the iron makers of Tennessee, Missouri and Pennsylvania need to be protected against competition from England?

Coal—the producer of the great motive power of the world—coal, which is found in inexhaustible supply throughout this country, which is indispensable in manufacturing, and, in the older States, is used by almost every family for fuel, should coal be increased in price by a tariff which prevents the introduction of it from the Dominion of Canada?

Is it right that every family in the United States should pay an extra price for the salt it uses for the benefit of the few who are manufacturing it, and who can make it as cheaply as it can be made in any other country? These questions—and the number, can be largely increased—are not new, but they lose none of their interest because they have been frequently asked. The present is a good time for the people to ponder them. No protection laws were ever so ably defended as the corn laws of England.

No interest ever seemed to demand protection more than the agricultural interests of that country. It was thought proved, as clearly as figures and arguments could prove anything, that free trade in corn would be a death blow to the owners of landed property. What! abolish the sliding scale of import duties, and open the English ports to the cheap grain of the Continent and of the United States? The very suggestion of such a proposition by English reformers was regarded by land owners as evidence that the world was moving in the wrong direction, and that crack-brained theorists were aiming to control it.

Now, what has been the effect of the repeal of the English Corn laws? Low prices for lands? Neglect in their cultivation? Prostration of agricultural interests? The reverse are the facts. Land, instead of declining, advanced in value. The cultivation of it was at once improved, and the interest which it was said was to be prostrated by free trade in breadstuffs speedily became vastly more prosperous than ever. The English land owner, who should now advocate the re-enactment of the Corn laws, would be considered a fit subject to be handed over to the surgeon to be operated upon for the "simples." The same will be true in regard to the protection laws now in force in the United States. It will, at no distant day, be as difficult to find a protectionist in this country as it now is to find a land owner in England who would acknowledge that he ever favored the Corn laws.

The United States, with their rich soil, abounding resources and intelligent people, will prosper, no matter what laws may be upon their statute books; but they will never make the advance which they are capable of making in wealth, in morals and civilization until they have a sound currency and more extended, because freer, trade with foreign nations.

I have the honor to be, gentlemen, your obedient servant. HUGH M'CULLOCH.

To Messrs. L. B. HARRISON, EDWARD SARGENT, C. RUMELIN, JOHN A. GANO, JOHN H. OSBORNE and others, Cincinnati.

Galvinized Iron Works.

Recently a new branch of industry has been established in Camden, New Jersey, which already claims importance—that of manufacturing galvanized iron. Protecting iron forms against rust, as well as adding to its strength and appearance the galvanized or zinc-coated iron is desirable in the manufacture of numerous articles, useful and ornamental. This business is carried on largely by the Reynolds Iron Roofing Company, who have within a few months erected on Front street, above Market, Camden, the finest works of the kind in the United States. The factories are in two distinct buildings, the first a three-storied brick, seventy by ninety feet, used for the manufacture of galvanized iron cornices, window caps, dormer windows, brackets, sign blocks, finials, mouldings, modillions, window sills, door trimmings, urns, ballustrades, signs, chimney caps, &c., together with sheet metal ornamental work of any design, cast, stamped or spun. A large quantity of these articles have just been completed and ready for shipment to the Eastern and Southern markets, in which States the company are doing a heavy trade.

In this establishment has been introduced the latest and most improved machinery for this branch of business, which enables the proprietors to manufacture cornices from heavy No. 16 iron.

In connection with the manufacture of the foregoing, the same company, in a separate building, 35 by 75 feet in dimensions, make what is known as the "Reynolds Iron Roofing," the peculiarity of which is that it is constructed without the use of solder, and is not liable to breakage, the joint being formed so as to allow for expansion and contraction in each direction, yet perfectly tight against sleet, standing water or melting snow. These results are claimed to give this style of roofing superior advantage.

Several buildings are now in process of erection in Camden on which these trimmings and roofing are used—and, from the satisfaction generally expressed, the impression obtains that galvanized iron is destined soon to assume a high rank in building and ornamental architecture. The works in Camden are driven by a 75-horse power engine, and furnish employment to a large number of skilled workmen.

Railways in France.

In October, 1873, there were 11,806 miles of railroad completed in France, 1,122 in progress, and 5,344 projected—so that there must now be in the neighborhood of thirteen thousand miles. The following table will show the progress of railway building in France from 1854 to 1873:

Year.	Miles.	Year.	Miles.
1854	2,697	1864	8,076
1855	3,038	1865	8,405
1856	3,343	1866	8,917
1857	4,218	1867	9,301
1858	5,022	1868	9,715
1859	5,488	1869	10,067
1860	5,748	1870	10,192
1861	6,200	1871	10,312
1862	6,512	1872	10,540
1863	7,141	1873	11,806

The railroad system of France was commenced under Louis Napoleon. All the main and necessary lines were then constructed, but under the Republic the progress has been steady for the past three years. Generally speaking the French railroads pay a better dividend than those of any other country.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending September 5, at 426,898 tons, and for the coal year 12,151,129 tons against 13,474,820 tons to corresponding time last year, being a decrease of 1,323,691 tons. The bituminous tonnage for the week is 60,769 tons, and for the year 2,240,315 tons, against 2,047,277 tons to same time last year, giving a total of all kinds for the week of 487,667 tons, and for the year of 14,391,443 tons, against 15,522,097 tons to same time last year, being a decrease of 1,130,654 tons.

☞ The Manistee, Michigan, *Standard* says: "A mortgage has just been left with Mr. Charles Hurd, the Register of Deeds, of Manistee County, to be recorded, given by the Grand Rapids and Indiana Railroad Company to Messrs. Thomas D. Messler, Geo. B. Roberts, Jno. Edgar Thomson, and George W. Cass on 1,160,000 acres of land, to secure the payment of $8,000,000."

☞ At a meeting of the Atlantic and Lake Erie Railroad company, at Columbus, Ohio, on the 9th inst., Col. Jessie R. Shaughan was appointed Chief Engineer. Measures were also taken for the completion of the company's railroad line from Gilead Junction to Toledo, and from New Lexington to the Newark junction—the line from New Lexington southward being already in rapid process of construction.

☞ Mr. H. C. Fiske, of Buffalo, has been appointed General Manager of the Buffalo, New York and Philadelphia Railway Company. Mr. Fiske was at one time the Superintendent of the Buffalo division of the New York and Erie Railroad.

RAILROAD EARNINGS—MONTHLY.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

The asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, September 19, 1874.

Stock Exchange and Money Market.

The demand for Money has been fairly active on speculative and mercantile account, but the offerings of capital have been largely in excess of the requirements of responsible borrowers, and rates have been ruling quite easy at 2@3 per cent on call to the leading Street houses, and 5@7 per cent per annum, on the best commercial credits. The general business of the city is now quite animated in the wholesale line, and shows a gratifying improvement in retail dealings also. The crop movement is comparatively brisk, though checked, in part, by disposition of the farming interest to hold back supplies, rather than accept current prices; a disposition which has been fostered, in part, by some professional advisers, political and otherwise, of the agricultural classes. The recent returns of railroad earnings have been indicative of increased traffic, on the trunk lines, both eastward and westward freights offering more liberally. The Wisconsin decision, rendered this week, as against the subject railroad corporations has been viewed as discouraging to railroad enterprise and management. According to Washington dispatches, the Treasurer of the United States has issued a circular asking the national banks to make an additional deposit with him of legal-tender notes to the amount of 5 per cent of the circulation of the national banks. It is stated that the Treasurer's reason for making this call is that unless such deposit is made the redemption of national bank notes may be interrupted, because the clerical force in the Redemption Bureau of the Treasury has been insufficient to keep up with the work of assorting the notes since the new law went into operation, which was so soon after its enactment as not to give General Spinner the time needed to organize for the new work thrown upon him. The City Banks, in their last weekly return, show an increase in all their averages, other than those of legal tender notes, and circulation, which are slightly reduced. The U. S. Sub-Treasury augmented both its currency and specie reserves. The City banks, last week, diminished their reserve of legal tender notes $278,800, while enlarging their deposit item $3,136,500, and their specie average $971,800. They report an increase of $1,782,900 in the loans and discounts, and a reduction of $56,700 in their circulation. The U. S. Sub Treasury in this city closed the week with a currency balance of $60,938,997, against $60,827,320 the preceding week; and a coin board of $53,482,111, against $52,553,648, on the previous return. The City bank exchanges, during the week, were $390,896,790, or a daily average of $65,149,465. The customs revenue of the port, during the week, was $2,822,168. The City banks reported their average of gold last week at $19,863,100, and their greenback average at $65,325,900. Their deposits stood at $237,882,500. The loan item was $280,867,800. The circulation was $25,605,700.

The aggregate of the outstanding U. S. currency, of all denominations, Sept. 1, was $428,422,258. The outstanding amount of legal tender notes is 382 millions. The National bank circulation is $350,622,208.

The income of the Government, from internal revennes, thus far, in the fiscal year, commencing with July 1, 1874, has been over 22 millions.

The Treasury balances at the opening of business on Wednesday were as follows: currency, $15,373,121; special deposit of legal tenders for the redemption of certificates of deposit, $59,935,000; coin, $72,511,554, including $29,400,740 in coin certificates.

The Gold movement on all accounts has been on a restricted scale. The speculative demand lacks spirit; while the export drain has been light. The requirments of coin for custom house purposes have been the chief source of legitimate inquiry. The price has fluctuated very little. The extremes of the week have been 109⅜ @109⅞, closing at 109¾, as against 109¾ on Wednesday of the preceding week. The specie outflow last week, was $722,088. The imports of specie at this port since Jan. 1, have been $3,969,770. The customs demand for Gold last week averaged $482,000 a day. Foreign Exchange has been rather more sought after, with Bankers' sixty day bills on London closing more firmly on Wednesday at $4 83¼@$4 84; sight bills on London at @4 85¾@$4 86¼ to the £ sterling. The week's exports of Domestic Pro-

duce have been to the currency value of $4,591,531.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $6,953,507.

Government Securities have been in moderately active request on investment account, but at rather easier prices.

U. S sixes of 1881 closed on Wednesday of this week at 117⅝@118; U. S. Five-Twenties of 1862, 112½@112¾; U. S. Five-Twenties of 1864 at 115¼@115⅝; U. S. Five-Twenties of 1865, 116@116¼; U. S. Five-Twenties of 1865 consolidated, 116@116¼; U. S. Five-Twenties of 1867, 117@117¼; U. S. Five-Twenties of 1868, 117@117⅛; U. S. Ten-forties at 111¼@111½; U. S. Fives of 1881, (Funding Loan) 112@112¼; Six per cent. currency Sixes from 117⅜@117⅝.

State and Railway bonds have been in fair demand and have been quoted generally steady in price. Railway and miscellaneous share property has been again quite active, opening strong and buoyant, but closing irregularly.

In general business, an encouraging degree of animation is noted. Domestic produce is more active, though at lower prices for Breadstuffs, while Provisions are lighter; and Cotton is fairly supported, considering the liberal arrivals at the ports. Wool and Tobacco meet with a ready sale at full figures. Hides and Leather are in fair demand and firm. Hardware is moderately active. Metals are in less request. Copper is steady. Pig Iron, quiet. Sales 500 tons No. 1 American at $30. Eglinton Pig Iron quoted at $35; Glengarnock, $37@$38; No. 1 American Pig at $30@$31, No. 2 do. at $27@$29; Forge, $25@$27; English Rails at $50@$52, gold; American Rails at works, $55@$60; Old Rails, $34@$38. Wrought Scrap, $33@$37. Ocean freights have been more active, with rates quoted firmer toward the close.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ John M. Toucey, Manager, has issued an order forbidding the use of the locomotive whistle between the Grand Central Depot and Harlem River.

☞ Mr. G. C. Kimball has been appointed General Manager of the Chicago and Michigan Lake Shore Railroad, in place of A. H. Morrison, resigned.

☞ M. Stanton has been appointed General Superintendent of the Selma, Rome and Dalton Railroad, in place of John B. Peck resigned.

Illinois Central Railroad.

The following letter from Messrs. Robert Benson & Co., of London, published in Herapath's Railway Journal of August 29th, conveys important information:

10 Kings Arms yard, Moorgate street,
London, E. C., Aug. 26, 1874.

As doubtless any information respecting the Illinois Central Railroad Company may be of interest to you, we hand you the following extract of a letter received this day from the secretary of that company. This company is prepared to pay its Construction Bonds on presentation, $2,835,500. This sum is held in trust for that purpose. It owes $5,000,000 of 6 per cent bonds: $2,500,000 payable the 1st April, 1875, and $2,500,000 1st April, 1890. The share capital is $29,000,000. The cash assets on the 8th inst. (subsequent to August dividend) are $1,665,075 43c., and the working stock of supplies $869,254 90c. The Company has 315,846 acres of lands on hand for sale, and about $1,000,000 balances due on contracts for lands sold. The net traffic for the year 1873 was $2,530,890 56-100ths. The decrease in gross earnings for the first six months of 1874 was $199,444 32-100ths. The decrease in operating expenses $420,080 51-100ths, resulting in a net gain for the six months of $220,636 19-100ths. The cash collected in the Land Office the first six months of this year is $207,803 69-100ths; the estimated collection for the year are $400,000; and we may look for three to four hundred thousand dollars per annum for the next half dozen years, which will pay the interest on $5,000,000 of 6 per cent bonds. The Directors have approved of the mortgage to the United States Trust Company, which includes the $5,000,000 of $5 per cent bonds, of which $4,842,000 have been issued, and to cover them $4,842,000 of 7 per cent bonds of the New Orleans, St. Louis, and Chicago Railroad Company are held in trust, to meet the interest payments, and discharge the principal of the 5 per cent bonds. The connections, now perfected with the southern lines, extend over 3,000 miles of railway. Since the 1st May we have had a regular daily traffic, chiefly towards Georgia and Alabama. It is found already that the rail is superseding the river communication; more than half our deliveries, at Cairo, being sent by rail and not by boat as heretofore. Yours faithfully,

ROBERT BENSON & Co.

☞ The Towsontown *Journal* says that "Workmen are still engaged upon the line of the Maryland and Pennsylvania Railroad, between Towsontown and the junction with the Northern Central at Lake Roland. All that now seems necessary is the building of three bridges and the laying of the rails. The bridges are all contracted for and ready to be put up when ordered by the contractors."

☞ The Littleton *Republic* understands the contract to build the Portland and Ogdensburgh Railroad through Whitefield has been canceled, and a full force put on to complete the section remaining to be built to connect with the Boston, Concord and Montreal Railroad at the Fabyan House.

☞ The Commissioner of Internal Revenue says: "Advices from revenue agents throughout the country show a general resumption of business. The indications are that the receipts this month will exceed those of the corresponding month last year."

☞ A. H. Nagle, of Baltimore county, Md., has received the contract for building a wooden bridge over Gwynn's falls, at Wilkens avenue, 450 feet span and 40 feet wide, for $16,850.

Valley (Va.) Railroad.

At a meeting of the city council of Staunton, Va., held on the 12th inst., a resolution was adopted instructing the financial committee to deliver to the treasurer of the Valley Railroad Company, or other proper officer of that company legally authorized to receive and receipt for the same, $100,000 of the six per cent bonds of the city in discharge of the subscription of the city of August, 1871, for $100,000 to the stock of said company, the committee to receive at the time of said delivery a proper certificate of stock to the amount then subscribed for. The committee are also instructed, after proper consultation with the attorney for the city, to see that all things are done, in connection with this payment or delivery of bonds, which may be necessary, to protect the rights and interests of the city, especially negotiating for and securing an acquittance from Mr. Robert Garrett of his claim for money loaned by him to the city, the same to be paid from the proceeds of said bonds, and fixing the dates from which the interest on the various installments or calls on said subscription shall be computed.

Philadelphia and Reading Railroad Colliers.

The Philadelphia and Reading Railroad Company having executed a mortgage to the Fidelity Trust and Safe Deposit Company, containing the following provisions, viz: "Together with all the rolling stock, steam colliers and other ships, barges, tools, machinery, implements and materials now belonging or which may hereafter belong to the Railroad Company, and now or hereafter in use or intended for use," the Collector of the Port of Philadelphia submits:

1. Ought the collector of customs record a mortgage which fails to set forth the names of the vessels mortgaged?

2. Should a mortgage be recorded which refers only to vessels owned by the mortgagee in the future, without specifying the vessels?

It was held by the Treasury Department at Washington, that unless a proper bill of sale is produced, it is the duty of the collector to refuse to receive the document for record, for the reason that it does not give the name of the vessel, nor recite at length the former document. If not recorded, the bill of sale would be valid as against the granter.

Union Pacific Railroad.

The earnings of the Union Pacific Railroad for July, 1874, were $850,142 90, the expenses $370,080 89, and the net earnings $480,062 01. In July, 1873, the earnings were $876,833 39, the expenses $437,182 02, and the net earnings $439,651 37—showing a decrease in earnings of $26,690 49, with a decrease in expenses of $67,101 13, making an increase in net earnings of $40,410 64. For the seven months ending July 31, 1874, the earnings were $5,413,775 67, the expenses $2,792,183 61, and the net earnings were $2,621,592 06—showing a decrease in earnings, as compared with corresponding period of the previous year, of $46,033 99, with an increase in expenses of $2,086 76, making a decrease in net earnings of $48,120 75.

☞ General Braxton Bragg has been appointed Chief Engineer of the Gulf, Colorado and Santa Fe Railway, and will, for the present, have his headquarters at Galveston, Texas. He proposes to have a corps of 100 men in the field shortly.

New Jersey and New York Railway.

The New Jersey and New York Railway Company was formed by the consolidation of the Hackensack and New York Railroad Company and the Hackensack and New York Extension Company, forming together a road of about 22 miles in length extending from Hackensack Junction to Spring Valley, New Jersey. These 22 miles are now in successful operation, and though up to the present time the road has been deprived of the advantages of a terminus on the Hudson River, the thrift and industry of a dense population inhabiting the rich and fertile country through which it runs, have, for several years, enabled it to pay large interest on its capital invested.

The northern extension of this road from Spring Valley to Haverstraw, 16½ miles, is now in course of construction, and when fully completed and in operation, as it is expected to be in October next, will give the company (including the new branch) about 38 miles of completed road. The next section of the company's road to be constructed will be from Carlstadt, on the line of the Erie Railway, to the Hudson River, including the opening of a new tunnel through the Bergen Hills to the Elysian Fields, by means of which its western branch will connect with every railway terminating on the west bank of the Hudson at Jersey City, thus affording additional facilities for their great and rapidly increasing traffic.

For this work, and the construction of their wharves, docks, depots and warehouses on the Hudson, with the Western Branch to the city of Newark, the company have executed a first mortgage on their entire property for $6,000,000, the proceeds of which will be exclusively applied to the completion and equipment of the several extensions. The company are now offering, through their financial agents, Messrs. Knoblauch & Lichtenstein, 87 Broad st., this city, $500,000 of their issue, the proceeds of which are to be specially applied to the completion and equipment of the section of road between Spring Valley and Haverstraw, the balance of the bonds being reserved for the construction of the line from Carlstadt to the Hudson, including the tunnel, etc., for which purpose they will be appropriated as the work progresses.

According to the report of the auditor, the gross earnings of the road for the fiscal year ending March 1, 1874, were $152,736 89, the operating expenses, taxes, interest, etc., $135,690 03, and the net earnings $17,046 86. For the months of March, April and May, 1874, the earnings were $39,894 47, the operating expenses, etc., $25,931 40, and the net earnings, $13,963 07. The amount of capital stock subscribed is $1,205,600 of which $1,201,880 has been paid up. The amount of bonds actually out on the 1st of March was $565,000, and the cost of construction to that date $1,801,789 41. The indebtedness of the company on the 1st of August, 1874, amounted to $64,968 50, against which it had accounts and bills receivable to that date, of $69,917 55.

☞ The South Side Railroad of Long Island was sold at auction on the 16th inst., under foreclosure, and purchased by Herman C. and Alfred L. Poppenhusen, of College Point, L. I. and E. B. Hinsdale, the manager of A. T. Stewart's "Garden City," for $200,000 above its liabilities, which are stated at $2,554,225.

Consumption of Coal.

The importance of the iron industry is often underrated in purely commercial quarters. We can, however, show that in one point of view, namely, as regards consumption of coal, it is fully as important here as in England; that is, in comparison with other industries. We find that the United States produced in 1873, 2,290,658 tons pig iron, exclusive of charcoal pig; 721,775 tons iron rails; 980,000 tons rolled iron of other kinds; 128,296 tons Bessemer steel rails; 40,000 tons cast steel.

We find also that the total production of anthracite and bituminous coal amounted in 1868 to 50,862,940 tons.

For cast steel we estimate only the coal required to convert from bar iron.

The tons used are all those of 2,000 pounds.

Now, having these figures, we are enabled to work backward, by knowing the ratio of coal used to the ton of iron of different kinds, and to the ton of steel. We make the following estimates, based on experience and careful calculation to cover waste, loss in coking, etc., etc.:

One ton pig iron requires	2.25 tons coal.
One ton rolled iron, other than rails	2.40 "
One ton iron rails, including steel-headed rails	2.00 "
One ton Bessemer rails	1.80 "
One ton cast steel	5.00 "

These figures are considered slightly low, certainly fairly representing the average work of the whole country. They refer, of course, to the finished merchantable product in each case. Multiplying one set of figures by the other, we have:

Tons pig iron	2,290,685 x 2.25 =	5,153,098
Tons iron rails	721,775 x 2.00 =	1,443,550
Tons rolled iron	980,000 x 2.40 =	2,352,000
Tons of Bessemer rails	128,296 x 1.80 =	230,878
Tons of cast steel	40,000 x 5.00 =	2,000,000
Total tons coal		9,380,408

Taking these totals we find that the manufacture of iron in the United States requires no less than 18¼ per cent of the coal mined in the country. This is merely for the production of the metal, not including the transportation of the 18¼ per cent of the entire coal, nor the power used in mining it.

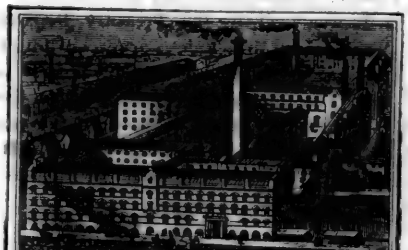
Our estimate includes iron, excepting rails only, as a raw material for a second series of industries. The pig iron goes into castings say to one third the amount produced, and the plate and bar iron goes into a vast variety of products. The foundries, forges, mills, and mechanical and locomotive shops form a most extensive series of industries, perhaps rivaling the original in importance. But they all depend on the original production of iron, as given above, and this industry alone uses nearly one-fifth of the entire coal mined in the country.

We cannot compare our estimate with the English figures, as they include all the other industries mentioned, while we are unable to make an estimate of them. If, however, England mined last year 130,000,000 tons of coal and used 89,000,000 for all her iron and steel works, we make a good showing with over 9¼ million tons used solely to produce the iron itself.

When we consider the facts involved here, we see how vast an industry this represents. Coal forms but a small part of its needs; its demand for iron ore peoples portions of our country; and its need of limestone, fire-brick, machinery, and manufactured products of all kinds, give rise to an enormous interchange of products. Very few have any idea of the transportation required to effect this exchange. It is easy to see why such an industry should be fostered. We can judge of its value to England by the sacrifices she makes and the efforts she puts forth to break up our trade and retain the markets of the world. It is worth as much to us as it is to her, and it is incumbent on us to use every means in our power to supply our own wants and transfer hither as much of her trade as we can.—*U. S. Railroad and Mining Register.*

Columbus, Chicago and Indiana Central Railway.

Col. Thomas A. Scott, President of the Pennsylvania Railroad Company, has issued, under date Sept. 12, 1874, the following notice:



The Pennsylvania Railroad Company have been advised, through several correspondents since Aug. 24th, that the following statement has been placed upon certain Bonds of the Columbus, Chicago and Indiana Central Railway Company, secured by the second mortgage of that company.

"The within bond is additionally secured by a lease of the road to the Pittsburg, Cincinnati and St. Louis Railway Company, and the payment of the interest and principal of the entire series of bonds mentioned herein is guaranteed by the Pittsburg, Cincinnati and St. Louis Railway Company and the Pennsylvania Railroad Company."

The Pennsylvania Railroad Company and the Pittsburg, Cincinnati and St. Louis Railway Company desire to state to all parties interested, that neither of said companies ever authorized this or any other statement, or the placing thereof upon any of said bonds or on any other bonds of said Columbus, Chicago and Indiana Central Railway Company; and they were not aware of the existence of any such statement until after the failure of the Columbus, Chicago and Indiana Central Railway Company to pay the interest on its second mortgage bonds, Aug. 1, 1874.

The second mortgage bonds are not included in the terms of the existing lease of the Columbus, Chicago and Indiana Central Railway to the Pittsburg, Cincinnati and St. Louis Railway Company, and neither that company, as lessee, nor the Pennsylvania Railroad Company, as the guarantor for the fulfilment of the conditions of the lease, is in any way responsible for these bonds or the interest thereon, unless there shall be a surplus of net earnings or rental applicable thereto under the terms of the lease under which this line is now operated.

☞ The use of the steam whistle, except as a special danger signal, has been discontinued on the Providence and Stonington Railroad.

SPENCERIAN

STEEL PENS.

These Pens are comprised in 15 numbers; of the NUMBER ONE PEN alone we sold more than

5,000,000

in 1873,

and the sale is continually increasing.

They are of superior English make, and are justly celebrated for their elasticity, durability, and evenness of point. *For sale by the trade generally.*

☞ *To accommodate those who may wish to try these Pens, we will send a Sample Card, containing all of the 15 numbers by mail on receipt of 25 cents.*

IVISON, BLAKEMAN, TAYLOR & CO.,

138 & 140 Grand Street, N. Y.

Railways in Gt. Britain.

In England and Wales at the close of 1873, there were 11,369 miles of railroad in operation, representing a capital of $2,450,030,000. The number of passengers conveyed last year was upwards of 400,000,000; the traffic receipts were $235,000,000, and the working expenses $130,000,000. Scotland had 2,612 miles of road, carried 37,500,000 passengers, received upwards of $30,000,000, and the working expenses amounted to $17,590,420. Ireland had 2,000 miles of road, carried 16,500,000 passengers, received $12,500,000, and cost for working expenses $7,106,935. The total capital invested in railroads in the United Kingdom amounted to $2,940,000,000.

78 E. STATE-ST.,

TRENTON, N. J.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company

THE

NEW-JERSEY AND NEW-YORK RAILWAY COMPANY

Offer for sale through their Financial Agents,

Messrs. Knoblauch & Lichtenstein,

37 BROAD ST., NEW-YORK,

$500,000 OF THEIR

FIRST MORTGAGE 7 PER CENT. GOLD BONDS.

Coupon Bonds of $1,000 (£200) each.

Interest March 1 and Sept. 1,

PAYABLE IN NEW-YORK OR LONDON,

At the option of the Holders.

Principal due 1893, at 87 1-2 and accr. inter.

Particulars, Maps, and Pamphlets at above Agency.

☞ A patent for Processes for Preserving Wood has been issued to R. W. Archer, Corpus Christi, Texas. This mode of preserving wood, consists in first charring the wood in the usual manner, and then filling the crevices with sand, and then coating the whole with coal tar.

Penobscot Bay and River Railroad.

A contract was concluded at Belfast, Me., on the 10th inst., between J. H. Leadly & Co., of New York, and President Hickborn of the Penobscot Bay and River Railroad Company, for the construction of the road from Rockland to Bangor, a distance of about 58 miles, for $35,000 per mile —the whole to be completed on or before July 4, 1876. It is proposed to commence work on the road this fall, and finish it in one year. At Bangor, the road will connect with the European and North American and Maine Central Railroads, at Belfast with the Belfast and Moosehead Lake Railroad, and at Rockland with the Knox and Lincoln Railroad. The route of the road lies along the west bank of the Penobscot, and when finished will supply by its connections a continuous line from Bangor to Portland.

Chesapeake and Ohio Railroad Company.

As so large a majority of the Bondholders and Creditors have accepted the Company's proposition, it is very important for all interests that the balance should do so without further delay; this will enable the Company to proceed at once with their arrangements for increasing their equipment, extending their line to deep sea water, and gaining a rail connection with Cincinnati and Louisville. Our circulars of Aug. 1st and Sept. 10th can be had on application, giving every particular of the plans and affairs of the Company.

Bondholders can leave their coupons with us, and we will attend to all the details of funding them without charge.

FISK & HATCH,
No. 5 Nassau St.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending September 12, at 449,955 tons, and for the coal year 12,594,612 tons, against 13,705,047 tons to corresponding time last year, being a decrease of 1,110,435 tons. The bituminous tonnage for the week is 61,665 tons, and for the year 2,298,688 tons, against 2,218,878 tons to same time last year, giving a total of all kinds for the week of 511,620 tons, and for the year of 14,892,300 tons, against 15,923,420 tons to same time last year, being a decrease of 1,031,120 tons.

Grand Trunk Railway.

A letter to the Boston *Journal* dated Portland, Me., September 21, 1874, says:

The work of changing the gauge from broad to narrow on the Grand Trunk Railway, between Montreal and Portland, will begin next Saturday at 2 A. M. The squads will be divided into twelve men each, and each squad be given five miles, beginning at the centre of each section and working each way. In the yard here there will be fifty men. The work will be completed by Monday, and it will mark an era in railroad affairs in Maine unsurpassed in importance by any in its railroad annals. The close alliance between the Grand Trunk and the Boston and Maine will give the latter road an immense freight business. The cars of the Grand Trunk Railroad for the first time in its history will be seen in Boston, and its merchants will find that "the new departure" will be of as great benefit to them, as to those of this city. There will be fewer blockades of Grand Trunk Railroad freight here, for instead of the awkward and expensive method of transshipment and handling as now, through freight will at once be sent on its way over the other roads westerly of this city. The foreign steamship lines, Allan and Dominion, will find their freight more certain and the delays and bothers less than before.

The Grank Trunk Railway have had made several new cars and engines besides the changing over of their old broad gauge ones. Several of the narrow gauge cars are on their way from Montreal via the Vermont Central and Boston and Maine roads to be ready for business. No trains will pass over the Grand Trunk between Friday the 25th, and Monday the 28th, during the changing of the gauge.

Five of the new Burnside narrow gauge engines for the Grand Trunk arrived here on Friday last from Providence. They are very powerful engines and have six driving wheels each, and are to be used on the heavy grades between Island Pond and Sherbrooke.

The new freight house, the extensive wharf and the improvements of the general property of the Grand Trunk in this city are rapidly approaching completion, and no road in the country will be better conditioned than the Grand Trunk.

☞ The completion of the Baltimore Short Line Railroad between Warren station, Athens county, Ohio, and Parkersburg, shortens the line between Cincinnati and Parkersburg fourteen

miles, and is a vast improvement to the Marietta and Cincinnati Railroad.

Maine Central Railroad.

The earnings of the Maine Central Railroad and Branches for the years ending December 31, 1872 and 1873, were as follows:

	1872.	1873.
From passengers.....	$877,408 72	$916,405 22

Notes receivable	6,418 14
Waterville Bridge....	29,094 31
Total, as above....	$498,121 11

From a comparison with the Report of last year, it will be seen there is an increase in gross receipts of $131,598 49, while the working expenses have been but slightly increased. From the earnings of the road, apart from the working expenses, the whole amount of interest on the bonded and floating debt, the dividends on Portland and Kennebec Railroad and Yarmouth Stock, Maine Central and Androscoggin Railroad Scrip, and rents of leased roads, have been paid, leaving a surplus of $134.188 30. And while large expenditures have been made for other purposes, such as $342,000 for locomotives and cars, $80,000 for Benton line of road, $29,000 for foundation and approaches of Waterville bridge, filling Portland and Belfast wharves, balance of Maine Central Extension Line—amounting in all to about $460,000—have all been paid, there has been an increase only of $150,798 46 the past year, to the total liabilities of this corporation. The President in his report says:

The total earnings for 1872 were $1,936,470 29; total earnings for 1873, $2,068,077 78; showing an increase of $131,598 49. The operating expenses for 1872 were $1,328,982 48; net earnings for 1872, $607,496 81. The operating expenses for 1873 were $1,330,501 44, net earnings for 1873, $737,576 34, showing an increase of net earnings for 1873 of $130.738 44. Our receipts from passengers were $916,405 22; from freight, $1,010,615 11; from all other sources, $141,057 45. The number of passengers transported has been 719,760, an increase of 47,545 over the year 1872. Average distance traveled by each passenger, 38¼ miles; average price per mile for passengers 3¼ cents. The number of tons of freight carried has been 401,904; increase over 1872, 42,617 tons; average miles per ton of freight, 57.6; average price per ton per mile, 4.37 cents. The number of miles run by engines connected with passenger trains has been 580,593; with freight trains, 428,115; for wood, construction and miscellaneous work, 270,508 miles. The trains have been run with great promptness and care, so that no important accident has occurred during the year. This is valuable testimony in favor of the employees of the road, showing that they have carefully and judiciously discharged the responsible duties of their positions.

Besides keeping our rolling stock in good repair, we have added to it the past year 6 new locomotives, at a cost of $75,000; 6 passenger cars, 5 baggage and mail cars, 1 postal car, 200 merchandise, 115 platform, 4 conductors' saloon cars and 6 snow plows, 4 of which are to take the place of those destroyed last winter.

The following items of interest in expenditures to improve and keep the road in prime condition, are taken from the report of the Chief Engineer, Mr. Holt.

"We have built eleven new bridges, amounting in the aggregate to 1,232 feet in length, and costing $22,449 44, and repaired fifty-eight other bridges and culverts, at a cost of $24,950 42, making the whole expense on bridges and culverts during the year $47,400 36. We have built a new freight house at Pittsfield at a cost of $2,208 90; 5 new water stations, as follows: Brunswick, Vassalboro, Leeds Junction, North Jay, and one on the Skowhegan Branch, at a cost of $7,545 76. Three new turn tables, as follows: Bath, Skowhegan and Dexter, at a cost of $3,658 37. We have expended for the repairs of passenger stations, freight houses, water stations, turn tables and other buildings, the amount of $33,760 14, making the total expenditure on buildings during the year, $47,173 17. We have laid 31.06 miles of new rails, at a cost of $113,901 27, and 20.4 miles of rails have been repaired at the company's shops and relaid, at a cost of $11,571 91. 69,865 new sleepers have been put in the track, at a cost of $26,904 75. We have ballasted 67.8 miles of track at a cost of $21,949 41; have changed one mile of road bed at Vassalboro' and Skowhegan, and have laid three miles of new side track. The total cost for the repairs of track for the past year has been $395,758 20. 86.6 miles of new fence have been built, at a cost of $13,804 85. On account of the extraordinary severity of last winter the amount $9,417 59 has been expended for the removal of snow and ice. Other expenditures have amounted to $6,881 86.

There has been expended for permanent improvements the sum of $134,333 53, on the following structures: New Benton line, 4 miles in length; new bridge between Waterville and Kendall's Mills; new wharves at Portland and Belfast; two new stone arches in place of wooden structures, and for change of grade at Etna Ledge."

We have encountered serious misfortunes by storm and fire during the year, which we trust will not be of annual occurrence. The winter of 1873 was one of the severest for many years. The unusual quantity of snow packed heavily upon our track, by continued high winds, taxed our locomotives to their utmost capacity, disabling twenty-one of their number, several of which were badly damaged. Through the efficiency of our mechanical department, all have been thoroughly repaired and improved, so that nearly every engine of the company is in good condition.

The loss of the bridge at Kendall's Mills by fire, which occurred on the 23d of April, was a serious misfortune. It had recently been repaired at very heavy expense, and was in good condition for many years service. At the time of the fire we were doing a large through traffic, and the interruption to our business, and the daily expense of making a connection over the toll-bridge at that place was large (nearly $350 a day), and inconvenient and annoying to the public. This was the second time a bridge at this place had been burned in twelve years. It was a structure of nearly 2,000 feet in length, and crossed the river at an elevation of about fifty-five feet above the water. While great care had been taken to render it safe to travel, the public, to a great extent, could not view it in that light, and a growing prejudice existed against it. To rebuild the bridge, it was necessary to wait for low water in the river, and several months must elapse before the old connection could be restored. After a careful examination of the river below the burnt bridge, by competent engineers, a good crossing was found where the river could be spanned with a bridge of 618 feet, at a point about two miles south of the old location, and nearly midway between the villages of Kendall's Mills and Waterville. In order to make a connection of our rails as early as possible, and give time to erect a bridge on the new location, it was deemed expedient to extend our track down the east bank of the river, four miles, to Winslow, where a connection was made June 16th and our through line restored. That portion of this connecting link which lies south of the new bridge location, was constructed for a temporary purpose, to be discontinued when that bridge is completed. At this writing, the piers and other masonry are completed in a most thorough manner, and a first class iron bridge is being placed in position by the eminent firm of CLARK, REEVES & Co. In a few weeks, with favorable weather, our trains will be passing over this elegant and permanent structure. This gives us three main iron bridges, erected within the last three years, at a cost of $250,000, which secures our line from Portland to Bangor against interruption by fire, from which we have severely suffered heretofore.

It is particularly interesting and encouraging, to notice the constant annual increase of earnings of the road; showing net earnings the present year of a sum sufficient to pay the interest on all loans and liabilities, rental of leased roads, and leaving a balance of $134,188 30. This balance of net earnings has been used to meet the extraordinary outlay caused by the destruction of the bridge at Kendall's Mills, believing that such use of it would be more satisfactory to the stockholders than a dividend to that amount. Arrangements are being made for the funding of our floating debt. This done, and a dividend ought to be reached the coming year.

That the stockholders and all persons interested in our Consolidated Bonds, authorized by act of the Legislature, Feb. 7, 1872, may see that the Directors have by their action provided so far as possible against any misappropriation of these bonds, now, or hereafter, we subjoin the vote of Directors of October 2, 1873, on this important matter:

Whereas, The Maine Central Railroad Co., by its vote of March 19, 1872, authorized the issue of its consolidated Bonds for $9,000,000, pursuant to the Act of February 7, 1872, which Bonds are secured by a mortgage of its railroad and appurtenances and rolling stock, and that of the Portland and Kennebec, Somerset and Kennebec, Leeds and Farmington and Androscoggin Railroad Companies, made to Artemas Libbey, Josiah H. Drummond and Galen C. Moses, Trustees, and by the vote of said company were appropriated, in part, to take up existing mortgage bonds now outstanding against said railroads, as by said vote appears:

Now, the more effectually to insure the execution of said trust by said Trustees, and to protect all parties that shall be interested in said Bonds, it is hereby provided (said Trustees concurring therein), and

Voted, That it shall be the duty of said Trustees and their successors in said trust, hereafter to withhold their certificate upon said Bonds, so far and to that extent, that the aggregate amount of neither class of consolidated Bonds of Classes B, C, and D, that shall been certified by them, shall at any time be more than $75,000 in excess of the aggregate amount of the Bonds and claims that shall have been actually paid, taken up and cancelled, for the payment of which said class is appropriated and designed to be applied as follows, viz:

Class B, $3,975, to discharge liabilities of the Maine Central Railroad Co., as follows:

$1,100,000 7 per cent bonds	$746,300
Bangor City loan	514,000
Maine Central, $500,000 loan	2,800
A. & K. $1,100,000 loan	1,100,000
M. C. interest scrip	386,892
Bills payable	711,605
Extension bonds	491,500

Bonds of Class B designated for bills payable, may be certified by the Trustees upon order of the Directors and the certificate of the Treasurer that they are all needed to provide means to meet the liabilities of the company, not exceeding, however, the amount appropriated for said bills payable as above.

Class C, $2,850,000, to discharge the liabilities of the Portland and Kennebec Railroad Company, and provide for the proposed exchange and cancellation of stock for bonds as follows:

Stock	$741,400
Yarmouth bonds outstanding	47,000
K. & P. 1st mortgage	217,300
P. & K. funded interest	20,698
Portland loan	90,000
Consolidation P. & K. bonds	1,155,000
City and town loan	8,100
Somerset & Kennebec, 1st mortgage	300,000
" " 2d "	360,000

Class D, $1,175,000, to discharge the liabilities of the Androscoggin, and Leeds and Farmington Railroad Cos., as follows:

Bath City bonds	$425,000
Leeds and Farmington bonds	633,000
Scrip to Androscoggin R. R	110,000

Voted, That said Trustees shall annually report the amount of Bonds of each of said classes certified by them up to that time, and the amount of the old Bonds and claims evidenced to them to have been taken up thereby.

Voted, That the Clerk present an attested copy of these votes to said Trustees, and request the assent of each thereon, in writing in the trust and duty hereby imposed, and make record thereof.

A true copy of record,
Attest: JOSIAH H. DRUMMOND,
Clerk of Maine Central Railroad Company.

The undersigned, the above mentioned Trustees, assent to and concur in the foregoing modification of their trust. Dated this second day of October, A. D. 1873.

ARTEMAS LIBBEY,
JOSIAH H. DRUMMOND } Trustees.
GALEN C. MOSES,

The Directors have made an agreement with the Eastern Railroad Company, whereby the business interests of the two companies are united for a long term of years.

	$12,650,704 93	

President.—ANSON P. MORRILL.

Directors.—A. P. Morrill, R. D. Rice, A. Coburn, J. B. Brown, Darius Alden, Geo. M. Patten, H. N. Jose, Geo. L. Ward, Lewis Pierce, Noah Woods, Lysander Strickland.

General Manager.—CHAS. F. HATCH.

Treasurer.—J. S. CUSHING.

☞ The Philadelphia *Ledger* says that the Philadelphia, Wilmington and Baltimore Railroad Company are now testing a novel arrangement to secure greater safety to trains. The invention consists of an iron pipe, one end of which extends through the cab on the locomotive, and the other near where the engineer sits or stands when on duty. In the upper end of the pipe is a camera, upon which the reflection of the train is thrown, and therefore always in view of the engineer when he looks in at the lower end of the pipe. The object of this invention seems to be to give the engineer immediate notice of cars that may become detached by the breaking of couplings, or other accidents to cars connected with the train.

☞ Work on the New York and Canada Railroad is progressing slowly. The track is nearly all laid south of Ticonderoga, and the Lake George branch is just completed. It is thought the cars will commence running from Port Henry to Whitehall about November.

Chesapeake and Ohio Canal.

The Chesapeake and Ohio Canal Company are operating their great work to such advantage that in a few years we may expect to see the whole outstanding debt cancelled. The past due coupons are being rapidly discharged and all the signs betoken an unusual period of prosperity, which will make her large investment a lucrative one to the State, more so than any work of internal improvement in which she has heretofore embarked her credit. It is not at all improbable that at no very distant day we may expect to see the State's revenues from this source ample to liquidate her current civil expenses. In the meanwhile the officers of the company are not satisfied with depending on the present slow and expensive mode of transportation, and are considering plans to supersede the same with expedients better adapted to rapid transit of the immense and annually increasing freight which seeks this outlet to the markets. Some time since the officers of the company and a number of others interested in the matter took a trip of inspection along the entire route, with a view of testing the efficiency of the proposed substitution of steam for animal locomotion. Hitherto all experiments designed to accomplish this object have failed, no inventor having yet suggested any feasible method that would not originate more inconveniences than it would suppress. In consequence, all such projects have had to be abandoned, and the use of the old system continued, in spite of its manifest objections and liability to contend with the rapid transportation afforded by railroad companies.—*Annapolis Advertiser.*

☞ The Treasury Department at Washington hold that machinery, chiefly of iron and wood, though having small portions of steel, does not necessarily take the classification of manufactures of steel, but retains that of manufactures of iron or of wood, according to the leading material. Separate values or parts of steel, should, however, pay duty as manufactures of steel.

☞ Mr. Whitehead, principal contractor, has commenced grading the Pembina branch of the Canadian Pacific Railway. Grading will be completed by the first of November, and rails and track will be in thorough order by the first of July, 1875. The impression is that trade with St. Paul will be very brisk next summer.

☞ On the 31st of July, 1874, there remained outstanding of the first series of $180,000 of the Land Grant mortgage bonds of the Flint and Pere Marquette Railroad but $7,000 and of the $500,000 second series, $83,000; or but $92,000 of the entire $980,000. The balance of these will probably be paid and canceled during this year.

☞ Work on the Baltimore, Pittsburg, and Chicago Railroad is progressing, and the expectation of the builders, the Baltimore and Ohio company, that communication with Chicago will be opened by the middle of October, will undoubtedly be realized.

☞ The Sandusky, Mansfield and Newark Railroad Company has declared a dividend of Two per cent. on the share capital stock of the company, payable on and after Oct. 1, at the First National Bank of Sandusky, in par exchange to Eastern holders.

☞ The use of the steam whistle on arriving at or departure from stations on the Intercolonial Railway has been abolished. At stations other than main stations the ringing of the bell denotes departure. At main station gongs are used.

Lehigh Coal and Navigation Company.

We gave in our issue of March 14th the Report of the President of this company for the year ending December 31, 1873. The financial condition of the company at that date is given in the annexed Balance Sheet:

Lehigh and Susquehanna Railroad Construction and Branches		$12,764,395 17
Lehigh Navigation and Shipping Pockets		3,000,000 00
Shipping Improvements—Hazardville		99,050 58
Coal Lands—Lehigh Region		5,000,000 00
Greenwood Lands and Improvements		948,277 13
Coal Improvments—Lehigh Region		1,818,258 88
Summit Hill Railroad Improvements		96,254 37
Landed Property and Improvements		883,178 04
Canal Equipment		210,181 05
Mining Equipment and Supplies on Hand—Lehigh Region		625,064 83
Coal on Hand		153,275 61
Contingent Fund		390,550 83
Bills Receivable	$107,864 19	
Bonds and Mortgages	62,727 41	
Ground and Water Rents	174,634 54	
		345,226 14
Cash on hand		234,497 69
Balance due by Agents and Rents due Company		18,854 62
Gold Loan, 1897, assumed by Central R. R. Co. of New Jersey		2,310,000 00
Gold Loan, 1897, assumed by Honey Brook Coal Company		500,000 00
Gold Loan, 1894, assumed by Honey Brook Coal Company		856,000 00
Due by Honey Brook Coal Co., on acct. sale Wyoming property		3,122,803 63
Balance of Individual Ledger		285,678 24
		$33,651,546 81
Capital Stock		$9,390,350 00
Loan of 1877	$762,779 18	
Loan of 1881 (Nanticoke)	9,000 00	
Loan of 1882 (Convertible)	692,100 00	
Loan of 1884	5,566,276 70	
Loan of 1894 (Convertible Gold)	856,000 00	
Loan of 1897 (Gold)	4,916,500 90	
Loan of 1897 (Railroad)	2,400,000 00	
Loan of 1911 (Consolidated Mortgage)	199,000 00	
Greenwood Mortgage Loan, due February 1, 1892	796,000 00	
Do. due October 1, 1877 (L. S.)	140,000 00	
		15,937,655 88
Bills Payable		3,408,907 58
Due Boatmen and Depositors—Manch Chunk		253,644 97
Due Central R. R. Co. of N. J., for L. and S. R. R. Construction Work		840,000 00
Ground Rents, Mortgages, and Dowers		66,450 67
Pay Rolls charged to business of 1873, payable in January, 1874		104,920 58
Vouchers charged to business of 1873 payable in January, 1874		76,091 49
Unclaimed Wages due and unpaid		8,167 15
Dividends due and unpaid		719 20
Interest due January 1, and arrears		114,251 66
Profit and Loss		2,587,304 14
Dividend Fund (subject to deduction as stated in report, page 11)		863,083 49
		$33,651,546 81

At an election held February 24, 1874, the following named persons were chosen officers of the Lehigh Coal and Navigation Company for the ensuing year:

President.—E. W. CLARK.

Managers.—Francis R. Cope, Francis C. Yarnall, Fisher Hazard, Charles Parrish, George F. Tyler, Philip C. Garrett, Charles Wheeler, George Whitney, Alexander Biddle, John Leisenring, Samuel Thomas.

Treasurer.—SOLOMON SHEPHERD.

Secretary.—F. MITCHELL.

Pennsylvania Railroad.

REPORT OF THE INVESTIGATING COMMITTEE.

This committee, which was appointed by the chairman of the meeting of stockholders held on the 10th of March, 1874, consists of William A. Stokes, Chairman; Wm. H. Kemble, David E. Small, John S. Irick, William C. Longstreth, John A. Wright and A. Loudon Secretary. These gentlemen, appointed at the suggestion of the directors to investigate the condition of the company in every respect, are shareholders but entirely disconnected with the management of the road. The resolution creating the committee gave it every facility for making a thorough investigation and a reliable report. They divide this report, which has just appeared, into 14 Articles, designated as follows:

1. Statement of General Account. 2. Valuation of Property and Equipment of Main Line and Branches. 3. Liabilities as Guarantor. 4. Policy in Controlling other Roads and Canals. 5. General Account of all Railroads Controlled. 6. Use of the Road by Private Parties. 7. Coal Lands. 8. Finances. 9. Powers and Election of Directors. 10. Sources of Distrust in Railroad Stocks in General. 11. Organization. 12. *Resume.* 13. Conclusion. 14. Resolutions. Also five appendices giving tabulated statements of stocks and bonds and earnings and date of maturity of mortgages and two maps.

The committee reports virtually that after a most critical examination it finds the road on a most stable basis, and that on some mooted questions it has been obliged to acknowledge the wisdom of the policy pursued, against its own previous inclination. The substance of the report amounts to this, that the committee say that the general policy heretofore pursued was necessary, that in some instances losses were incurred (the data given by the committee shows them to be of a character unavoidable in large transaction covering long periods), but that the general result of the workings of the company had been most successful, and that the company is, and was indeed, far stronger than it had represented itself on its own books.

The committee are decidedly of the opinion that owing to the vast interests involved to competition of other corporations, and to vexed questions of railway management and finance, a change in the policy of the road is advisable, and also a change in the composition of the Board. At the suggestion of the present President, on his acceptance of the office, the Board of Directors made many advantageous changes in respect to the government of the service of the company. These regulations, the committee reports, should be adopted by the stockholders and placed beyond change.

The report is an able and exhaustive document, and gives a clear insight into the affairs of the road. The committee could state nothing more favorable to the past management than the fact that each share of stock is worth in actual property valuation 174 per cent of its par value; and that the assets over and above all debt, bonds and stock amount to $50,810,930 08.

It is a most opportune occurrence that this general inventory was taken, in a reliable way, just when a new management assumed the reins. All circumstances and relations are thus clearly defined as the basis of a new period of effort, of which the aims may be regarded as radically different from those of that just closed. In the latter period the corporation was built up and strengthened, and protected by the necessary extensions and acquisition of connecting roads; measures of all kinds were necessary to insure suitable outlets and permanent provision for freight traffic. All this was done well. Now, the changes taking place in all directions necessitate the consolidation of all these roads and interests as intimately as possible, into one grand whole as far as possible. We may be confident that this will be wisely done, and the necessities of the times freely met and foreseen.

The conclusions of the articles into which the report is divided may be summed up as follows, under each head:

1. The general account of the Treasurer has been rigidly examined, and large reductions made in various creditor items for satisfactory reasons due to different basis of valuation adopted by the committee. The revised General Account stands as follows:

Debtor.

To stock paid in	$68,144,475 00
Mortgages and ground rents	43,145,784 73
Bills payable and acceptances	4,611,797 24
Accounts payable	11,658,791 12
Balance to credit of profit and loss	4,985,254 46
	$132,545,102 55

The credit side, as revised by the committee, stands:

Creditor.

By total construction account	$48,571,808 18
" Bonds and stocks owned	49,711,087 00
" Fuel and materials on hand	4,945,650 67
" Bills receivable, advances, &c	23,945,107 44
" Appraised value of suspense account	1,000,000 00
" Balance in hands of agents and Treasurer	4,371,449 26
	$132,545,102 55

The committee have confidence in the future value of the profit and loss account, but prefer to err on the side of prudence. The committee, however, present a statement of the Profit and Loss account in their judgment correct. They increase it on the debit side to $50,810,938 08, and on the creditor $45,826,675 62, because they find the valuation of the road and appurtenances far too low, being only $19,728 59 per mile of single track.

2. As regards valuation of the road and appurtenances, the committee have made an estimate at fair values, and present the following summary: Real Estate—Total number of properties 785, and acres, 7,833 23-100, valued at $18,556,022 83; Machinery and Tools appraised, irrespective of cost, at $1,270,420; Equipment being 15,900 eight wheel cars, 1,791 four wheel cars, 521 passenger traffic cars, and 879 locomotives, all valued at $20,098,600; Road bed and Telegraph including branches, $65,473,441; making the above total, in Article 1, of $45,826,675 65. The properties represented are very valuable, and could not be procured by rivals even at a much higher cost than the appraised increased value.

3. As an endorser of bonds of other companies, the committee report the company liable for a principal of $33,988,000, the annual interest of which is $2,106,440, and for the annual payment of $180,000. As a guarantor of rental, the company is liable to the extent of $18,862,319 94, on all of which there was a deficiency in 1873 of only $1,470,129 45, confined to roads and interests east of Pittsburg. Estimating for 1874, the deficiency should not exceed $280,000.

4. In carrying out the necessary policy of extension and control rendered necessary by competition and to secure trade to Philadelphia, two general systems of roads west of Pittsburg were aided to completion, controlled or leased, namely, the Pittsburg, Fort Wayne and Chicago system, and the Pittsburg, Cincinnati and St. Louis, or Southern system, the average cost of the whole of

which, including Equipment, is $57,341 17 per mile. The net gain to the Pennsylvania Railroad on the operation of these systems in 1873 was $1,023,612 12, or nearly enough to pay for all additions to track and equipment of the Southern system of roads. The probable loss on the Southern system will be for some time $500,000 yearly, but the profits on the Northern system should square the account fully.

The Pennsylvania Railroad Company is now in no way liable for any guarantees, leases or otherwise, on account of any railroad south of Washington.

The Eastern system of roads, owned and operated by the Pennsylvania Railroad, includes 2,408 miles of railroad, and 408 of canal, and including the railways east of Pittsburg to New York.

The committee report that the Philadelphia and Erie cannot be expected to pay more than the interest on its funded debt, and on the equipment supplied by the Pennsylvania Railroad. The Allegheny Valley Railroad is well located and commands an immense tonnage, but years will be required to heal the wounds inflicted by the independent management, that made it cost over $117,000 per mile. The Northern Central Railroad has a large local and through traffic; affords a direct outlet for anthracite coal to the centre of the State of New York, and is one of the great coal avenues to the coast, but it is financially unable to utilize these advantages. It is the more important it should do so now that the City of Baltimore has built the Union Railroad to connect it with the Chesapeake Bay. An absorbtion or absolute control of this road is plainly necessary. The Pennsylvania Canal System embraces altogether 36.3 miles, and was bought in 1857 at the appraised value of $1,000,000; organized in 1867 as a distinct corporation, with a capital of $2,750,000.

This corporation absorbed the West Branch in 1867, the Wyoming Valley in 1869, and the Wisconsco Canals, and expended its whole earnings down in the end of 1873 in deepening and enlarging the main line from Columbia to Williamsport, and acquiring a stock of boats (184 in all). Owing to these improvements, the cost of shipments from Wilkesbarre to Havre de Grace, was reduced from $2 25 to $1 per gross ton, and with boats of over 250 tons can compete with railroad traffic at the present low rates. The United Railroads of the New Jersey Division embraces 356 miles, and its control was absolutely necessary to give the company command over through traffic West and South. The Delaware and Raritan Canal has proved very profitable paying in 1873, $706,778, 66 net profit; nearly double the profit in 1874. On all the New Jersey lines the losses in three years have been $1,840,217 27, but these losses, being charged to expense account, will be repaid on profits. The Pennsylvania Railroad Division embraces 1,021 miles; it may be, in our opinion, regarded as ultimately the most valuable road in the United States, being located among vast mineral industries, in a thickly settled country, and being the most important artery of travel and transportation, taking into account the diversified industries and comparatively dense population of the regions it serves.

5. The comparative earnings of the various systems of railroads is tabulated in systems as follows: Northern or Ft. Wayne system includes 1,966 miles of single track, with net expenses of $7,011 42, and net receipts of $4,820 86 per mile. The Southern or Pittsburg, Cincinnati and St. Louis system includes 1,504 miles of single track, with net expenses of $7,727 07 per mile, and net earnings of $898 92 per mile. The Eastern or Pennsylvania system includes 3,159 miles of single track, about 600 miles of which are double, much of this part being laid with steel rails. Its net expenses are $12,432 per mile, and net earnings $6,000 96 per mile. The Pennsylvania system pays well because cheaply built with fine engineering. The Northern system was built at too high a cost, while the Southern system cost extravagantly. Hence their relative rates of profit.

6. The Pennsylvania Railroad Company is compelled by law and its charter to allow its tracks to be used by individuals or corporations as common carriers at proper compensation. Repeated decisions have removed all doubt on this subject. After a careful examination of the matter, the committee report that it is advisable that the Empire Line should continue its service, and that they believe the company wise in maintaining the old organization of the Union Line as part of the staff of the Pennsylvania Company. Respecting the Pullman Palace Car Company the committee express no opinion further than that passengers should pay the railroad more for the accommodation enjoyed than they now do.

7. The coal lands owned wholly or partly by the Pennsylvania Railroad embraces a total of 27,950 acres. The Lykens Valley lands lie in a block extending nine miles, with an area of 9,200 acres. No other company has access to these veins, containing on a low estimate 100,000,000 tons of coal, commanding 75 cents per ton more than any other anthracite. The Shamokin coal lands amount to 7,808 acres. The coal mined there is of good quality and liked in Boston, but subject to little competition. The Hazleton property, owned by the Pennsylvania Railroad exclusively, covers 2,100 to 2,200 acres. Explorations show that almost the whole of this land is underlaid with coal, and borings indicate that the Mammoth Vein underlies a large portion of it. If this is the case the value will be increased from a cost of say $137 an acre to a value of at least $1,000 an acre. The Susquehanna coal property lies in a basin, on both sides of the Nanticoke Dam, containing 5,823 acres, and no property in the State is better adapted for shipping coal, particularly on the completion of the bridge at Nanticoke to connect with the Lackawanna and Bloomsburg Railroad. The money put into these lands is extremely well invested, but the policy of controlling mining and other interests apart from the railroad is regarded as of doubtful propriety. Purchases should be, in the opinion of the committee, made only so far as necessary to secure tonnage along the lines of railway. This ground has been taken by the present management, which will protect but not enlarge present investments.

8. The plan of working roads at fixed rentals will undoubtedly prove profitable to the company in an increasing ratio as population and traffic increase, and is the best where the prospects of the railroad are clear, but the plan of working leased roads at cost is advisable in many instances, as has been proved. Experience has shown that wherever possible all smaller companies should be absorbed to effect economy and simplicity in the accounts.

The committee is convinced that it is necessary to consolidate within the company itself the Financial management of the roads under its control, since these roads fall back as far as possible on the credit of the company. In addition to furnishing the capital to transact the business of the controlled roads, the sum of $180,000,000 must be provided for in the payment or renewal of bonds maturing withing 30 years.

The large amount of stocks and bonds owned should be used as far as possible in providing increased capital required, and as large an amount as possible should be released by consolidation with other roads, so that the company may not again be liable to the difficulties experienced during the fall of 1873.

The whole of the financial difficulties of the company are concentrated in one item, namely, floating debt of the Pennsylvania Railroad and companies controlled by it. When this is provided for there will be an end to any financial trouble connected with the company.

9. The committee report that all Directors should be elected by the stockholders, who should ratify all laws affecting their property and interests.

10. The committee attribute the existing distrust of railway stocks and securities to meagre and incomplete information in reports, to the fear that the property of the company may be improperly used for personal ends, the lack of intimate interest on the part of shareholders, and the constant tendency to expansion and extension. They advise that measures should be adopted to require the assent of stockholders to further extension.

11. The committee, basing their views on their report and on English practise, recommend that the Directors retain Executive functions only, that their number be reduced from 17 to 13, that they be nominated by a committee of shareholders as at the last meeting and be all elected by the shareholders direct, and that the report of the company be published at least two weeks before each annual meeting.

They suggest an organization of the Directors as follows: Three to be skilled railway men, one of financial experience and ability, and nine to be non-professional shareholders. One of the three professional railway men to be President, another in charge of the interests of the company west of Pittsburg. The whole four professional Directors to form an Executive Council, under the control of the whole Board, and to devote their time to the interests of the company at a liberal compensation.—*U. S. R. R. and Mining Reg.*

☞ The *Manitoban* says: "The terminus of the Pembina Railway has not yet been fixed. The Engineers now out to locate the Pembina Railroad expect to do it in less than two weeks. The grading of the Railway from Winnipeg to Pembina will require the labor of about 1,000 men."

☞ The new stockholders of the Kent and Queen Annie's (Md.) railroad have elected the following officers: President, Major B. T. Biggs, of Delaware; treasurer, secretary and superintendent, P. H. Irwin, of Westminster, Carroll county, Md. A new board of directors has also been elected.

☞ The reservoir for the use of the Phoenixville Iron Works, which will soon be completed, will have a capacity of 4,000,000 gallons. The company are also building furnaces for heating iron by gas. There are to be twenty of these furnaces, each costing about $20,000.

☞ The rails on the Nashua and Rochester road have been laid to West Windham, and Hudson, which is on the opposite side of the river from Nashua, will probably be reached in two weeks. It is expected that the road will be opened the first of November.

☞ The Littlestown (Penn.) Railroad has been purchased by the Hanover and York "Short Line" Railroad company, and that road therefore is now part and parcel of the Hanover and York railroad.

☞ The Cape Breton *Advocate* learns from a private letter that the extension Eastward of the railway from New Glasgow to Louisburg will be proceeded with in a short time.

☞ It is stated that work on the Baltimore and Towsontown narrow-gauge railroad will be resumed the first of October; the greater part of the grading has been done.

☞ Mr. Thomas H. Dodamead had been appointed general superintendent of transportation of the Chesapeake and Ohio Railroad Company He formerly held the same position.

☞ The use of the steam whistle, except where required by law, and in cases of special emergency, has been discontinued on the New London Northern Railroad.

RAILROAD EARNINGS—MONTHLY.

American Railroad Journal

Saturday, September 26, 1874.

Stock Exchange and Money Market.

The Money market has shown no really new feature during the week, the offerings of capital having been very liberal, with call loans generally quoted as before, at 2@3 per cent, and the best mercantile credits rated at 5@7 per cent per annum. The demand for accommodation, though more active, as well for speculative, as for legitimate business purposes, has not been equal to the absorption of the accumulated balances at this point, seeking prompt and remunerative employment. The City Banks have shown no important alterations in their averages, apart from the falling off in the deposit line, which has been over a million dollars. The Sub-Treasury more than offset a loss of currency, by a gain in specie. The City banks, last week, diminished their reserve of legal tender notes $521,100, and their deposit item $1,041,700, while enlarging their specie average $89,000. They report a decrease of $298,600 in the loans and discounts, and an increase of $32,900 in their circulation. The U. S. Sub Treasury in this city closed the week with a currency balance of $59,608,770, against $60,938,997 the preceding week; and a coin board of $55,117,510, against 53,482,111, on the previous return. The City bank exchanges, during the week, were $404,199,714, or a daily average of $67,366,619. The customs revenue of the port, during the week, was $2,364,126. The City banks reported their average of gold last week at $19,952,100, and their greenback average at $64,804,800. Their deposits stood at $236,840,800. The loan item was $280,569,200. The circulation was $25,638,600.

The aggregate of the outstanding U. S. currency, of all denominations, Sept. 1, was $428,422,258. The outstanding amount of legal tender notes is 382 millions. The National bank circulation is 350,383,606.

The income of the Government, from internal revenues, thus far, in the fiscal year, commencing with July 1, 1874, has been over 24¾ millions.

The Treasury balances at the opening of business on Wednesday were as follows: currency, $14,665,947; special deposit of legal tenders for the redemption of certificates of deposit, $60,445,000; coin, $73,867,236, including $28,651,340 in coin certificates.

Gold has been less active within the previous range. There has been less inquiry from speculative sources; and the export movement has been lighter. The customs call has been fair. The extremes of the week have been 109⅜@109⅞, closing at 109⅝, as against 109¾ on Wednesday of the preceding week. The specie outflow last week, was only $400,184. The imports of specie at this port since Jan. 1, have been $4,052,486, against $2,959,807 same time last year. The customs demand for Gold last week averaged $406,666 a day. Foreign Exchange has been in moderate request, with Bankers' sixty day bills on London closing on Wednesday at $4 83¾@$4 84½; sight bills on London at @4 86¼@$4 87 to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $4,354 724.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $6,669,952.

There has been a somewhat restricted business reported in Government Securities since our last, with prices quoted a shade lower in most instances, though the offerings of bonds have been comparatively limited.

U. S sixes of 1881 closed on Wednesday of this week at 117⅝@118⅜; U. S. Five-Twenties of 1862, 112¾@113; U. S. Five-Twenties of 1864 at 114⅞@115¼; U. S. Five-Twenties of 1865, 115⅝@116; U. S. Five-Twenties of 1865 consolidated, 115⅜@115⅝; U. S. Five-Twenties of 1867, 116¾@117; U. S. Five-Twenties of 1868, 116¾@117; U. S. Ten-forties at 111⅜@111½; U. S. Fives of 1881, (Funding Loan) 111⅝@112; Six per cent. currency Sixes from 117@117¼.

The dealings in State and Railway bonds have been more extensive and prices have been quoted generally stronger. Railway and miscellaneous share property has been in more confident demand, especially toward the close, at firm and buoyant prices.

A fairly active business has been reported in the leading kinds of Domestic produce, but at variable prices. Flour, Wheat, Oats, Cotton,

Pork, Lard, and Petroleum closed lower. Corn, Butter, Cheese, Naval Stores, Wool, Tobacco, Fish, and Tallow, firmer. The Metal trade has shown steadiness as to values, on, however, very moderate dealings. Eglinton Pig Iron quoted at $35; Glengarnock, $37@$38; No. 1 American Pig at $30@$31, No. 2 do. at $27@$29; Forge, $25@$27; English Rails at $50, gold; American Rails at works, $55@$60; Old Rails, $34@$38. Wrought Scrap, $33@$37. Hardware has been in less request and unsettled in price. Dry Goods have been moderately active, but quoted weaker as to values. Boots and Shoes have been in brisk request and held more confidently. Hides have been rather more sought after, and Leather has been in fair demand, at about previous quotations. Groceries have been attracting more attention, and have been quoted firmer. A livelier business has been reported in ocean freights, but without leading to improvement as to rates.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Atlantic and Pacific R. R. pref., 14¼; Pacific R. R. of Mo., 39¼; do. 1st mort., 78½; New Jersey Southern R. R., 3; St. Louis, Kansas City and Northern pref., 21; Warren R. ☞ It is stated that the New York Central Railroad Company intends abandoning the present line of the Niagara branch through Rochester. The plan is to run all but Charlotte trains over the main or Buffalo line to the Field Tavern, or in that vicinity, and to connect with the Falls road from that point. A new route through Rochester has been decided on for the Charlotte road.

☞ The Hempstead branch of the South Side Railroad, commonly known as the Hempstead and Rockaway Railroad, which is distinct from the main line of the South Side Railroad just purchased by the Messrs. Poppenhusen, is advertised to be sold on Wednesday October 28, at Hewlett's Hotel, in Hempstead, to satisfy a judgmant order, the Brooklyn Trust Company being the plaintiff.

☞ We are afforded another illustration of the fact that railroads are fast superseding canals, in the abandonment of that portion of the West Branch and Susquehanna Canal, above Lock Haven, and of that portion of the Juniata Canal, above Petersburg, both of which branches were closed to boatmen on and after the 1st of September.

☞ At the regular meeting of the Board of Directors of the Columbus and Hocking Valley Railroad Company, held in Columbus, Ohio, on the 9th inst., H. C. Noble, Esq., was elected a director vice Hon. Wm. Dennison, resigned. The resignation of J. W. Doherty as Superintendent was accepted, and the duties of his office placed in the hands of M. M. Greene, Vice President.

☞ The Los Angeles *Express* says that articles of incorporation of a new railroad to tide water from that city including a wharf at the terminus reaching to ship water, have been signed by the foremost of its citizens.

☞ A letter to the Baltimore *Sun*, dated Frederick, Md., Sept. 18, says: "It is currently stated that the Pennsylvania Railroad Company have secured control of a line of railroad now in process of completion from York, Pennsylvania, to Hanover, and have negotiated with the Hanover and Littlestown Railroad Company, and are about to conclude an arrangement with the Frederick and Pennsylvania Line Railroad Co., which will secure them a continuous line from York to Frederick, and give them a through connection from Frederick to Philadelphia and New York. In all probability this movement will lead to the extension at no distant day of the Frederick and Pennsylvania Line Railroad to Washington city, giving an important competing trunk line from the national metropolis to New York city. This line traverses one of the most beautiful and fertile regions of the country east of the Alleganies."

☞ The Boston *Journal* says that an important railroad conference was held in Lawrence on the 16th inst., between representatives of the Boston and Lowell and Eastern Railroad Companies. The former is now building a connection with Lawrence, and the latter has a line located from North Andover to Lawrence, and the location of a union depot was considered. But the more important project under discussion arises from the design of the Boston and Lowell to form a new line to Portland. Building under a charter recently granted, from Lawrence, through Methuen, to Hampstead, N. H., the Lowell Railroad Company claim they then have, by using roads now running to Portland, a continuous line from Boston to Portland, which, it is claimed by them, is shorter than the Boston and Maine by fourteen miles.

☞ The new owners of the South Side Railroad of Long Island are now in control of the road. It is understood that as soon as the arrangements can be made the passenger trains will be run to Hunter's Point, instead of to the foot of South Eighth street Williamsburg. New rails will be laid nearly the whole length of the road, and a considerable amount of grading will be done to make the road first class in every respect. It is proposed to run a heavier and better class of passenger cars. In this connection, there is a rumor that the Flushing and North Side and the Central combination have also purchased the Long Island Railroad, of which Oliver Charlick is President, at private sale.

☞ The earnings of the Philadelphia and Erie Railroad for the month of August, 1874, were $349,518, the expenses $280,185, and the net earnings $119,383. In August, 1873, the earnings were $334,586, the expenses $318,453, and the net earnings $16,132—showing an increase in earnings of $14,932, with a decrease in expenses of $88,818, making an increase in net earnings of $103,250. For the eight months ending August 31, 1874, the net earnings have been $548,040, against $428,756 for the corresponding period of 1873—an increase of $119,283.

☞ Mr. W. W. Scranton has been appointed general manager of the Delaware, Lackawanna and Western Iron Company, to fill the position formerly held for twenty years by his father the late Mr. Joseph W. Scranton.

☞ There is a report that the Delaware and Lackawanna Coal Company is negotiating for the purchase of the New York and Hempstead Railroad, and, if bought will complete it at once to Bay Ridge and build suitable docks there. Coal cars can then be ferried on barges across the bay, landed at Bay Ridge, and go from there to any point on Long Island which is reached by rail road. The completed portion of the road, from Valley Stream on the South Side road, to Hempstead, fifteen and one half miles, is to be sold under foreclosure of mortgage, in Hempstead, N. Y., October 28. The sale includes the franchises and charter of the company.

☞ At a meeting of the directors of the Illinois Central R. R. Co., recently held in this city, to choose officers for the ensuing year, Mr. Wilson G. Hunt was chosen President, Mr. W. K. Ackerman, Treasurer; Mr. L. V. F. Randolph, Assistant Treasurer, and Mr. L. A. Catlin, Secretary. Mr. W. H. Osborn was chosen chairman of the Board of Directors, and Mr. James C. Clarke was appointed general manager, to reside at Chicago. The duties which have been performed at Chicago by the late President, Mr. John Newell, were by resolution imposed on Mr. John M. Douglas, formerly president of the company and for many years its leading legal counsel.

☞ Messrs. McGrann & Fitzpatrick, of Lancaster, Penn., have been awarded the contract for the grading and masonry of the Delaware River Branch of the North Pennsylvania Railroad, from Jenkintown to Yardleyville. This is a portion of the new line from Philadelphia to New York, and together with the Delaware River and Bound Brook Railroad, forms a line about fifty miles in length. Work will be commenced on the above section immediately, and will afford employment to a great many laborers during the coming winter. The contractors above named have recently completed the East Broad Top Railroad.

☞ The gross earnings of the Pittsburg, Fort Wayne and Chicago Railway for the six months ending June 30, 1874, were $4,474,158, the expenses $2,684,826, and the net earnings $1,789,332; for the six months ending June 30, 1873, the earnings were $5,084,140, the expenses $3,116,137, and the net earnings $1,968,002, showing a decrease in earnings of $609,982, in expenses of $431,311, and in net earnings of $178,670.

☞ The organization of the Massillon and Coshocton Railway Company has been completed, the following officers being chosen: R. B. Dennis, President; F. C. Goff, Treasurer; W. L. Holden, Secretary, all of Cleveland. Of the $30,000 of capital stock already taken, $26,000 was represented and voted upon at the meeting for the election of Directors.

☞ The Northern Colonization Railway is being rapidly pushed forward; it is mostly graded, in some parts quite ready for the rails, and will be, it is stated, in running order by this time next year over two-thirds if not the whole of its length. One of the large bridges over the fork of the Ottawa has its piers half up.

☞ The Coast Railway Company, to build a narrow gauge railroad from Los Angeles to the coast, has been organized in Los Angeles.

Chesapeake and Ohio Railroad.

Messrs. Fisk & Hatch, financial agents of the Chesapeake and Ohio Railroad company have issued a supplement to their circular of August 1, 1874, in regard to the affairs of that company. It is replete with information, and holders of the securities of the company will do well to send for a copy of it. From the concluding paragraphs of the pamphlet we take the following:

"We earnestly invite the co-operation of all bondholders and creditors in re-establishing the credit of the company. It can be done, the former market value of the bonds can be restored, and every dollar saved to the creditors. To this result we are giving our time and our best energies, and we trust that all who have not yet acted in the matter will give us a helping hand by an immediate and favorable decision.

"The holders of about $10,000,000, of the first mortgage bonds have already funded, or agreed to fund, their coupons; nearly all of the second mortgage have accepted the proposition; and over three quarters in amount of the creditors."

In this supplemental circular Messrs. Fisk & Hatch state that the length of the Chesapeake and Ohio Railroad, including main line and sidings, is 465 miles. Since January the earnings of the road from passengers has been $297,874,98, and from freight $700,703 97.

The Advertisement of Messrs. Fisk & Hatch will be found on another page of this week's issue.

☞ A letter from Tuscon, Arizona, dated September 5th, says: "Mr. J. C. Truman, of New York, arrived here this morning from Guaymas. Mr. Truman and D. B. Blair, of San Francisco (who is to arrive next week), are engaged in a preliminary survey for a railroad from Guaymas, Mexico, to some point on the Texas and Pacific Railroad in Arizona. This morning he said he was unable to give any definite information as yet concerning the proposed road. He is the agent of Eastern capitalists who will build the road provided the Mexican Government grants the desired permission."

☞ The earnings of the Cleveland and Pittsburg Railroad for the six months ending June 30 1874, were $1,460,837, the expenses $710,755, and the net earnings $749,631; for the six months ending June 30, 1873, the earnings were $1,790,470, the expenses $951,833, and the net earnings $838,637, showing a decrease in earnings of $330,083, in expenses of $241,077, and in net earnings of $89,006.

☞ Jesse R. Shaughan has been appointed chief engineer on the Wheeling and Lake Erie Railroad. Measures have been taken for the early completion of this road from Gilead Junction to Toledo, and from New Lexington to the Newark Junction—the line from New Lexington southward being in rapid process of construction.

☞ D. W. C. Brown has been appointed General Manager of the Cincinnati, Sandusky and Cleveland Railroad, in the place of G. T. Benedict deceased.

☞ The Bombay Hook Railroad has been sold to the American Dredging Co., of Philadelphia, for the sum of $54,300. The sale was made by the Sheriff of Kent county.

☞ The directors of the Nevada County Narrow Gauge Railroad Company have decided to proceed with the construction of the road.

Pacific Mail Steamship Company.

The committee appointed to examine into the affairs of the Pacific Mail Steamship Company have made the following report:

OFFICE OF THE PACIFIC MAIL STEAMSHIP CO., NEW YORK, Sept. 18, 1874.

To Russell Sage, Esq., President, and the Directors of the Company:

GENTLEMEN: After a thorough examination of the books of the company, we find the result, as per statement annexed, of cash assets and liabilities, now presented to you.

ASSETS SEPT. 17, 1874.

Cash in bank		$256,146 61
Loaned on call		100,000 00
At J. S. Morgan & Co.'s, London, £12,892 11s. 6d.		70,908 00
Insurance on City of Guatemala, which we have been notified will be paid to our London bankers when French Consul's certificate, now on the way, is received, 1,000,000 francs		220,000 00
Subsidy due Oct. 1 from United States Government		125,000 00
Six thousand shares Pacific Mail, at 48		288,000 00
Total		$1,060,054 61

LIABILITIES.

Due John Roach & Son on City of Tokio on application of steam, say Sept. 25—Oct. 1	$150,000 00	
After successful trial trip, showing 14½ knots per hour	150,000 00	
Loan from Panama Railroad Company, due Aug. 29, 1875	500,000 00	
Bills payable—		
Sept. 1874	$17,835 03	
Oct. 1874	60,632 34	
Nov. 1874	53,899 06	
Dec. 1874	59,518 52	
Jan. 1875	12,430 76	
Feb. 1875	16,497 66	
	220,313 37	
Due in London, Feb. 15, 1875, on charter of British steamer Mikado, £7,374 3s. 3d. sterling	36,871 56	
		1,057,184 93
Surplus of assets		$2,869 68

—which could be realized by Oct. 1, 1874, over total liabilities of every kind.

Additional Assets.

Due the company by Central American States up to June 1, 1874, for mail service	$70,000 00
Due from Mexican government for mail service up to October 1, 1874	65,000 00
Due from United States government, Alabama claims	20,600 00
	$155,600 00
Due from Union Pacific R. R. Co. in dispute	$225,000 00
(25 per cent of this sum is due to the Panama Railroad when collected.)	
Due from insurance companies on steamship Guatemala, in litigation. (Lost on Central American coast in 1872.)	40,000 00

Contingent Liability.

The city claims from the company for taxes, now in litigation | 43,000 00

The steamship City of Peking is entirely paid for, and no other amount is due on the City of Tokio except the $300,000 stated in the list of liabilities.

$75,000 cash has been paid to John Roach & Son on three new iron propellers now being built, of about 3,700 tons each, to cost $600,000 apiece, to be finished in one year and to be paid for in twenty-four monthly payments of $75,000 each.

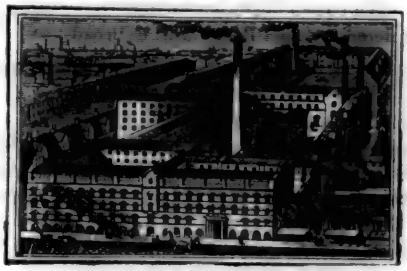
The committee further explicity state that there is no other obligation in the shape of loans, or any other indebtedness, except what arises in the regular course of the business of the Pacific Mail Steamship Company, as shown by their books.

The amount of freight uncollected on cargoes now afloat is, we believe, more than sufficient to pay all unaudited accounts and debts of all agencies of the company.

FREDK. L. TALCOTT,
F. ALEXANDER,
WM. H. GUION,
} Auditing Committee.

By order of the Board.

☞ Baltimore City subscribed $1,000,000 to the Virginia Valley Railroad. Of this $950,000 has been paid, and the balance, $50,000, will be paid on the 1st of October next.



☞ The earnings of the Burlington, Cedar Rapids and Minnesota railroad in August 1874, were $114,316 74, against $108,100 13 in August, 1873, an increase of $6,216 61.

☞ A company has been organized at Portland, Oregon, to construct a railroad from Winnemucca to Columbia river, at the middle fork of the Williamette. Capital stock $7,500,000.

☞ Mr. Samuel Gill has been appointed Receiver of the Louisville, Cincinnati and Lexington Short Line Railroad.

☞ Over three-quarters of the entire length of the Boston and Albany railroad has been relaid with steel rails.

☞ The new street railroad which has been projected in San Francisco is to be built on the elevated single rail plan.

Manufactory of the Spencerian Pens, Birmingham, England.

SWAN QUILL Action!

SPENCERIAN

STEEL PENS.

These Pens are comprised in 15 numbers; of the NUMBER ONE PEN alone we sold more than

5,000,000

in 1873.

and the sale is continually increasing.

They are of superior English make, and are justly celebrated for their elasticity, durability, and evenness of point. *For sale by the trade generally.*

☞ *To accommodate those who may wish to try these Pens, we will send a Sample Card, containing all of the 15 numbers by mail on receipt of 25 cents.*

IVISON, BLAKEMAN, TAYLOR & CO.,

138 & 140 Grand Street, N. Y.

FOR SALE.

A SECOND HAND LOCOMOTIVE, IN NO. 1 working order, about 22 tons weight. Cylinder 13½ by 22 inches. Four driving wheels and trucks. Diameter of drivers 5 ft. 6 in. Boiler in good order, with 96 copper flues. For further information apply to

GEO. G. LOBDELL, Pres't.
WM. W. LOBDELL, Sec.
P. N. BRENNAN, Treas.

Lobdell Car Wheel Co.,
Wilmington, Del.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

97,112 miles of Railroad in the United States use annually over twenty-six million Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company

NEW-JERSEY AND NEW-YORK RAILWAY COMPANY

Offer for sale through their Financial Agents,

Messrs. Knoblauch & Lichtenstein,

37 BROAD ST., NEW-YORK,

$500,000 OF THEIR

FIRST MORTGAGE 7 PER CENT. GOLD BONDS,

Coupon Bonds of $1,000 (£200) each,

Interest March 1 and Sept. 1,

PAYABLE IN NEW-YORK OR LONDON,

At the option of the Holder.

Principal due 1893, at 87 1-2 and accr. interest.

Particulars, Maps, and Pamphlets at above Agency.

☞ A new track is soon to be laid on the West Quincy branch by the Old Colony Railroad Co., for the accommodation of the Quincy Granite Company.

Foreign Commerce of the United States.

The statistics of foreign commerce of the whole United States for the month of June, 1874, and for the Government fiscal year then terminating, have just been issued by the Bureau of Statistics at Washington. The figures given are all in specie values. From this we learn that the imports for the month of June, 1874, amounted to $40,302,334, and for the year ending June 30, 1874, to $595,861,248, against $49,420,791 for the month, and $663,617,147 for the year 1873. The domestic exports for the month of June, 1874, were $52,250,109, and for the year $629,252,156; while in 1873 they were for the month $46,215,059, and for the year $576,938,985. The foreign exports amounted in June, 1874, to $1,959,926, and for the year ending June 30, 1874, to $28,780,338, against $3,149,101 for the month, and $28,149,511 for the year 1873.

Of the total imports and exports for the fiscal years 1874 and 1873, the following values consisted of specie and bullion and of merchandise, respectively:

1874.	Imports.	Domestic exports (specie values.)	Foreign exports.
Specie and bullion..	$28,454,906	$59,699,686	$6,930,719
Mdse.....	567,406,342	*569,552,470	16,849,619
1873.			
Specie and bullion..	21,480,937	73,905,546	10,703,028
Mdse.....	642,136,210	505,033,439	17,446,488

* The returns of exports to Canada will, when corrected, increase the aggregate several millions of dollars.

An analysis of the above table shows a decrease in the imports of merchandise in 1874 of $74,729,868, an increase in domestic exports of $64,519,031, and a decrease in foreign exports of $596,864. The movement of specie and bullion shows an increase in 1874, of $6,073,969, a decrease in domestic exports of $14,205,860, and in foreign exports of $3,772,309.

The value of foreign commodities remaining in warehouse June 30, 1874, was $59,705,758, against $77,583,978, June 30, 1873, being a decrease of $17,878,225.

Allowing for the differences in the warehouse account, the exports for the fiscal year 1874 exceed the imports by $39,293,021, while for 1873 there is an excess of imports over exports of $101,155,939.

Chesapeake and Ohio Railroad Company.

The Bondholders and Creditors are responding to our circulars of Aug. 1st and Sept. 10th so generally and promptly as to afford reasonable and gratifying assurance that the adjustment of the affairs of the Company will now be rapidly completed.

Coupons on over two millions bonds have been funded the past week. If the remaining Bondholders will act with like promptness, the protection of their interests will soon be fully assured.

Bondholders can leave their coupons with us and we will attend to the details of funding them without charge.

FISK & HATCH,

No. 5 Nassau St.

Bucksport and Bangor Railroad.

The coupons on the first mortgage bonds of this road, due October 1, will be paid at the Hanover National Bank, in this city. The Bucksport and Bangor Railroad is the only connecting link between the ocean where ships of any size may load and proceed to sea in winter, and the European and North American Railway at Bangor, which latter port is closed by ice four or five months, while Bucksport is open at all seasons. The Bucksport road is just about finished, and will be in running order in November next, thus affording a new outlet to the products of the Penobscot valley, and a connection at Bangor with the Maine Central Railroad for Portland and Boston, the European and North American Railroad for St. John and Halifax, and the Piscataquis Railway to the Katahdin Iron Works and the slate quarries at Brownville.

Pennsylvania Railroad.

We gave last week, from the *U. S. R. R. and Mining Register*, a carefully condensed full statement of all the facts involved in the Report of the Investigating Committee; and we now publish from the Report a description of the Eastern Group of Railroads and canals controlled by the Company. The Committee says:

We now come to the consideration of the lines of railway and canal under your control and owned by you east of Pittsburg and Erie. This may be called the Eastern or Pennsylvania system, and consists of seven divisions, viz:

	Miles.
1. The Allegheny Valley Railroad Division	446
2. The Philadelphia and Erie Railroad Division	288
3. The Northern Central Railway Division	309
4. The Pennsylvania Canal Company Division	347
5. The United Railroads of New Jersey Division	344
6. The Delaware and Raritan Canal Division	61
7. The Pennsylvania Railroad Division	1,021
Total miles railway	2,408
Total miles canal	408

As perhaps properly connected with this system, we name—

8. The Pittsburg, Virginia and Charleston Railroad. This road is to extend from South Pittsburg up the Monongahela Valley to Charleston. It is built and was opened in 1873 to Monongahela City, a distance of thirty miles. The object of this line, in addition to developing the local trade of the valley, is to draw its trade and travel to Pittsburg, there meeting your several lines east and west, but more especially to open by means of a short branch from this road, a connection with your main line near Brinton's Station. This piece of road will be valuable, as it will afford the means of passing through freight between your main line and the Pittsburg, Cincinnati and St. Louis road, without going through the city of Pittsburg proper.

9. The Columbia and Port Deposit Railroad, a branch about forty miles long, between Columbia and Port Deposit, partially graded, and when finished it will make a connection with the Philadelphia, Wilmington and Baltimore Railroad at Perryville, and thus open new markets for the distribution of the coal of the Susquehanna Valley.

1. THE ALLEGHENY VALLEY RAILROAD DIVISION.

	Miles.
This division consists of the Allegheny Valley Railroad proper, extending from Pittsburg to Oil City	132
The Low Grade Extension	110
Other branches	87
	147
The Oil Creek and Allegheny River Railroad	123
The Buffalo, Corry and Pittsburg Railroad	44
Total	446

This road passes through one of the most valuable freight producing valleys in the State, abounding in coal, iron, oil, timber, and other products; its branches connect with the Philadelphia and Erie, Atlantic and Great Western, and Lake Shore railroads on the north, the Philadelphia and Erie on the east, by means of the "Low Grade Line," and the Pennsylvania Railroad on the south. Thus located, commanding such immense tonnage, prudent management should have made it profitable to its owners. The history of its recent financial troubles we need not repeat, but congratulate all parties interested in the prospect of their being removed. It will take years of patient labor and continued confidence in the ultimate result by its stockholders before the effect of the errors of judgment committed can be overcome, and their stock be again worth what it has been.

These lines have advantages which in time will largely increase their traffic, and may make some of the branches profitable, but which for a time will entail an annual expense.

It is thought by some of your officers that this road will be able to pay the interest as it becomes due, on the bonds of the "Low Grade Line." These bonds are endorsed, interest and principal, by the Pennsylvania Railroad Company, and are there for a good security to the holders.

2. THE PHILADELPHIA AND ERIE RAILROAD DIVISION.

So fully have your directors reported as to the condition and prospects of this road, that little more is left for us to add. The unfortunate location of the road between Driftwood and Warren—with its two summits of two thousand and six feet and one thousand six hundred and eight-two feet to overcome, and lying north of the line of abundant coal and heavy timber, causes it to traverse a country moderately timbered, and which, when cut off, leaves an unproductive slate soil. The result will be that, in a few years, the local trade and travel will have a tendency to decrease rather than to increase.

The competition of other roads along most of its line prevents its receiving fair rates for its competition with water and rail lines to the east local business, while its through business has close and west. The fears of many early interested in this line seem to be realized, that so long a line of rail cannot successfully compete with the water and rail lines to New York. Much more has been expected from the completion of the "Low Grade Line" than seems warranted. Let us look at it: The trade coming to or going from your line over that road would use one hundred and twenty miles of the track of the Philadelphia and Erie Railroad.

The leading reasons for building the "Low Grade Line" we understand to be—

1. A strategic movement to control the valley of the Bennett's Branch at the lowest summit of the mountains between the east and the west in Pennsylvania.

2. The making a good connection with the oil regions for transportation of oil eastward.

3. The development of the minerals on its line and the manufacture of its timber into lumber.

4. The carrying fourth class freight at slow speed, at very low rates, from west to east.

The first three points are tenable, though it is questionable whether the strategic advantages are worth the cost, or whether the oil cannot be carried by way of the Western Pennsylvania Railroad and your main line at really as low rates and much quicker than by the "Low Grade Road." There certainly is not enough to be gained, by whatever advantage the "Low Grade Line" might have in this respect, to warrant its being built at a cost of near $12,900,000, or over $117,000 per mile.

As to the fourth argument, we think it defective for three reasons—

1. The Pennsylvania Railroad Company would lose by sending freight from Pittsburg east by that line. If its main line should be overloaded, it would be wiser to enlarge its capacity than to turn away the business on to another road.

2. The question whether freight shippers would regard the small saving in charges as an equivalent to loss in time. The saving in time for one hundred and ten miles would not be much, and when it reaches the Philadelphia and Erie road slow speed could only be used on about seventy miles of that road; so that the whole distance on which slow speed could be used would be one hundred and eighty miles, which could not make a difference of over ten hours in time, which is not worth much reduction in rates.

3. The working a line at slow speed practically limits the capacity of the line, and involves large additional expenditure of motive power and cars.

We cannot, therefore, look forward to any large increase of traffic from this source; and should there be a large tonnage on the principle of low rates and slow speed, it would probably be years before it is realized, and when it does come will be of little pecuniary gain to that road.

The most we can hope from the Philadelphia and Erie Railroad is, that it will earn enough to pay the interest on its funded debt and the Pennsylvania Railroad Company for the interest on its equipment.

According to the report of your Directors of March 14, 1873, the Philadelphia and Erie Railroad, with a single track, represents a cost per mile of $75,744, while the Pennsylvania Railroad, with two tracks, represents but $71,999 per mile; and that since 1869, while the increase in gross receipts has been but 17 7-10 per cent, the increase in bonded debt and preferred stock has been 39 6 10 per cent. These two facts furnish little ground for hope in the future that more will ever be realized than enough to satisfy the claims of the Pennsylvania Railroad Company for working the road and for advances already made to cover the deficiency of net receipts.

3. THE NORTHERN CENTRAL RAILWAY.

	Miles.
Main line from Baltimore to Sunbury	138
Shamokin Valley and Pottsville Railroad	28
Elmira and Williamsport Railroad, held by lease	78
Chemung Railroad*	18
Elmira, Jefferson and Canandaigua Railroad*	47
Total	309

* These roads are held by the Northern Central Railway Company, owning four thousand seven hundred and six of the five thousand shares of the Chemung Railroad, and fourteen thousand and twenty-two shares of the fifteen thousand two hundred shares of the Elmira, Jefferson and Canandaigua Railroad.

The importance of this line of road will be appreciated when you trace its connections. At Baltimore it connects with the Baltimore and Potomac Railroad to Washington and the South, passes north through a beautiful and rich country to Harrisburg, where it reaches your main line and makes connection with the Cumberland Valley Railroad and the system of railroads under control of the Reading Railroad Company, and thence to Sunbury, having also valuable branches by rail to the Lykens Valley coal mines, the Trevorton mines, and by the Shamokin Valley Railroad to the fine coals of that valley, and to a large body of coal land owned by that company near Shamokin.

At Williamsport it takes control of the Elmira and Williamsport Railroad to Elmira, and thence, by the Elmira and Canandaigua Railroad, secures a market in the centre of the State of New York and in the cities of Rochester and Buffalo for anthracite coal, and also makes valuable connections with the New York and Erie and New York Central Railroad lines.

The natural division of this line would be to work the road from Harrisburg to Baltimore as a branch to your main line, and to place the Shamokin Valley Railroad, with the line to Buffalo (through Elmira), under the Philadelphia and Erie Railroad management. It is to be regretted that this course was not adopted as soon as you acquired the lease of the Philadelphia and Erie Railroad. The many economic advantages of this plan are apparent, and it is to a limited extent so managed at this time.

The Northen Central Railway is not only a valuable feeder to and distributor of products taken from your road to local points on either road and to the West, but it has a large local trade, and is one of the great coal avenues from the mines to the Atlantic coast.

The growing local trade of this line between Buffalo and Baltimore, with the through trade thrown on it by your road, requires largely increased facilities at its terminus in Baltimore—that city having built the Union Railroad to connect the Northern Central Railway with the bay, making a complete line to tidewater. These facilities are required to handle cheaply the coal, lumber, grain, live stock, oil, &c., that comes over that line. The financial inability of the Northern

Central Railway Company to complete its terminal improvements and stock its road, causes it, naturally, to look for aid to its main stockholder, who is so largely interested, not only as a stockholder, but also as a gainer by these improvements in the traffic it will bring to its main line.

The advantages arising from the natural affiliances and economic workings of the mixed lines of the Northern Central Railway above suggested—the absolute value of these lines to your main line—and the financial inability of the Northern Central Company to develop and take care of its growing trade—plainly indicate that a just lease of that road or other satisfactory arrangement would be advantageous to the interests of stockholders in both companies.

4. THE PENNSYLVANIA CANAL DIVISION.

The ownership and control of the canal property in Pennsylvania fell to your company in the purchase of the public works throughout the State. The unjust discrimination made by the State of Pennsylvania in the tonnage tax, rendered it necessary for the company to pave the way to its abrogation, as well as to secure the railroad from Philadelphia to Columbia by purchase. This took place in 1857, and consisted of the railroad from Philadelphia to Columbia, and the canals extending thence by the Juniata to Pittsburg, with the Portage Railroad and other appurtenances. The price paid was $7,500,000, of which $1,000 000 was apportioned upon the company's books as the value of the canals purchased. The Portage road and the Pittsburg Division of the canal were abandoned. The portion of the canal line extends from Columbia to Hollidaysburg, about one hundred and seventy-three miles.

In 1867 this canal interest was organized as an independent corporation, with the corporate title of the Pennsylvania Canal Company, with a capital stock of $2,750,000, which represented the $1,000,000 originally paid the State, with the interest thereon and expenditures for enlargement of the canal after it came into the possession of your company. In 1867 the majority of the stock of the West Branch and Susquehanna Canal, extending from Clark's Ferry to Farrandsville, on the West Branch, a distance of one hundred and twenty-three miles, was purchased with the bonds of the Pennsylvania Canal Company, and afterwards, as its indebtedness matured or approached maturity, it was taken up in exchange for canal bonds having forty years to run. This enabled your company to reach the lumber regions on the West Branch; and in order to have access to the anthracite coal fields, the Pennsylvania Canal Company, in 1869, merged with the Wyoming Valley Canal, by the exchange of an equal number of shares of its stock—exchanging its forty year bonds at par for the mortgage bonds of the Wyoming Company, then maturing, amounting to $600,000. In 1872, for the purpose of giving direct access by water to the Lykens Valley coal fields, there was purchased most of the stock and all of the indebtedness of the Wiconisco Canal, extending from Clark's Ferry to Millersburg, for one thousand nine hundred and eighty-two shares of Pennsylvania Canal stock. Afterwards the West Branch and Wiconisco Canals were sold under judgment and purchased by the Pennsylvania Canal Company, which thus became the absolute owner of all these several canals, embracing altogether about three hundred and sixty miles. These canals having become much deteriorated, and their capacity reduced, while great improvements had taken place in the rail lines, it was decided to enlarge and improve the main line, extending from Columbia to Wilkesbarre, and procure a stock of boats, in order to insure regular transportation. This policy having been determined upon, the whole earnings of the canal, in excess of the ordinary expenditures and interest, were applied to the purpose, down to the end of 1873, when a stock of one hundred and eighty-four boats had been acquired and the enlargement of the main line completed. This enlargement consisted in widening and deepening the canal, doubling the length of the locks, and renewing all important structures on the line—using durable materials, and making them of a permanent character. The capacity of the lockage was increased from eighty to two hundred and sixty gross tons; the cost of shipment from Wilkesbarre to Havre de Grace was reduced from two dollars and twenty five cents to one dollar per gross ton, and from eleven and twenty-five one hundredths mills to five mills per gross ton per mile. Without this improvement it is now evident that the canals would have been abandoned of sustained serious and constant losses. The history of water navigation has established one fact beyond dispute, that to compete with the present low rates of freight on railroads, boats should be constructed to carry not less than two hundred and fifty tons gross. The nearer this minimum tonnage is attained or exceeded, the more certainty is there of a return. In enlarging the main lines of canals the tonnage has been increased to about two hundred and sixty to two hundred and eighty tons. It is to be regretted that the minimum capacity was not made three hundred tons. The whole expenditure on eplargement account, on the 31st December, was $1,983,499—about $13,223 per mile—which compares favorably with the expenditures of other canals for like purposes. It is claimed by the officers of the canal that the whole cost of these improvements was earned from the line during the progress of the work.

From sources of information at its disposal, your committee is led to believe that the earnings of the canals will pay the working expenses, the interest on the funded debt, and lay by a sufficient sum to meet the principal at maturity.

These canals in other hands, at the present reduced prices of transportation, might have been used to the disadvantage of your company.

Nothing has been done towards the enlargement of the Juniata division, which extends to the bituminous regions; that being postponed until the results of the present work are fully ascertained.

5. UNITED RAILROADS OF NEW JERSEY.

These lines, so lately brought under your charge, will prove this year the wisdom of the lease. The causes of the losses in working them in 1871, 1872 and 1873 have been clearly stated in the reports of the Directors: 1874 will demonstrate their ability to pay all charges, and probably yield hereafter a surplus, which, in time, will largely provide for necessary enlargements, additions, or betterments.

THE UNITED RAILROADS OF NEW JERSEY DIVISION.

These lines embrace the following railroads:

	Miles.
Mantua to New York	89
Camden to South Amboy	61
Princeton Branch	3
Rocky Hill and Kingston Railroad	6
Millstone and New Brunswick Railroad	7
Perth Amboy and Woodbridge Railroad	7
Monmouth Junction to Jamesburg	6
Pemberton and Higbstown Railroad	25
Camden and Burlington County Railroad	25
Columbus, Kinkora and Springfield Railroad	14
Burlington and Mount Holly Railroad	7
Medford Branch	7
Vincentown Branch	3
Mercer and Somerset Railroad*	5
Frankford and Holmesburg Railroad	5
Bordentown to Trenton	6
	276

*Seventeen miles additional have been opened in 1874.

BELVIDERE DIVISION.

	Miles.
Belvidere Delaware Railroad	68
Flemington Branch	12
	80
	356

The importance of the control of the United Railroads of New Jersey with the Belvidere Division and the Raritan Canal will not now be questioned, for it secured—

1. A continuous line of railroad between the city of New York and the West under one control.

2. The use of the unrivalled terminal advantages at the city of New York, Jersey City and South Amboy.

3. The key of the line of Southern travel to Baltimore and Washington.

4. The ability to place the products of the mine and the farm on tidewater, at the least expense, nearest to the centre of shipment and consumption.

5. The power to fix through rates.

6. The control of a line of railroads and canal that must continually increase in value and profit.

These points are of immense value to the Pennsylvania Railroad Company, and by this lease many serious impediments to your success were removed.

6. THE DELAWARE AND RARITAN CANAL

Is a very valuable and important water connection between Philadelphia and New York. The result of the management since it came into your hands has been very satisfactory, not in increased tonnage, but in net profits. An examination of the figures of the company presents the following facts: The aggregate tonnage of the canal was in 1871, 2,990,095. The aggregate tonnage of the canal was in 1872, 2,887,532. The aggregate tonnage of the canal was in 1873, 2,754,837.

The reduction of tonnage was due to throwing a considerable amount of freight from the canal upon the railroad, where it was supposed to return larger profits.

An abstract of the expenditures and receipts for the same period may be interesting, and is as follows:

	1871.	1872.	1873.
Receipts:			
Gross canal receipts	$1,045,957 31	$997,551 25	$1,071,102 74
Gross steam tonnage receipts	383,686 77	567,053 99	518 997 88
Total	$1,429,594 11	$1,524,605 24	$1,590,100 12
Deduct drawbacks refunded	148,857 27	109,448 80	70,108 75
Actual gross receipts	$1,280,736 84	$1,415,166 44	$1,519,991 37
Actual expenditures, each carried to the appropriate year, without regard to time of payment	889,381 97	874,527 28	813,212 71
Net profits	$391,354 87	$540,629 21	$706,778 66

It will be seen from the above figures that whilst the tonnage of 1873 was 82,695 less than in 1872, the net earnings were $166,149 85 greater; and that whilst the tonnage of 1871 was 135,258 greater than in 1873, the net earnings in 1873 over that year were $315,423 79.

The losses in operating all these lines since they came under your control have been—

In 1871 and 1872	$1,154,527 57
In 1873	685,689 70
Amounting to	$1,840,217 27

Though these losses have been charged to expense account, they will be repaid and reappear in the shape of profits. Yet the company is subjected to the cost of the use of the money during the intervening time.

The outlays for improvements on this line are, by the terms of the lease, to be met by an issue of shares in the United Companies in the proportion of thirty thousand shares of stock for $4,000,000 expended.

Louisville and Nashville Railroad.

The following is a condensed statement of the earnings of the Main Stem and Branches for the year ending June 30, 1873:

	Memphis Line.	Knoxville Branch.	Main Stem.
Passengers	$612,918 35	$92,599 82	$677,775 47
Freight...	1,011,341 65	210,653 27	1,882,781 82
Express...	48,547 35	10,593 26	81,906 38
Mail.....	52,218 47	5,494 95	32,655 03
Miscellan's	6,826 15	734 30	123,714 42

Total Main Stem	$2,798,833 12
" Memphis Line	1,731,851 97
" Knoxville Branch	319,985 60
" Bardstown Branch	22,927 67
" Richmond Branch	35,828 08

Total Main Stem and Branches, viz:

From passengers	$1,406,883 56	
" freight	3,135,797 91	
" express	142,598 66	
" mail	92,598 44	
" miscellaneous	131,607 87	
		$4,909,426 44

Expenses, viz:

" freight	16,678 21	
Total passengers	$1,251,523 44	
" freight	2,246,779 85	
		3,498,303 29

Net earnings:

Main Stem	$1,011,480 74	
Memphis Line	869,415 11	
Knoxville Branch	18,997 70	
Bardstown Branch	7,054 22	
Richmond Branch	4,175 88	
		$1,411,123 15
Add balance from previous year		1,778,412 78
Sundry credits during the year		14,010 00
Total		$3,198,545 93

From which deduct—

Interest account	$745,838 59	
Discount account	41,560 87	
Dividend No. 20	269,442 00	
Dividend No. 21	359,296 00	
Sundry charges	771 55	
		1,416,909 01
Balance to credit June 30, 1873		$1,781,636 92

The following is a comparative statement of the earnings of the Main Stem and Branches during the years—

	1871-'72.	1872 73.
Gross earnings	$3,200,068 09	$4,909,426 44
Operating expenses	1,986,874 68	3,498,303 29
Net earnings	$1,213,193 41	$1,411,123 15

This shows an increase in gross earnings of $1,709,368 35; with an increase in expenses of $1,511,428 61—making an increase in net earnings of $197,929 74. The president in his report says:

The Secretary's statement exhibits the cost of the property and the resources and liabilities of the company. A comparison with the corresponding tables in the report for the previous year will show an increase in the cost of the road from $14,198,238 50 to $22,946,838 79.

During the past year the contemplated consolidation with the Memphis and Ohio Railroad Company has been carried out, and the amount expended on account of this road has been charged to "cost of road."

The amount that in last year's statement stood charged to "Lebanon Branch Extension south of Lebanon" has also been placed in the account of "cost of road," and in addition there has been charged the amount expended on the Main Stem and Branches, Memphis, Clarksville and Louisville, and Memphis and Ohio Railroads during the past year for new rolling-stock and other improvements, making the total cost of the road and rolling stock to June 30, 1873, $22,946,838 79.

The company owns now the following roads:

	Miles.
Main Stem, Louisville to Nashville	185.00
Bardstown Branch	17.30
Lebanon Branch	110.32
Richmond Branch	33.46
Memphis Line, Memphis Junction to Memp.	259.67
Total	605.75

The cost is nearly $38,000 per mile of road. In this cost is not only included rolling stock for the use of the 606 miles of road, but a large additional amount that is used on the leased roads. The property and resources of the company—exclusive of road and rolling stock and fixtures, after deducting liabilities—amount to $2,637,237 16; or the total cost of all the property of the company

Has been	$25,583,575 95

Its stock and bond liabilities are

Stock	$8,981,439 03	
Bond	14,820,500 00	
		23,801,939 03
Amount to credit of profit and loss.		$1,781,636 92

The earnings of the whole road owned by this company, as above specified, have been

During the past year	$4,909,426 44
And operating expenditures	3,498,303 29
Net earnings	$1,411,123 15

The net earnings have been applied to the payment of the interest on the bonded and floating debt, and a seven per cent dividend to the stockholders, leaving a surplus of $8,224 14 to the credit of profit and loss account on account of last year's operations.

The bonded debt as per last report was—

Main Stem and Branches	$8,744,000
Memphis and Ohio Railroad Company	3,500,000
Memphis, Clarksville and Louisville Railroad Co., issued this year	2,425,000
Memphis and Ohio income bonds, assumed this year	164,500
Consolidated mortgage, issued this year	725,000
	$15,558,500
Redeemed Main Stem bonds. $658,000	
Memphis Branch	48,000
Paid to sinking fund in consolidated mortgage bonds.	37,000
	738,000
	$14,820,500
In this is included city of Louisville Bonds without mortgage	849,000
Total mortgage on all roads	$13,971,500

The total earnings of the whole road, including the Memphis Line, which comprises the road from Memphis Junction to Memphis (formerly reported separately under the heads of Memphis Branch Memphis, Clarksville and Louisville Railroad, and Memphis and Ohio Railroad), were $4,909,426 44, an increase as compared with last year of $255,646 45, or 4.85 per cent. The expenditures were $3,498 303 29, an increase over last year of $316,767 19, or 9.61 per cent. The net receipts were

During the previous year	$1,462,467 45
During the past year	1,411,128 15
Showing a reduction of 3.48 p. c...	$51,344 30

The increase of the earnings have been derived mostly from freight, and the increase in the expenditures is due to the extensive repairs performed on the road and rolling stock. A greater amount of money has been expended on this account than was required to compensate for the wear and tear for one year; the operating expenditures during the year can therefore be considerably reduced.

Owing to the constantly increasing business of the road, and the lease of the Nashville and Decatur Railroad, as well as to the opening of the South and North Alabama Railroad, it was necessary to make a very large outlay for rolling stock and other improvements to meet the requirements of the business. The total amount expended on this account is $2,176,978 95, of which $1,604,745 15 alone were expended for rolling stock. Thirty six new locomotives, eleven hundred and seventy three freight, twenty one passenger, and seven baggage cars have been placed on the road; real estate, costing $91,216 83, for depot purposes has been bought at Louisville; and additional shops have been erected, costing, including shop tools, $70,000. To place the Memphis, Clarksville and Louisville Railroad after the same was purchased by us in proper condition $154,000 had to be expended.

With the large sums thus expended, and the additional outlet secured by the South and North Alabama Railroad, the company is now prepared to do a greatly increased amount of business, and to do it promptly and satisfactorily both to the local and through shippers.

During the last year the company has continued to operate under lease the Glasgow Branch Railroad, 10.19 miles long, and on the first of July last took charge of the Nashville and Decatur Railroad, 122 miles long, under the contract previously made and published in the report of 1870-'71.

The total number of miles of road leased is	132.19
Add to this the length of road owned by the company	605.75
Total number of miles operated	737.94

GLASGOW BRANCH.

The gross earnings of this road were	$17,050 99
Operating expenses	12,943 09
Net earnings	$5,007 90

Which amount will be applied to the payment of the interest on the $40,000 in bonds held by this company,

NASHVILLE AND DECATUR RAILROAD.

The earnings of this road for twelve months were	$695,046 21
Operating expenses	585,887 72
Net earnings	$109,158 49

This road when it passed into the hands of this company required considerable repairs of track, the cost of which has been charged to operating expenses. But the improvements rendered necessary by the increased business, such as rolling stock, additions to side track, water stations, and others of a permanent nature, the benefit of which will be felt during the whole term of the lease, have been charged to construction account. The value of such improvements is to be ascertained at the end of the lease, and the compensation made for the same.

The advances made on account of this road during the past year are as follows:

Interest paid on bonds and other indebtedness	$210,955 49
Deduct net earnings	109,158 49
Total	$101,797 00
Construction of side tracks, new rolling stock, and other improvements	143,186 85
Total	$244,983 85
Indebtedness of the N. & D. R.R. paid, for which the company is to receive stock	286,348 59
Total outlay on account of this road	$531,282 44

During the first three months of the lease the South and North Alabama Railroad was not in operation, and the receipts of the Nashville and Decatur road were in consequence small. After the South and North Alabama Railroad was opened the receipts increased $244,287 08 over the corresponding nine months of the previous year.

During the busy season of the year we had not rolling stock sufficient to perform promptly the business that was offered to the road. Contracts made in the East for locomotives were not filled in the time agreed upon, on account of intervening strikes in the builders' shops. It was therefore not possible to operate the road satisfactorily to its patrons or to ourselves; but, the then existing difficulties having been removed, better results are to be confidently expected hereafter.

NORTH AND SOUTH ALABAMA RAILROAD.

This road was completed on the first of October last, under the contracts with the South and North Alabama Railroad Company and Sam. Tate and associates, as published in the annual report of 1870-71:

The amount expended on this road to October 1, 1872, including advances made since that time to the end of the fiscal year, is	$4,642,608 12
Under the contract the L. & N. R R. Co. has taken $2,000,000 of stock in the S. & N. A. R. R. Co., and has paid for the same	800,000 00
Leaving expended	$3,842,608 12

Toward the liquidation of this amount the company took, at ninety cents on the dollar, the first mortgage bonds of the South and North Alabama Railroad Company, bearing eight per cent interest, and indorsed by the state of Alabama.

During last winter the Legislature of Alabama passed a law under which the state assumes absolutely an indebtedness of $4,000 per mile of road of any railway company surrendering its bonds indorsed by the State.

The South and North Alabama Railroad Company has availed itself of this law, and the first mortgage bonds, except three hundred and ninety-four, which could not be obtained, have been canceled, and in lieu thereof has issued new mortgage bonds bearing six per cent gold interest. The Louisville and Nashville Railroad Company has purchased this new issue of bonds, and has returned the eight per cent bonds to the South and North Alabama Railroad Company. The new bonds, in accordance with the action of the stock holders in their special meeting of May 15, 1872, have been indorsed by this company.

The company have 180 locomotives, 52 passenger, 46 baggage, mail and express, 1,711 box, 20 caboose, 211 rack, 484 gondola, 440 platform, 30 boarding, 6 tool and 210 other cars.

Secretary.—WILLIS RANNEY.

Assistant Secretary.—A. M. QUARRIER.

Vice Pres't & Gen'l Sup't.—ALBERT FINK.

Delaware Bay and Bombay Hook R. R.

The Delaware Bay and Bombay Hook Railroad, which was recently seized by the sheriff of Kent County, Del., and sold for debt, was purchased by the American Dredging Company of Philadelphia for $54,800, who purchased the road to secure themselves against loss. This road, says the Wilmington *Commercial*, was built by Jay Gould, who intended it, he said, in connection with Jersey roads and proposed new lines, for a great freight route between New York and Baltimore.

A correspondent of the Wilmington *Journal*, writing from Smyrna, in relation to the sale of the above road, says:

"Jay Gould's agent who was present, did not manifest much interest in the sale of the road, only bidding, I believe, about $35,000. It is not known what will be eventually done with the road, and there is but very little speculation indulged in as to its future condition, but I think there is but little room to doubt that it will be put in running order and operated next spring. Should the Maryland and Delaware, the Kent county, and the Queen Annie's roads, together with the Smyrna and the Delaware Bay railroad, consolidate, and run passengers and freight to Bombay Hook, thence by fast steamers, to both Philadelphia and New York, I have but little doubt those roads might be made profitable, as they would surely take most of the freight and passengers that go from along the line of these roads now by the Delware railroad, and that road would be compelled to reduce both freight and passenger charges or run empty cars."

Lake Ontario Shore Railroad.

This road was sold at auction, by the Sheriff, at Oswego, on the 22d ult., and purchased in the interest of the Rome, Watertown and Ogdensburg Railroad Company for the sum of $1,950,000, gold, and $1,360 67 currency. The indebtedness of the road is said to be $2,340,161 85, gold. It is calculated that the sale will realise to the bondholders about eighty-five cents on the dollar, and wipes out the stock. The parties for whom the purchase was made are:—Moses Taylor, Samuel Sloan, Edwin F. Hatfield, Jr.; John T. Denny, Marcellus Massey, John S. Barnes, Theodore Irwin, Charles Rhodes, George B. Sloan, Talcott H. Camp, John Brisbin, James C. Ford, Christian Zabriskie. In commenting upon the sale the Oswego *Times* says:

"The Lake Ontario Shore Railroad, by this transfer, is placed in the hands of capitalists who have the means and disposition to push the enterprise to a final and speedy completion and make it an institution that will contribute to the benefit of the public as well as themselves. The work on the road is going forward, and the track will soon reach the Genesee River, and trains will probably be run to that point this fall. Next season the line will doubtless be completed to the Niagara."

☞ The St. Louis, Kansas City and Northern (late North Missouri) Railroad Co. have placed a new mortgage on their road, which will be a first lien on certain real estate at St. Louis, Kansas City, Moberly and other places, and on the eastern extension to connect with the bridge in St. Louis, and a second lien on the rest of the company's property, which is covered by a first mortgage for $6,000,000. The new bonds will bear 7 per cent interest and have 21 years to run from September 1, 1874. The proceeds are to be used for building the extension and providing better terminal facilities in St. Louis for building some 10 miles of road from the present junction with the Hannibal and St. Joseph into Kansas City, for other improvements and new equipment.

☞ The work of laying the tracks of the Jersey City and Albany Railroad, between Tappen and Haverstraw, is being rapidly prosecuted, and will be completed in a short time. On the 26th ult. the corporate authorities of Haverstraw proceeded to the office of Delos E. Culver, in Jersey City, and paid over to the officers of the railroad, $86,000 in bonds of the village, which had been voted by the citizens to aid in the construction of the road. The bonds will be immediately sold and invested in rails.

☞ A dividend of two per cent has been declared on the share capital stock of the Sandusky, Mansfield and Newark Railroad (Lake Erie division of the Baltimore and Ohio) payable on and after the 1st of October, at the office of the First National Bank of Sandusky, in par exchange, to Eastern shareholders.

☞ The Boston and Lowell and Lowell and Nashua Railroad Company have adopted Hall's system of automatic signals, and have contracted to have ten miles of their road, between Boston and Stoneham Branch junction, fully equipped with the device.

RAILROAD EARNINGS—MONTHLY.
